## 1 Introduction 1

The Challenge of IT Technology. Complexity of the IT Management Task: *A Young Technology. Technological Growth. IT-User Coordination. Specialization. A Shift in Focus.* Senior-Management Questions. Issues in Information Technology: *The IT Environment. Organization. Management Control. Project Management. Multinational Issues. Planning. The IT Business.*

## 2 Manageable Trends 17

Introduction. Theme 1: Strategic Impact. Theme 2: Merging Technologies. Theme 3: Organizational Learning: *Phase 1. Technology Identification and Investment. Phase 2. Technological Learning and Adaptation. Phase 3. Rationalization/Management Control. Phase 4. Maturity/Widespread Technology Transfer.* Theme 4: Make or Buy: *Make. Buy.* Theme 5: Systems Life Cycle: *Design. Construction. Implementation. Operation. Maintenance. Summary.* Theme 6: Power Balance among Three Constituencies: *IT Management. User Management. General Management.*

## 3 Information Technology Changes the Way You Compete 39

Analyzing Impact: *Forces that Shape Strategy. Search for Opportunity. Value Chain Analysis: Inbound Logistics. Operations and Product Structure. Outbound Logistics. Marketing and Sales. After-Sales Service. Corporate Infrastructure. Human Resources. Technology Development. Procurement.* The Risks of Information Systems Success: *1. Systems that Change the Basis of Competition to a Company's Disadvantage. 2. Systems that Lower Entry Barriers. 3. Systems that Bring On Litigation or Regulation. 4. Systems that*

*Increase the Power of Customers or Suppliers, Perhaps to the Point of Encouraging Them to Bypass the Innovator Entirely. Assessing Competitor Risk. The Challenge. A New Point of View: Planning Issues. Confidentiality and Competition. Evaluating Expenditures. The IT-Management Partnership. Opening Questions. A Final Thought.*

**4 IT Redraws Competitive Boundaries 67**

*IOS Development. IOS versus DDP. Analyzing IOS's Impact. IOS and Generic Strategy: 1. Overall Cost Leadership. 2. Differentiation. 3. Focus. Influence on Industry Structure. Organizational Impact IOS Participation Profiles: Information Entry and Receipt. Software Development and Maintenance. Network and Processing Management. Control and Influence.*

**5 IT Organization Issues 83**

*The IT Challenge to Organizational Structure: Technological Change. Environmental Factors. Merging the Islands of Information Technology. Managing the Assimilation of Emerging Information Technology: The Four Phases of IT Assimilation. Innovation Management Study. The Emerging Technology (ET) Group. Patterns of Hardware/Data Distribution: Pressures toward a Large Central Hub of a Distributed Network. Pressures toward a Small Hub and Primary Distributed Environment.*

**6 Organizational Issues and IT 115**

*Organization Issues in IT Development: 1. A Short-Term User-Need Situation—Strategically Important. 2. User Control to Achieve Automation. 3. Step-by-Step Innovation of a New Technology. 4. User Innovation as a Source of Productivity. Pressures toward User Dominance: Pent-Up User Demand. Competitive and Service Growth in the IT Market. User Control. Fit to Organization. User Learning. Pressures toward IT Control: Staff Professionalism. Feasibility Study Concerns. Corporate Data Base System. Fit to Corporate Structure and Strategy. Cost Analysis. IT Responsibilities. User Responsibilities. General Management Support and Policy Overview.*

**7 IT Management Control 135**

IT Evolution and Management Control: *Software Issues. Operations Issues. Corporate Culture Forces. Corporate Planning and Control Process. Strategic Impact of IT on the Corporation. Looking Ahead: Other Aspects of Control. Control Architecture: Unallocated Cost Center. Allocated Cost Center and Chargeout. Profit Center. Investment Center. Transfer Pricing. Control Process (Financial and Nonfinancial): Financial Reporting Process. Nonfinancial Reporting Process. IT Audit Function.*

**8 A Portfolio Approach to IT Development 161**

Project Risk: *Elements of Project Implementation Risk. Project Categories and Degree of Risk. Assessing Risk in Individual Projects. Portfolio Risk. Project Management: A Contingency Approach (By Project Type): Management Tools. Influences on Tool Selection. Relative Contribution of Management Tools.*

**9 Operations Management 179**

Changing Operations Environment. Developing an Operations Strategy: *The Role of IT Architecture. System Design and Operations. Externally Sourced Services—Pressures and Challenges. Service Sourcing—Decision Authority. Examples of Different Organization Approaches to Life-Cycle Control. Technology Planning. Measuring and Managing Capacity. Managing the IT Operations Work Force: Selection of Operations Manager and Staff. Human Issues in Managing the Work Force. Production Planning and Control: Resolving Priorities. Implementing Production Control and Measurement. Security.*

**10 Multinational IT Issues 211**

Diversity between Countries: *Sociopolitical. Language. Local Constraints. Economic. Currency. Autonomy. National Infrastructure. National IT Environments: Availability of IT Professional Staff. Central Telecommunications. National IT Strategy. General Level of IT Sophistication. Size of Local Market. Data Export Control. Technological Awareness. Trade Union Environment. Border Opportunities. Corporate*

Factors Affecting IT Requirements: *Nature of Firm's Business. Strategic Impact of IT. Corporate Organization. Company Technical and Control Characteristics. Effects of Geography and Size of Companies. Economic Analysis. Other Considerations.*  
Multinational IT Policy Issues: *Communication and Data Management Standards. Central Hardware/Software Concurrence or Approval. Central Approval of Software Standards and Feasibility Studies. Central Software Development. IT Communications. Staff Planning. Consulting Services. Central IT Processing Support. Technology Appraisal Program.*

**11 IT Planning: A Contingent Focus 231**

Pressures toward IT Planning: *External (Corporate) Pressures. Internal (IT Process) Pressures. Limitation of Planning Benefits: Planning as a Resource Drain. Fit to Corporate Culture. Strategic Impact of IT Activities. IT Management Climate.*  
IT Planning and Corporate Strategy: *Strategy 1: Be the Low-Cost Producer. Strategy 2: Produce a Unique, Differentiated Product. Strategy 3: Identify and Fill the Needs of Specialized Markets.*  
Corporate Environmental Factors Influencing Planning: *1. Perceived Importance and Status of the Systems Manager. 2. Physical Proximity of Systems Group and General Management Team. 3. Corporate Culture and Management Style. 4. Organizational Size and Complexity. Example.*

**12 The IT Business 255**

The IT Marketing Mix: *Product. IT Consumer. Cost. Channels of Distribution. Competition. Promotion. Price.*  
Role of the Board of Directors. Role of IT Chief Executive Officer.
