## **MODULE 1 The Challenges of Managing in an Information Age 1**

### **1. The Information Technology Challenge 3**

IT Management Concepts	5
Strategic Relevance	5
Corporate Culture	5
Contingency	6
Technology Transfer	6
Challenges in Managing IT	6
A Young Technology	7
Technological Growth	7
IT End-User Coordination	8
Specialization	9
A Shift in Focus	9
Questions from Senior Management	10
Conclusion	12

### **2. Manageable Trends 15**

Theme 1: Strategic Impact	16
A Contingency Approach to IT Use	19
A Contingency Approach to IT Management	21
Theme 2: Integrating Changing Technology Platforms	24
Era I	25
Era II	25
Era III	26
Theme 3: Assimilating Emerging Technologies	26
Phase 1. Technology Identification and Investment	27
Phase 2. Technological Learning and Adaptation	27
Phase 3. Rationalization/Management Control	28
Phase 4. Maturity/Widespread Technology Transfer	28

Theme 4: Sourcing Policies for the IT Value Chain	29
Theme 5: Applications Development Process	31
Design	33
Construction	33
Implementation	34
Operation	34
Maintenance	35
Theme 6: Partnership of Three Constituencies	36
IT Management	37
User Management	37
General Management	38
Summary	38

## **MODULE 2 Information Technology and Strategy 41**

### **3. Effects of IT on Strategy and Competition 43**

Forces That Shape Strategy	45
Search for Opportunity	48
Can IT Build Barriers to Entry?	48
Can IT Build in Switching Costs?	49
Can IT Change the Basis of Competition?	50
Can IT Change the Balance of Power in Supplier Relationships?	51
Can IT Technology Generate New Products?	52
Analyzing the Value Chain for IT Opportunities	53
Inbound Logistics	53
Operations and Product Definition	54
Outbound Logistics	55
Marketing and Sales	55
After-Sales Service	56
Corporate Infrastructure	57
Human Resources	57
Technology Development	58
Procurement	58
The Risks of Information Systems Success	59
Problems and Evaluations	59
Assessing Competitor Risk	63
The Challenge	64
A New Point of View Is Required	65
Planning Issues	65
Confidentiality and Competition	65
The IT-Management Partnership	67
Summary	67

<b>4. Electronic Commerce: Trends and Opportunities</b>	<b>69</b>
The Evolution of Interorganizational Systems	70
IOS Evolution at American Hospital Supply and American Airlines	71
Evolution and Revolution: Introduction of the Internet	76
Learning from the Past as We Create the Future	82
Lesson 1: Build Internal Capabilities	82
Lesson 2: Penetrate Quickly and Leverage the Community	86
Lesson 3: Exploit the Economic Value of Information	93
Conclusion	99
<b>MODULE 3 Information Technology and Organization</b>	<b>101</b>
<b>5. Information, Organization, and Control</b>	<b>103</b>
Learning from Mistakes	108
Creating the Information Age Organization	112
Maximizing Flexibility, Innovation, and Control	114
Maximizing Independence and Interdependence: Collaboration, the Missing Organization Design Criterion	119
Summary	124
<b>Appendix A: Overview of Traditional Organization Design Models</b>	<b>125</b>
The Bureaucratic Hierarchy	126
The Entrepreneurial Organization	128
The Matrix Organization	129
The Adhocracy	129
A Framework for Organization Design	131
<b>6. IT Architecture: Evolution and Alternatives</b>	<b>137</b>
Evolution and Revolution: 30 Years of IT Impact	138
Evolution of IT Architecture	139
Era I: The Mainframe (1950s to 1970s)	141
Era II: The Personal Computer (Late 1970s to 1980s)	145
Era III: Network Computing (1990s to Present)	146
Value Creation in a Networked Environment	148
Implementation Issues	151
Maintaining a Reliable and Secure Environment for Doing Business	152
Assimilating Emerging Information Technologies	156
Managing the IT Legacy	159
Merging the Islands of Automation	161
Summary	164

<b>Appendix A: Guidelines for IT Architecture Assessment</b>	165
<b>Appendix B: Year 2000 Computing Crisis: A Testing Guide</b>	167
Overview of GAO's Managed, Five-Step Approach to Year 2000 Testing	171

**MODULE 4 Managing Information Assets 177**

**7. Organizing and Leading the Information Technology Function 179**

Organizing Issues in IT Development	179
Some Examples	181
Implications	183
Pressures toward User Dominance	184
Pent-Up User Demand	184
Staff Flexibility and Growth	184
Staff Professional Growth	185
Competitive and Service Growth in the IT Market	185
User Control	185
Fit with the Organization	186
User Learning	186
Summary	186
Pressures toward IT Control	187
Staff Professionalism	187
Feasibility Study Concerns	188
Corporate Databases	189
Fit with the Corporate Structure and Strategy	191
Cost Analysis	191
Summary	192
Coordination and Location of IT Policy	192
IT Responsibilities	192
User Responsibilities	194
General Management Support and Policy Overview	194
Summary	196

