Contents

Preface	v
Introduction	vii
Acknowledgements	viii
CHAPTER ONE	
Global Warming: The Facts So Far	1
What is the greenhouse effect?	1
The greenhouse gases	3
CFCs and the ozone hole	16
CHAPTER TWO	
Looking to the Future	19
Forecasts, scenarios and models	19
The Intergovernmental Panel on Climate Change	22
"Business-as-usual"	23
What the computers predict	27
Is global warming already under way?	29
CHAPTER THREE	
The Implications of Global Warming	37
Food security	37
Sea level changes	41
Ecological disruption	44
Social and political impacts	47
The range of uncertainty	49

CHAPTER FOUR	
Reducing the Risks	51
Stabilising the greenhouse gas concentration	51
Available measures to reduce greenhouse gas emissions	52
Carbon taxes and tradeable permits	65
Meeting the costs	67
No regrets	68
CHAPTER FIVE	
Policy Implications for the Third World	71
Allocating responsibilities	71
A global responsibility	78
What kind of development?	83
Energy pricing for efficiency and equity	87
Preventing deforestation	89
Increasing fossil fuel consumption	91
Debt, trade and aid	92
Appendix	94
International initiatives and organisations	94
Regional conferences and NGO initiatives	98
Notes	100
Index	101
