PREFACE	iii
ACKNOWLEDGEMENTS	iii

I. INTRODUCTION

<i>What kind of animal is the leatherback turtle?</i>	1
<i>Has it been around for a long time?</i>	1
<i>How many kinds of sea turtles are there?</i>	1
<i>Do all these species come to the beaches in Malaysia to lay eggs?</i>	2
<i>What is the difference between a terrapin, a tortoise and a turtle?</i>	5
<i>Does the leatherback look very different from the other species of sea turtles?</i>	5
<i>Where can we observe leatherback turtles in Malaysia?</i>	6
<i>Do the leatherbacks have a nesting season?</i>	7
<i>Where else in the world do they nest?</i>	7
<i>Are there many leatherbacks in the world's oceans?</i>	7
<i>How many leatherbacks come to nest each year in Malaysia?</i>	7

II. GENERAL BIOLOGY

<i>What is the shell of the leatherback made of?</i>	9
<i>Can leatherbacks survive without the shell?</i>	9
<i>Do other organisms grow on the shell?</i>	9
<i>How fast can leatherbacks grow?</i>	9
<i>How long can leatherbacks live?</i>	9
<i>What do they eat?</i>	9
<i>How much do they eat?</i>	10
<i>Do they have teeth?</i>	10
<i>Do they have ears?</i>	10
<i>Do they produce sounds?</i>	10
<i>Can leatherbacks breathe underwater?</i>	10
<i>How fast can they swim?</i>	11
<i>How far do they migrate?</i>	11
<i>Do they swim singly or in groups?</i>	11

<i>How deep can they dive?</i>	11
<i>How do they navigate?</i>	12
<i>Do they rest and sleep?</i>	12

III. REPRODUCTION

<i>Do leatherbacks really come back to nest on the beaches on which they were born?</i>	13
<i>Where and how do they mate?</i>	13
<i>How do you tell a male from a female?</i>	13
<i>How old are they when they first begin to lay eggs?</i>	13
<i>How big are the females when they start to breed?</i>	14
<i>How often do they nest?</i>	14
<i>Do they nest only at night?</i>	14
<i>Why do they shed tears during nesting?</i>	14
<i>Where are the nests usually located?</i>	14
<i>Is nesting a complicated process?</i>	14
<i>How deep are the nests?</i>	16
<i>Why are the nests made so deep?</i>	16
<i>How many eggs do the females lay each time?</i>	16
<i>Do they lay eggs every time they emerge on the beach?</i>	16

IV. EGGS AND INCUBATION

<i>How big are the eggs and what are their characteristics?</i>	18
<i>Are all the eggs fertile?</i>	18
<i>Is it possible to distinguish a fertile egg from an infertile egg?</i>	18
<i>What causes the development of the white patch?</i>	18
<i>How long do the eggs take to hatch?</i>	19
<i>Do incubation temperatures have any effect on the hatchlings?</i>	20
<i>How many hatchlings will hatch from each nest?</i>	20

V. HATCHLINGS

<i>How big are the hatchlings?</i>	21
<i>How long does it take a hatchling to crawl up to the surface of the nest?</i>	21
<i>Do all the hatchlings emerge at the same time?</i>	22
<i>How do they find their way to the sea?</i>	23

<i>Will artificial light distract them?</i>	23
<i>Where do the hatchlings go?</i>	23
<i>When do they first start feeding?</i>	24
<i>What do they feed on?</i>	24
<i>What dangers do the hatchlings face?</i>	24
<i>Do mother turtles look after their young?</i>	25

VI. ECONOMIC IMPORTANCE

<i>How have the leatherbacks benefited the coastal villagers of Rantau Abang?</i>	26
<i>How many eggs are collected each year?</i>	28
<i>How much does a leatherback egg cost?</i>	28
<i>Why are the eggs so greatly sought after?</i>	29
<i>How long can the eggs remain fresh in the markets?</i>	29
<i>Do the eggs in the markets contain live embryos?</i>	30
<i>Why are people so attracted to the leatherbacks?</i>	30
<i>How many tourists visit Rantau Abang each year to watch the turtles nest?</i>	30
<i>Are the leatherbacks killed for their meat and other products?</i>	30
<i>Can we estimate the economic value of a leatherback in dollars and cents?</i>	31

VII. THREATS

<i>Is egg collection threatening the survival of the leatherbacks?</i>	32
<i>Besides humans, are there any natural predators of the eggs?</i>	32
<i>Will leatherbacks nest on disturbed beaches?</i>	32
<i>Are tourists responsible for the decline in our turtle numbers?</i>	33
<i>Do people torture the leatherback turtles?</i>	35
<i>Why are some people so callous and inconsiderate?</i>	35
<i>Why are plastic bags littered on the beaches fatal to the leatherbacks?</i>	36
<i>Do leatherbacks get entangled in fishing nets?</i>	36
<i>Can lighted fishing boats at sea scare turtles away?</i>	36
<i>Besides man-made disturbances on the beach, are there natural forces which threaten the survival of the leatherbacks?</i>	37
<i>Does pollution affect the leatherbacks?</i>	37

<i>Do adult leatherbacks have natural enemies in the sea?</i>	37
<i>Can active hunting for leatherbacks elsewhere affect the population in Rantau Abang?</i>	37

VIII. CONSERVATION

<i>Are there any laws to protect the leatherbacks in Rantau Abang?</i>	38
<i>Who is responsible for protecting our sea turtles?</i>	38
<i>How many of the eggs laid are actually used for hatching?</i>	38
<i>How are the eggs incubated in the hatchery?</i>	39
<i>Can the eggs incubate in indoor hatcheries as well?</i>	41
<i>Where are the hatchlings released?</i>	41
<i>Can the hatchlings be reared in captivity?</i>	42
<i>What can be done to reduce the incidental catch of turtles in fishing nets?</i>	42
<i>What should tourists do when watching leatherbacks to ensure that they nest successfully?</i>	42
<i>Is there anything being done to educate the public?</i>	43
<i>What can tourists or the general public do to help in turtle conservation?</i>	44
<i>Are there any international laws to protect the leatherbacks?</i>	45
<i>How can research contribute towards sea turtle conservation?</i>	46
<i>Are Malaysian scientists conducting research on leatherbacks?</i>	46
BIBLIOGRAPHY	48
