

DR. MOHAMMAD ILYAS

A MODERN GUIDE  
TO ASTRONOMICAL  
CALCULATIONS OF  
**ISLAMIC**  
**CALENDAR,**  
**TIMES &**  
**QIBLA**

# CONTENTS

	Page
FOREWORD	vii
PREFACE	ix
<b>PART 1: BASIC ASTRONOMY</b>	
<b>CHAPTER 1. INTRODUCTORY SPHERICAL ASTRONOMY</b>	<b>3</b>
<b>1.1 Spherical Triangles</b>	<b>3</b>
1.1.1 Great Circles And Spherical Triangles	
1.1.2 Small Circles	
1.1.3 Plane Trigonometric Formulae	
1.1.4 Spherical Trigonometric Formulae	
1.1.5 Small Spherical Triangle	
1.1.6 Special Applications—The Terrestrial Sphere	
Shortest distance, angles between great circle planes, most northerly latitude	
<b>1.2 Astronomical Coordinate System</b>	<b>11</b>
1.2.1 Introduction	
1.2.2 The Celestial Sphere	
1.2.3 The Diurnal Rotation Of The Earth	
1.2.4 The Ecliptic	
1.2.5 The Coordinate Systems	
Horizon (altitude and azimuth), equatorial (right ascension ( $\alpha$ ) and declination ( $\delta$ ), hour angle (HA)/siderial time (ST) and declination ( $\delta$ ), ecliptic (longitude ( $\lambda$ ) and latitude ( $\beta$ ))	
1.2.6 Transformation of Coordinates	
<b>1.3 The Measure Of Time</b>	<b>19</b>
1.3.1 Mean And True Solar Time	
1.3.2 Siderial Time	
1.3.3 Measurement Of The Year	
Calendrical, Reference	

<b>1.4 Miscellaneous</b>	<b>23</b>
1.4.1 Diurnal Motion—Simplified Formulae Upper/lower culmination rising and setting, transit through the prime vertical, maximum azimuth	
1.4.2 Parallax	
1.4.3 Atmospheric Refraction	
1.4.4 The Semi-Diameter Of The Sun/Moon	
1.4.5 Change In $Z$ , $A_Z$ With Time	
1.4.6 Separation Between Two Bodies Arcs of descent and separation, elongation and arc of light, phases and eclipses	
<b>CHAPTER 2. MOTION OF THE SUN AND MOON</b>	<b>30</b>
<b>2.1 Orbital Motions Of The Sun And Moon</b>	<b>30</b>
2.1.1 The Sun	
2.1.2 The Moon	
2.1.3 Approximate Solutions Of Problems Related To Lunar Motion Age, upper transit, rise/set, right ascension	
2.1.4 Another Method For Moon's Age Determination	
2.1.5 Construction Of A Same Age Boundary	
<b>2.2 Position Determination</b>	<b>34</b>
2.2.1 Introduction	
2.2.2 Solar Position	
2.2.3 Sun-Moon Position	
2.2.4 Siderial Time, ET and Local Time	
<b>2.3 Useful Astronomical Data</b>	<b>40</b>
<b>PART 2: LUNAR CALENDAR</b>	
<b>CHAPTER 3. SUN AND MOON AS TIME CLOCKS</b>	<b>51</b>
<b>3.1 Introduction</b>	<b>51</b>
<b>3.2 Natural Time Reckoning (Solar vs Lunar)</b>	<b>52</b>
3.2.1 Cycles	
3.2.2 The Year—Solar	
3.2.3 The Month—Lunar	
3.2.4 Luni—Solar	
3.2.5 Julian Dates	
<b>3.3 Civil Calendar—Developments</b>	<b>54</b>
3.3.1 Year And Month	
3.3.2 The Day	

<b>3.4 Solar Calendar—Present</b>	56
<b>3.5 Lunar vs Solar</b>	57
<b>CHAPTER 4. ISLAMIC LUNAR CALENDAR</b>	<b>58</b>
<b>4.1 The Need</b>	<b>58</b>
4.1.1 General	
4.1.2 Religious	
4.1.3 Historical	
<b>4.2 Specifications</b>	<b>60</b>
<b>4.3 Lunar Visibility—Prevalent Practices</b>	<b>66</b>
4.3.1 Introduction	
4.3.2 Varied Practices For Important Dates	
Physical sighting, physico-astronomical basis, astronomical basis	
4.3.3 Astronomical Confusions, Varied Calculations And Inadequate Propositions	
Proposition for the use of astronomical calculations, varied basis of calculations and contradictory dates, practical considerations	
<b>4.4 Technical Details</b>	<b>78</b>
4.4.1 Solar Dates Of Hijra, Last Hajj And First Muharram 1 A.H.	
4.4.2 Other Technical Aspects	
<b>CHAPTER 5. LUNAR VISIBILITY: ASTRONOMY AND PHYSICS</b>	<b>82</b>
<b>5.1 Historical</b>	<b>82</b>
5.1.1 Introduction	
5.1.2 Criterion Upto 1100 A.D.	
Ancients—500 A.D., Hindus (500 A.D.)—700 A.D., 700–1100 A.D.	
5.1.3 Criterion After 1100 A.D.	
1100–1800, 1860–1975, Decades of confusion, Recent years	
<b>5.2 Physics And The Young Crescent's Visibility</b>	<b>87</b>
5.2.1 Introduction	
5.2.2 The Human Eye As A Radiation Detector	
Sensitivity and dark adaptation, constrast sensitivity	
5.2.3 The New Moon As A Light Source	
5.2.4 Optical Aids	

