

FACTOR FOUR

DOUBLING WEALTH, HALVING RESOURCE USE

THE NEW REPORT TO THE CLUB OF ROME

ERNST VON WEIZSÄCKER

AMORY B LOVINS • L HUNTER LOVINS

Contents

List of abbreviations	ix
List of figures	xi
Foreword	xiii
Preface	xv

INTRODUCTION: MORE FOR LESS

Exciting Prospects for Progress	xviii
Moral and Material Reasons	xvix
Efficiency Cure for the Wasting Disease	xvix
The Efficiency Cure	xxi
Seven Good Reasons for Resource Efficiency	xxii
What's So New About Efficiency?	xxiv
The Purpose of This Book is Practical Changes	xxv

PART ONE: FIFTY EXAMPLES OF QUADRUPLING RESOURCE PRODUCTIVITY

CHAPTER 1: TWENTY EXAMPLES OF REVOLUTIONISING ENERGY PRODUCTIVITY

Hypercars: Across the US on One Tank of Fuel	4
The Rocky Mountain Institute Headquarters	10
The Darmstadt 'Passivhaus'	13
Hot-Climate Houses in California	15
Superwindows and Large-Office Retrofits	19
Queen's Building, the New School of Engineering and Manufacture, De Montfort University, Leicester UK	24
Renovating Masonry Row-Houses	25
ING Bank Headquarters	27
Cutting Danish Appliances' Energy Use by 74 Per Cent	29
Super-Refrigerators	33
Lighting	36
Office Equipment	41
Photovoltaics at Forty-eight Volts Direct Current	46
Renewables in a Cold Climate	48
Low-Energy Beef	50
Greening the Red Ones	51
Fans, Pumps and Motor Systems	53

The Frontiers of Air-Conditioning	58
Quadrupling Energy Productivity in Five Small Steps	64
Profitable Energy and Waste Savings in a Louisiana Factory	65

CHAPTER 2: TWENTY EXAMPLES OF REVOLUTIONISING
MATERIAL PRODUCTIVITY

Introduction	68
Durable Office Furniture	70
Low-MIPS Car/Hypercar	71
Electronic Books and Catalogues	76
Steel versus Concrete	78
Subsurface Drip Irrigation	80
Water Efficiency in Manufacturing	82
Residential Water Efficiency	85
Cotton Production with Less Water	88
Reducing Material Flows in Industry	89
The FRIA Cooling Chamber	91
The Services of Washing and of Vertical Transport in Buildings	93
Rehabilitating versus Demolishing Buildings	94
Perennial Polyculture	97
Biointensive Minifarming	99
Rent-a-Chemical: A Strategy for Improving Material Efficiency	101
Belland Material: Recycling Wrapping Plastic	104
Reusing Bottles, Cans and Large Containers	106
Wide-Span, Heavy-Duty Wood Construction	108
Wood in Home Building	109

CHAPTER 3: TEN EXAMPLES OF REVOLUTIONISING
TRANSPORT PRODUCTIVITY

Videoconferences	112
Electronic Mail	116
Strawberry Yoghurt	117
Local Blackcurrant Juice or Overseas Orange Juice	120
Quadrupling the Capacity of Existing Railways	121
Pendolino and CyberTran: The Soft Options for Rapid Trains	123
Curitiba's Surface Underground	126
Car Sharing in Berlin	128
Car-Free Mobility	130
Getting the Village Feeling in the City	132

PART TWO: MAKING IT HAPPEN -
IMPROVING PROFITABILITY

CHAPTER 4: IF MARKETS CREATE THE PROBLEM, CAN
THEY ALSO PROVIDE MUCH OF THE ANSWER?

Can the Market Jujitsu Flip the Forces of Unsustainability?	143
The Imperfect Market	146
Market Theory versus Practice	150

CHAPTER 5: BUYING AND SELLING EFFICIENCY

Least-Cost Planning	155
Utility Regulatory Reform	158
Making Negawatt Markets - And Beyond	164

CHAPTER 6: REWARD WHAT WE WANT, NOT THE OPPOSITE

Correcting Perverse Incentives	177
Responsibility Requires Responsiveness to Feedback	183
Making Better Choices Possible in the Transport Sector	184
Making Prices Tell the Truth	189
Feebates	191

CHAPTER 7: ECOLOGICAL TAX REFORM

Let Prices Speak	198
The Least Bureaucratic, the Least Intrusive and Arguably the Most Powerful Instrument	203
Much Scope for International Harmonisation	206

PART THREE: A SENSE OF URGENCY

CHAPTER 8: THE CHALLENGE FROM RIO

The Earth Summit and <i>The First Global Revolution</i>	213
Sustainable Development is Inescapable but Has Hardly Begun	216
The Greenhouse Effect and the Climate Convention	222
Species Extinction and the Biodiversity Convention	230
More Unsolved Ecological Problems	233

