NUTRITION

Contents

Genetic Variation of Homocysteine Metabolism and Atherosclerosis	1
<i>J. M. Scott</i>	
Minimum Protein Requirements in Infancy and Childhood: Insights from Patients with Protein-Restricted Diets	25
<i>H. Ogier de Baulny, L. François, M. O. Grenèche, M. Giraud, and E. Depondt</i>	
How to Assess Amino Acid Requirements (With Particular Reference to Inborn Errors of Amino Acid Metabolism)	37
<i>P. B. Pencharz and R. O. Ball</i>	
Long-Chain Omega-3 Fatty Acids are Conditionally Essential Substrates in Children: Effects on Visual Function in Children With Phenylketonuria	51
<i>B. Kozietzko, S. Beblo, A. Muntau-Heger, W. Mueller-Felber, and H. Reinhardt</i>	
Fatty Acid Regulation of Gene Expression: A Genomic Mechanism to Improve the Metabolic Syndrome	67
<i>S. D. Clarke, C. Nelson, D. Gasperikova, J. DeMar, A. Lapillonne, and W. C. Heird</i>	
Genetic Disorders of Mitochondrial and Peroxisomal Fatty Acid Oxidation and Peroxisome Proliferator- Activated Receptors	85
<i>R. J. A. Wanders</i>	
Oxidative Stress: Antioxidants in Degenerative Neurologic and Ophthalmologic Diseases	107
<i>H. Sies, W. Stahl, and M. C. Polidori</i>	
Carbohydrate Therapy of Congenital Disorders of Glycosylation	123
<i>T. Marquardt</i>	
Genetic Variability of Human Milk Oligosaccharides: Are There Biologic Consequences?	137
<i>C. Kunz, L. Bode, and S. Rudloff</i>	

From Arginine to Creatine: Regional and Cellular Gene Expression of Enzymes and Transporters Linking Nitrogen and Energy Metabolism in Brain	153
<i>C. Bachmann, H. Henry, and O. Braissant</i>	
Current Understanding of the Molecular and Cellular Basis of Celiac Disease	167
<i>L. M. Sollid</i>	
Genetic Variations of Gliadins: New Approaches for the Treatment of Celiac Disease.	185
<i>O. D. Anderson</i>	
Current Uses and Future Perspectives of Recombinant Modifications in Food Production	201
<i>D. M. Bier</i>	
Diet as a Determinant of Drug Response	219
<i>D. G. Bailey</i>	
Diet, Gene Expression, and Apoptosis: Clues to Cancer Prevention?	239
<i>H. Daniel and U. Wenzel</i>	
Gene Therapy: A Potential Solution for Nutrition-Dependent Disorders? 263	
<i>M. L. Batshaw, J. M. Wilson, X. Ye, and S. E. Raper</i>	
Concluding Discussion.	279
<i>B. Koletzko</i>	
Subject Index	283
