SOUTHERN AFRICA

*Spectacular  
world of  
wildlife*

# Contents

*The distribution of wildlife in southern Africa depends largely on the physical nature of a particular environment. Lions, for example, are at home in the bushveld-savannah and Kalahari regions, while hippos are found in the waterways. For this reason, the book is organised by natural region – as shown on the map opposite and in the contents list below.*

*Supplementing the regional sections are special ‘portfolio’ features covering important aspects of animal behaviour. The book ends with ‘Where to see wildlife’, detailing the major game reserves of southern and east Africa.*

<i>Bushveld-savannah</i>	<i>10</i>
