22. **WANTED: IN GOD, NOT MONEY, WE TRUST** (Page: 331)

ability of the world's peoples to produce their own economic, social, cultural, and environmental improvements. The growing power of transnational capital is being seriously and rapidly eroded.

The path of deepening international debt, ecological mismanagement, market deregulation, intellectual, and the monopolization of intellectual property rights that currently dominates policy thought and action is a path to collective self-destruction, not to sustainable development.

International NGO Forum

United Nations Conference on Environment and Development

Rio de Janeiro, Brazil - June 21, 1992

11. The amount that developing countries pay in debt service charges for every \$1 that they receive is 40%.

12. The number of professional engineers of color whose combined yearly wages for making athletic shoes is less than basketball star Michael Jordan is paid to advertise them.

TIME, June 1, 1992
