To facilitate this, the Indonesian government established the Southeast Asian Development Commission (SEAC) in 1975. The SEAC was established to coordinate and promote development cooperation between Indonesia and the other ASEAN countries. The SEAC has been instrumental in providing technical assistance and training to the other ASEAN countries. The SEAC has also been instrumental in providing financial assistance to the other ASEAN countries. The SEAC has been instrumental in providing technical assistance and training to the other ASEAN countries. The SEAC has also been instrumental in providing financial assistance to the other ASEAN countries.

To allow for proper planning and incremental research, the group felt that work in these areas could be most effectively developed within the