CHAPTER 9: AVALANCHES OF MATTER: THE FORGOTTEN AGENDA

The Waste Problem is Only the Tail End	238
The Gold Ring on Your Finger Weighs Three Tonnes	242
The Factor Ten Club	244

CHAPTER 10: UNSATISFACTORY PART-SOLUTIONS	
Costly Pollution Control: Steering From the Wrong End	246
High-Tech Fantasies and the Neo-cornucopian Irony	250
Ecological Audits - Costly but Possibly Enlightening	254
CHAPTER 11: WE MAY HAVE FIFTY YEARS LEFT TO CLOSE THE GAPS	
Beyond the Limits? The Meadowses May Be Right	257
Population Dynamics	261
Some Arithmetic About the 21st Century	266
PART FOUR: A BRIGHTER CIVILISATION	
CHAPTER 12: GREEN ECONOMICS	
Green GDP	271
The Service Economy	275
Working Until the Age of Eighty?	276
CHAPTER 13: TRADE AND THE ENVIRONMENT	
Free Trade Strengthens Capital and Weakens Labour and the Environment	278
Can the WTO Become Green?	283
A Role for <i>Factor Four</i> in Trade and the Environment	286
A Philosophical Point About Trade and Darwinism	289
CHAPTER 14: NON-MATERIAL WEALTH	
Insatiable Consumption May Outpace the Efficiency Revolution	292
Informal Sector Wealth and Civilisation	294
Markets Are Not a Substitute for Ethics, Religion and Civilisation	296
References	300
Index	308

List of Figures

1	Gaps as large as a factor of four are opening before us...	xxviii
2	Towards the 'hypercar'...	7
3	Superwindows let daylight pass while reflecting heat rays...	21
4	Compact fluorescent lamps can be obtained in a multitude of shapes	37
5	A modern laptop computer can ideally reduce electricity demand by 99 per cent...	42
6	Energy in the food chain in the US...	52
7	WhiteCap cooling can save as much as 90 per cent of electricity...	61
8	A MIPS comparison between a concrete pylon and a steel pylon...	79
9	The triumphal progress of reducing water use in paper manufacturing...	83
10	FRIA, the cooling chamber designed by Ursula Tischner	92
11	Thirty-five hundred kilometres is the average distance travelled by a strawberry yoghurt made in Stuttgart, Germany	118
12	The theoretical potential for increasing the number of trains that can safely pass over one railway track...	122
13	Car sharers make less use of a motor car than private owners of cars...	129
14	Energy intensity of industrialised countries since 1850...	141
15	Energy efficiency doesn't seem to cost more...	152
16	The planned Hannover 'negawatt plant'...	162
17	Southern California Edison discovered that subsidising efficiency equipment at the end-consumer's level is not as cost-effective...	167
18	Negawatts can save a lot of money...	173
19	Resource prices fell drastically following the late 1970s despite a continuous accumulated increase of resource consumption...	199

20	A positive, not negative, correlation can be found between economic performance and energy prices	201
21	A strong negative correlation can be observed between fuel prices and per capita fuel consumption	202
22	One thousand Germans consume roughly ten times more resources than 1,000 Argentines	219
23	We need three earth globes to accommodate 6 thousand million 'ecological footprints'	221
24	Bangladesh would suffer immense losses in case of climatic change	223
25	Increase of (mostly) storm-related damages worldwide, in thousand millions of dollars	224
26	Carbon dioxide concentrations as observed far from industrial activity on Mount Mauna Loa	225
27	The 'Vostok' sensation: a surprisingly strict correlation during the last 160,000 years	226
28	The extinction of species has accelerated to an absolutely alarming extent	231
29	The debt crisis stands in the context of rapidly increasing commodity sales by developing countries	232
30	Stagnating world fish catches and rising demand lead to exploding fish prices	235
31	One instance of an ecological time bomb	236
32	A large stock of cations was built up in Scandinavian soils	240
33	Exponential growth in the use of metals by our civilisation	241
34	A kilogram of metals may require tonnes of materials to be moved and processed	243
35	Five per cent of the world energy pie is nuclear	251
36	The 'standard run' from <i>The Limits to Growth</i>	259
37	Assuming a doubled stock of exploitable resources, industrial outputs may grow 20 years longer	260
38	The sustainability scenario presupposes that strict sustainability policies were introduced in 1975	261
39	Time horizons of politics, the corporate world, children, etc	262
40	Three variants of population growth during 1995-2150	263
41	Female education rates (in 1985) showed a striking negative correlation with population increase	264
42	The industrial output submodel of the World3/91 model	265
43	Assuming 2 per cent annual gains in resource productivity	266
44	Assuming 4 per cent annual gains in resource productivity	267
45	The Index of Sustainable Economic Welfare (ISEW)	273
46	Until around 1980, income from both labour and capital went more or less in parallel with German GDP growth	279
