

FOREWORD BY BILL GATES

What
WILL
be.

HOW THE
NEW WORLD
OF INFORMATION
WILL CHANGE OUR LIVES

michael

DEKTOUZOS

Director, MIT Laboratory for Computer Science

Contents

Foreword xiii

Preface xv

I Shaping the Future I

1. Vision 3

A Home for the Web 3

The Information Marketplace 8

Infrastructure Is the Key 15

Global Fever 19

Questions 21

2. The Revolution Unfolds 25

Birth of the Computer Community 25

No More Buses 31

The Commercial Siren Song 32

Arpanet, Internet, and the Web 35

War of the Spiders 43

Battle of the Pipes 45

The Five Pillars of the Information Age 51

3. Where Person Meets Machine 55

Audio, Video, Bodyo 55

Talking to Your Computer 56

Bodynets and Smart Rooms 64

Virtual and Augmented Reality 68

Electronic Noses and Haptic Interfaces 73

The Ultimate Human-Machine Interface 77

4. New Tools 81

The New Software 81

Automatization Tools 83

Good Ole (and New) E-Mail 89

Groupwork and Telework 92

Pipe Managers	94
Hyper-Organizers and Finders	96
Computer Security Schemes	98
Information Infrastructures	107

II How Your Life Will Change III

5. Daily Life	113
Music Match	113
House Doctors and Data Sockets	115
Auto-Cook	117
Your Own Custom Publisher	120
Informed Automobiles	122
Discovering Insurmountable Needs	124
Mass Individualization	127
Togetherness	130
Financial Planning	134
A Virtual Compassion Corps	136
Your Day	138
6. Pleasure	139
From Your Easy Chair	139
Forbidden Pleasures	142
Creations and Flashbacks	148
Art	150
Virtual Neighborhoods	157
Games and Adventures	160
7. Health	165
Guardian Angel	165
The Medical Information Marketplace	167
Automated Specialists	171
Robotic and Augmented-Reality Surgery	172
8. Learning	175
Experiences and Prospects	175
Homework	178

Simulators	180
Design and Creativity	182
Automated Tutors and Masters	183
The Changes Ahead	186

9. Business and Organizations 191

Group Power	191
Business Changes	192
Electronic Commerce	193
Making Things	196
Services, Services, Services	198
Noble Quests	201
Pan-Organizational Changes	203
Knowledge Fever	207
Accountability, Egalitarianism, Responsibility	210
Industrial Performance	212

10. Government 215

Internal Changes	215
War and Peace	218
Privacy Fears	221

III Reuniting Technology and Humanity 227

11. The Value of Information 229

End Game	229
The Myth of Cheap Copies	230
The Economic Value of Information	234
Info-Junk and Intermediaries	238
The Rich-Poor Gap	240
Employment or Unemployment	243
The Reach of Information	246

12. Electronic Bulldozers 251

Plows, Engines, Networks	251
What's Wrong with Technology	254
Ease of Use Revisited	262

What's the Horsepower of Your Text Editor?	268
Greater Productivity	269
Toward a Work-Free Society	271

13. Electronic Proximity 277

A Thousand Times Closer	277
Humans and Machines	278
Rise of the Urban Villager	280
Nations or Networks	281
A Universal Culture?	282
Crime and the Law	286
No Passports, No Checkpoints	289
Big Brother	293

14. Ancient Humans 295

Overload	295
Virtual Laughter and Tele-friendship	298
The Forces of the Cave	300
What Will Be	302
The Age of Unification	307
Unification	316

Appendix: The Five Pillars of the Information Age 317

1. Numbers, Numbers Everywhere	318
2. Two-Fingered Monsters	319
3. Computer Labor	322
4. Faster Than Smoke Signals	323
5. Computer Networks	325

Index	329