**8. Managing IT Outsourcing 199**

Why Outsourcing Alliances Are So Difficult	200
Outsourcing in Retrospect	201
Outsourcing in the 1990s	202
Acceptance of Strategic Alliances	202
IT's Changing Environment	203
What Drives Outsourcing?	204
When to Outsource IT	208
Position on the Strategic Grid	209

Development Portfolio	210
Organizational Learning	211
A Firm's Position in the Market	212
Current IT Organization	212
Structuring the Alliance	212
Contract Flexibility	213
Standards and Control	213
Areas to Outsource	214
Cost Savings	215
Supplier Stability and Quality	215
Management Fit	216
Conversion Problems	216
Managing the Alliance	217
The CIO Function	217
Performance Measurements	218
Mix and Coordination of Tasks	218
Customer-Outsourcer Interface	219
<b>9. IT Operations</b>	<b>221</b>
Changing Operations Environment	222
A Focused Service Organization Alternative—An Example	223
Alternative Organizations	224
Developing an Operations Strategy	225
Technology Planning	226
Innovation Phase	228
Control Phase	231
Measuring and Managing Capacity	231
Managing the IT Operations Workforce	234
Selection Factors for Operations Manager and Staff	236
Human Issues in Managing the Workforce	236
Production Planning and Control	237
Setting Goals	237
Establishing Priorities	237
Strategic Impact of IT Operations	238
Implementing Production Control and Management	239
Security	240
Privacy	241
The Roots of the Privacy Issue	242
The Implications	244
Summary	247
<b>10. IT Management Processes</b>	<b>249</b>
Management Control	249
IT Evolution and Management Control	251

- Software Issues 251
- Operations Issues 251
- Corporate Control Process 253
- Strategic Impact of IT on the Corporation 254
- Looking Ahead: Other Aspects of Control 255
- Results Control Architecture 255
  - Unallocated Cost Center 255
  - Allocated Cost Center and Charge-Out 256
  - Profit Center 261
  - Financial Reporting Process 262
  - Nonfinancial Reporting Process 264
- IT Audit Function 265
- Planning—A Contingent Focus 267
- Pressures toward IT Planning 268
  - External (Corporate) Pressures 268
  - Internal (IT Process) Pressures 269
- Limitations on IT Planning Results 271
  - Planning as a Resource Drain 272
  - Fit to Corporate Culture 272
  - Strategic Impact of IT Activities 272
  - Mismatches: Using the Strategic Grid 273
  - Corporate Environmental Factors That Influence Planning 275
- Summary 279

**11. A Portfolio Approach to Information Technology Development 281**

- Project Risk 282
  - Elements of Project Implementation Risk 282
  - Project Categories and Degree of Risk 284
  - Assessing Risk of Individual Projects 284
- Portfolio Risk 288
  - Summary 289
- Project Management: A Contingency Approach 289
  - Management Tools 289
  - Influences on Tool Selection 290
  - Relative Contribution of Management Tools 295
- Summary 295

**MODULE 5 Special Topics 297**

**12. Global Issues 299**

- Information Technology Impact on Transnational Firms 301
  - Geographic Transfer of Work 301

Global Networking and Expertise Sharing	302
Global Service Levels	302
Time-Based Competition	303
Cost Reduction	303
Country Diversity	304
Sociopolitical	304
Language	305
Local Constraints	305
Economics	305
Currency Issues	306
Autonomy	306
National Infrastructure	306
Summary	306
National IT Environment Issues	307
Availability of IT Professional Staff	307
Central Telecommunications	307
National IT Strategy	308
General Level of IT Sophistication	308
Size of Local Market	309
Data Export Control	309
Technological Awareness	309
Summary	310
Corporate Factors Affecting IT Requirements	310
Nature of the Firm's Business	310
Strategic Impact of IT	311
Corporate Organization	311
Company Technical and Control Characteristics	312
Other Considerations	313
Transnational IT Policy Issues	313
Guidance on Architecture	313
Central Hardware/Software Concurrence or Approval	314
Central Approval of Software Standards and Feasibility Studies	315
Central Software Development	315
IT Communications	316
Staff Rotation	317
Consulting Services	318
Central IT Processing Support	319
Technology Appraisal Program—An Example	319
Summary	320
<b>13. The IT Business</b>	<b>323</b>
"The IT Business" Analogy	323
The IT Marketing Mix	325

The Products	325
The IT Customer	327
Costs	329
Channels of Distribution	331
Competition	333
Promotion	333
Price	334
The Role of the Board of Directors	336
The Role of the IT Chief Executive Officer	337
Summary	338
Annotated Bibliography	339
Index	343