<b>5.3 Astronomical Criterion Of Lunar Visibility</b>	<b>93</b>
5.3.1 Introduction	
5.3.2 Statistical $\Delta A$ ( $\Delta Z$ ), $\Delta Az$ Criterion	
5.3.3 Theoretical $\Delta A$ , $a_L$ Criterion	
5.3.4 Moon's Age Criterion	
5.3.5 Moonset Time Lag Criterion	
<b>5.4 The Danjon Limit And An Erroneous CC Criterion</b>	<b>105</b>
5.4.1 The Danjon Limit	
5.4.2 The Erroneous CC Criterion	
<b>5.5 Accuracy Of The Visibility Criterion</b>	<b>109</b>
<b>5.6 Summary</b>	<b>111</b>
<b>CHAPTER 6. LUNAR VISIBILITY: GLOBAL CALCULATIONS AND APPLICATIONS</b>	<b>112</b>
<b>6.1 Introduction</b>	<b>112</b>
<b>6.2 Global Lunar Date Lines Calculations</b>	<b>113</b>
6.2.1 Calculation System	
6.2.2 Global Lunar Date Lines (ILDL)	
6.2.3 Accuracy Of ILDL	
6.2.4 Nature Of The ILDL	
<b>6.3 Calendrical Application Of ILDL</b>	<b>120</b>
6.3.1 Concept Of The Same Day	
6.3.2 ILDL And A Lunar Day	
ILDL's vertical line situation and the actual lunar date line	
6.3.3 Practical Simplifications Of ILDL	
Vertical line approximation, one cycle approximation, CC's oversimplifying suggestions	
6.3.4 ILDL And The Systematic World Islamic Calendar	
<b>6.4 Lunar Date Line And Sighting Reports</b>	<b>133</b>
<b>6.5 ILDL And Religious Considerations</b>	<b>135</b>
<b>CHAPTER 7. INTERNATIONAL (WORLD) HIJRA CALENDAR: OVERVIEW</b>	<b>137</b>
<b>7.1 Introduction</b>	<b>137</b>
<b>7.2 Recent Developments</b>	<b>138</b>
<b>7.3 Future Directions</b>	<b>139</b>
<b>7.4 Concluding Remarks</b>	<b>140</b>

<b>PART 3: ISLAMIC TIMES</b>	
<b>CHAPTER 8. ISLAMIC TIMES</b>	143
<b>8.1 Introduction</b>	143
<b>8.2 Defining System</b>	143
8.2.1 Practical Requirements	
8.2.2 Astronomical Requirements	
Astronomical and Islamic twilights, Fajr and Isha, end of Fajr, beginning of Maghrib, sunrise, sunset, Zuhr—midday, Asr-Hanafi, Asr-Shafei, restricted time durations	
<b>8.3 Time Calculations And Conversions</b>	148
8.3.1 Calculation Approach	
8.3.2 $\ell$ mt To Local Standard Time	
8.3.3 North/South Latitudes	
<b>8.4 Year, Longitude And Altitude Corrections</b>	151
8.4.1 Year To Year Corrections	
8.4.2 Longitude Correction	
8.4.3 Altitude Correction	
<b>8.5 Times In High Latitudes</b>	155
<b>PART 4: QIBLA</b>	
<b>CHAPTER 9. QIBLA DIRECTION</b>	169
<b>9.1 Introduction</b>	169
<b>9.2 Determination Of The Qibla Direction</b>	170
9.2.1 Direction With Respect To Geographic North-South	
9.2.2 Determination Of The Geographic North/South	
Solar meridian crossing, magnetic declination and compass	
<b>9.3 Use Of Map Projections</b>	172
<b>9.4 Global Data On Qibla</b>	174
<b>REFERENCES</b>	175
<b>WORLD DATA TABLES</b>	181
Global Lunar Visibility (1979–2010)	183
Global Islamic Prayer Times (0–68°N)	208
Global Islamic Prayer Times (0–68°S)	226
Main Geographical Locations (Latitude, Longitude)	242
<b>WORLD REFERENCE MAP</b>	256
