# Contents

---

<b>1. Introduction .....</b>	<b>1</b>
1.1 Graphics - A Historical Perspective .....	2
1.2 Functions of a Graphics Package .....	3
1.3 Graphics Applications.....	5
1.4 Graphics Algorithms .....	8
Summary.....	11
References .....	11
<b>2. Java Programming Language .....</b>	<b>13</b>
2.1 Java Applications and Applets .....	15
2.2 Object-Oriented Programming Using Java.....	19
2.3 The Abstract Window Toolkit.....	24
Summary.....	25
References .....	26
Exercises.....	27
<b>3. Graphics Primitives in Java .....</b>	<b>29</b>
3.1 Screen Coordinate System.....	29
3.2 Drawing in Java Applications and Applets .....	31

---

3.3	Straight Line.....	34
3.4	Rectangle.....	34
3.5	Rectangle with Rounded Corners.....	36
3.6	3D Rectangle.....	37
3.7	Clipping Rectangle.....	38
3.8	Polygon.....	39
3.9	Oval.....	40
3.10	Arc.....	41
3.11	String.....	43
3.12	Color Attribute.....	45
3.13	Font Attribute.....	49
3.14	Drawing in Off-screen Images.....	50
3.15	An Example.....	51
3.16	The Pseudo Screen.....	53
3.17	Line Drawing Algorithms.....	57
3.18	Fill Area Algorithm.....	61
	Summary.....	63
	References.....	64
	Exercises.....	65
<b>4.</b>	<b>Two Dimensional Viewing.....</b>	<b>67</b>
4.1	Window-to-Viewport Transformation.....	68
4.2	Java Class of Two Dimensional Viewing Functions.....	71
4.3	Line Clipping in Window.....	76
4.4	Line-Clipping in Viewport.....	84
	Summary.....	85
	References.....	85
	Exercises.....	86

---

<b>5. Two Dimensional Transforms</b> .....	<b>89</b>
5.1 General Linear Transformation.....	89
5.2 Homogeneous Coordinates .....	90
5.3 Translation .....	91
5.4 Rotation.....	93
5.5 Scaling.....	96
5.6 Reflection.....	98
5.7 Shear .....	100
5.8 Java Class of Two Dimensional Transforms .....	101
Summary.....	105
References .....	106
Exercises.....	107
<b>6. Three Dimensional Transforms</b> .....	<b>109</b>
6.1 Three Dimensional Affine Transformation .....	109
6.2 Translation .....	111
6.3 Rotation About Coordinate Axes .....	111
6.4 Rotation About an Arbitrary Line .....	115
6.5 Scaling.....	116
6.6 Reflection.....	117
6.7 Java Class of Three Dimensional Transforms .....	119
Summary.....	122
References .....	122
Exercises.....	123
<b>7. Object Modeling and Representation</b> .....	<b>125</b>
7.1 Vertex Table.....	125
7.2 Edge Table.....	127

---

7.3 Polygon Table.....	128
7.4 Java Class for Three Dimensional Modeling.....	130
7.5 Surface Generation Using Mesh.....	135
7.6 Surface of Revolution.....	137
7.7 Bezier Curves.....	139
Summary.....	144
References.....	145
Exercises.....	146
<b>8. Projections.....</b>	<b>147</b>
8.1 Orthographic Projection.....	148
8.2 Oblique Projection.....	149
8.3 Perspective Projection.....	151
8.4 General Projection of a Point.....	153
8.5 Java Methods for Implementing Projections.....	155
Summary.....	155
References.....	156
Exercises.....	156
<b>9. Surface Analysis.....</b>	<b>157</b>
9.1 The Bounding Rectangle of a Polygon.....	157
9.2 Condition for a Line to be Near a Polygon.....	161
9.3 Condition for a Line to be Along a View Direction.....	162
9.4 Condition for a Point to be Inside a Polygon.....	163
9.5 Surface Normal Direction of a Polygon.....	166
9.6 Condition for a Line to be Below a Plane.....	168
9.7 Points of Intersection of a Line with a Polygon.....	170

---

9.8 Re-sequencing of Entries in the Polygon Table .....	174
9.9 Unit-Vector Computation .....	177
Summary.....	177
References .....	178
Exercises.....	179
<b>10. Hidden Surface Removal Algorithms.....</b>	<b>181</b>
10.1 Surface Normal Method for Parallel Projection .....	181
10.2 Surface Normal Method for Perspective Projection .....	190
10.3 Painter's Algorithm.....	192
10.4 Z-Buffer Algorithm.....	201
Summary.....	203
References .....	203
Exercises.....	204
<b>11. Hidden-Line Elimination Algorithm.....</b>	<b>205</b>
11.1 Visibility Checks.....	205
11.2 Identification of Hidden Segments.....	207
11.3 Storage of Hidden Segments.....	209
11.4 Java Method for Hidden Line Elimination.....	210
11.5 Examples.....	212
Summary.....	218
References .....	219
Exercises.....	220
<b>12. Shading and Shadowing Algorithms.....</b>	<b>221</b>
12.1 Illumination Model .....	221
12.2 Reflection Model .....	223
12.3 Java Implementation of Shading Algorithm.....	226

---

12.4 Shadowing Algorithm .....	233
Summary.....	239
References .....	240
Exercises.....	240
<b>Appendix 1. Java Language Summary .....</b>	<b>241</b>
<b>Appendix 2. Lines and Planes .....</b>	<b>249</b>
<b>Appendix 3. Source Code Listing .....</b>	<b>253</b>
<b>Index .....</b>	<b>271</b>
