Preface vii

Harvey B. Milkman

Introduction: Crisis and Conflict in the Addictions ix

Howard J. Shaffer and Harvey B. Milkman

Part I Theoretical Perspectives 1

**1. Inheriting Addictions: A Genetic Perspective with
Emphasis on Alcohol and Nicotine** 3

Allan C. Collins

**2. Biological Mechanisms: Neurotransmission and
Addiction** 11

Stanley G. Sunderwirth

3. Biopharmacologic Factors in Drug Abuse 21

Robert Freedman

4. An Analytic Overview of Addictions 29

William A. Frosch

5. Trends in Behavioral Psychology and the Addictions 39

Howard J. Shaffer and Robert J. Schneider

**6. The Social Psychology of Intoxicant Use: The Interaction
of Personality and Social Setting** 57

Norman E. Zinberg and Howard J. Shaffer

7. Addictive Behavior and the Justice System 75

Alexander M. Hunter and Robert A. Pudim

Part II Treatment Perspectives 85

- 8. Testing Hypotheses: An Approach for the Assessment of Addictive Behaviors 87**
Howard J. Shaffer and Charles Neuhaus, Jr.
- 9. A Biobehavioral Approach to the Origins and Treatment of Substance Abuse 105**
Thomas J. Crowley
- 10. The Use of Marijuana and Alcohol by Regular Users of Cocaine: Patterns of Use and Style of Control 111**
Milton E. Burglass
- 11. Addiction, Adaptation, and the "Drug-of-Choice" Phenomenon: Clinical Perspectives 121**
Edward J. Khantzian and Robert J. Schneider
- 12. Treatment of the Chemically Dependent Health Professional 131**
Millicent E. Buxton, Marty Jessup, and Mirn J. Landry
- 13. Addictive Disease: Concept and Controversy 145**
David E. Smith, Harvey B. Milkman, and Stanley G. Sunderwirth
- 14. Cognitive-Behavioral Treatment of Problem Drinking 161**
Chad D. Emrick, Joel Hansen, and Jeanne C. Maytag
- 15. A Multimodality Approach to the Treatment of Addiction 175**
Robert Vaughn Frye

Part III Epilogue 183

- 16. Diagnosis, Conceptual Models, and the Nature of This Book 185**
Lloyd I. Sederer

Index 197

About the Editors 205

Figures and Tables

Figures

- 2-1. Chemical Transmission of a Nerve Impulse 14
- 2-2. Neurochemical Basis for Addiction to Amphetamine or Arousal Activities 16
- 2-3. Neurochemical Basis for Addiction to Opiates or Satiating Activities 18
- 3-1. Graph of Mean Discharge Rate (Spikes per Second) versus Dosage of d-Amphetamine for Animals Treated with 2 mg/kg/day 23
- 3-2. Time Course of Effect of Withdrawal from Chronic Treatment with d-Amphetamine on the Rate of Spontaneous Activity of Cerebellar Purkinje Neurons 24
- 5-1. Subject's Daily Coffee and Tea Intake during Baseline, Treatment, Maintenance, and Follow-up 44
- 9-1. Factors That Increase or Decrease the Risk of Drug Use 106
- 13-1. Relationship between Enzymes and Genetic Makeup 147
- 13-2. Metabolism of Alcohol 148

Tables

- 5-1. Wikler's Two Stage Model of Conditioned Dependence 42
- 10-1. Pattern of Use of Marijuana and Alcohol before and after Using Cocaine Regularly 113

- 10-2.** Style of Control of Marijuana and Alcohol before and after Using Cocaine Regularly 114
- 10-3.** Marijuana: Changes in Pattern of Use for Females and Males before and after Using Cocaine Regularly 114
- 10-4.** Marijuana: Changes in Style of Control for Females and Males before and after Using Cocaine Regularly 115
- 10-5.** Alcohol: Changes in Pattern of Use for Females and Males before and after Using Cocaine Regularly 116
- 10-6.** Alcohol: Changes in Style of Control for Females and Males before and after Using Cocaine Regularly 117
- 12-1.** Model for Intervention with the Chemically Dependent Nurse 139
