CONTENTS

Preface	iii	Medical emergencies in which CPR may be necessary	59
Introduction	1	Cardiac emergencies —	
Between life and death — Situations requiring cardiopulmonary resuscitation	1	• Angina pectoris	59
Clinical death and brain death	5	• Heart attack (myocardial infarction)	62
The vital systems	6	Respiratory emergencies —	
CPR in adults	8	• Introduction: Severe respiratory distress	67
Stages and techniques: Unconscious, nonbreathing victim	8	• Pulmonary edema	68
Summary: Steps in the management of an unconscious, nonbreathing victim	20	• Asthma	69
External chest compressions	24	• The hyperventilation syndrome	71
One-rescuer CPR (ventilation and chest compressions)	27	Disturbances of cerebral blood flow —	
Two-rescuer CPR	29	• stroke	72
Are you performing CPR correctly?	30	Unconscious states —	
Exchanging positions during CPR	32	• An epileptic seizure	75
CPR in transit	32	• Disturbances of the state of consciousness and convulsions in children	77
Problems that may arise during CPR	33	• Fainting	79
Positioning the victim on his side	35	• Emergencies in diabetics	82
CPR in a “neck breather” (a laryngectomee)	36	Common accidents in which CPR may be necessary	85
CPR and AIDS	38	Electrocution	85
Clearing an obstructed airway — adult	42	Lightning injury	87
Clearing the airway — conscious victim	42	Heat stroke	88
Clearing the airway — unconscious victim	45	Hypothermia	90
Cardiopulmonary resuscitation in children and infants	48	Drowning	93
General	48	Poisoning	95
CPR in a child	49	Summary: Treatment of poisoning	102
CPR in an infant (under 12 months)	52	Caustic chemicals in the eye	104
Clearing an obstructed airway in children and infants	55	Resuscitation of the wounded and control of bleeding	105
Removing a foreign body from a child’s airway	55	Principles of management at a road accident	110
Removing a foreign body from an infant’s airway	56	Glossary	115
Diseases that cause upper airway obstruction	57	Summary tables and flow charts	118
		Index	120
