and Rubiyah Yusof

NEURO-CONTROL AND ITS APPLICATIONS

Advances in
Industrial Control

Springer

CONTENTS

1 Introduction

1.1	Introduction to Intelligent Control.....	1
1.2	References.....	6

2 Neural Networks

2.1	Historical Review of Neural Networks	7
2.2	Backpropagation Algorithm	14
	2.2.1 Notation	15
	2.2.2 Derivation of the Backpropagation Algorithm	16
	2.2.3 Algorithm: Backpropagation Method	22
	2.2.4 Some Discussions on the Backpropagation Algorithm	22
2.3	Conclusions	25
2.4	References	26

3 Traditional Control Schemes

3.1	Introduction	29
3.2	Discrete-Time PI and PID Controllers	34
3.3	Self-Tuning Control	36
3.4	Self-Tuning PI and PID Controllers	43
	3.4.1 Closed Loop System	46
	3.4.2 Some Interpretations Based on a Simulation Example..	46
3.5	Self-Tuning PID Control - A Multivariable Approach	51
	3.5.1 Simulation Example	58
3.6	Generalized Predictive Control - Some Theoretical Aspects	61
	3.6.1 Cost Criterion	61
	3.6.2 The Plant Model and Optimization Solution	62
3.7	Fuzzy Logic Control	66
	3.7.1 Brief Overview of Fuzzy Set and Fuzzy System Theory	68
	3.7.2 Basic Concept of Fuzzy Logic Controller	71
3.8	Conclusions	76
3.9	References	77

4 Neuro-Control Techniques

4.1	Introduction	85
4.2	Overview of Neuro-Control	87
	4.2.1 Neuro-Control Approaches	90
	4.2.2 General Control Configuration	96
4.3	Series Neuro-Control Scheme	97
4.4	Extensions of Series Neuro-Control Scheme	109
	4.4.1 Some Discussions on On-Line Learning	109
	4.4.2 Neuromorphic Control Structures	111
	4.4.3 Training Configurations	114
	4.4.4 Efficient On-Line Training	116
	4.4.5 Training Algorithms	124
	4.4.6 Evaluation of the Training Algorithms through Simulations	128
4.5	Parallel Control Scheme	134
	4.5.1 Learning Algorithm for Parallel Control Scheme	135
4.6	Feedback Error Learning Algorithm	140
4.7	Extension of the Parallel Type Neuro-Controller	143
	4.7.1 Description of Control System	143
	4.7.2 Linearized Control System	144
	4.7.3 Control Systems with Neural Networks	145
	4.7.4 Nonlinear Observer by Neural Network	146
	4.7.5 Nonlinear Controller by Neural Network	147
	4.7.6 Numerical Simulations	149
4.8	Self-Tuning Neuro-Control Scheme.....	151
4.9	Self-Tuning PID Neuro-Controller	152
	4.9.1 Derivation of the Self-Tuning PID Type Neuro-Controller	153
	4.9.2 Simulation Examples	158
4.10	Emulator and Controller Neuro-Control Scheme	161
	4.10.1 Off-Line Training of the Neuro-Controller and Emulator	161
	4.10.2 On-Line Learning	162
4.11	Conclusions	165
4.12	References	165

5 Neuro-Control Applications

5.1	Introduction	171
5.2	Application of Neuro-Control to a Water-Bath Process and Comparison with Alternative Control Schemes	172
	5.2.1 Introduction	172
	5.2.2 Description of the Water Bath Temperature Control System	175
	5.2.3 Neuro-Control Scheme	176
	5.2.4 Fuzzy Logic Control Scheme	181
	5.2.5 Generalized Predictive Control Scheme	186
	5.2.6 Experimental Results and Discussions	187
	5.2.7 Conclusions	193

5.3	Stabilizing an Inverted Pendulum by Neural Networks	196
5.3.1	Introduction	196
5.3.2	Description of the Inverted Pendulum System	197
5.3.3	Initial Start-Up Control Using Fuzzy Logic	199
5.3.4	Using Optimal Control Strategy for the Stabilization of the Inverted Pendulum	203
5.3.5	Fine Improvement by Using Neural Networks	206
5.3.6	Conclusions	208
5.4	Speed Control of an Electric Vehicle by Self-Tuning PID Neuro-Controller	208
5.4.1	Introduction	208
5.4.2	The Electric Vehicle Control System	209
5.4.3	Self-Tuning PID Type Neuro-Controller	211
5.4.4	Application to Speed Control of Electric Vehicle	214
5.4.5	Conclusions	217
5.5	MIMO Furnace Control with Neural Networks	218
5.5.1	Introduction	218
5.5.2	Description of Furnace Control System	221
5.5.3	The Neuro-Control Scheme	223
5.5.4	Experiments and Discussions	227
5.5.5	Conclusions	237
5.6	Concluding Remarks	239
5.7	References	240
	Program List	245
	Index	253
