#### APPENDIX Charts 1-14

413-427

- 1: Communist United Front influence over Singapore's industrial strikes and membership of Trade Unions (1953-81)
- 2: Cumulative totals of Singapore housing units under management of Housing and Development Board and of flats sold under 'Home Ownership Scheme' (1960-81)
- 3: Singapore's 21 years of growth averaging 10% a year with only two short periods of deceleration (1960-81)
- 4: The source of Singapore's economic growth: capital formation which increased by 15% a year from 1960 to 1981

- 5: Two charts reflecting patterns in 1960, 1971 and 1981:
  - (a) As Singaporeans' incomes have increased, expenditure patterns have changed
  - (b) As Singapore's economy has grown, relatively more capital has been invested in transport, communications, plant and equipment
- 6: Singapore's industrial growth tightens labour market whilst average wages keep ahead of inflation (1960-81)
- 7: Singapore's average weekly earnings. Average annual growth rates in nominal and in real terms by occupation (1972-81)
- 8: The share of four major industrial sectors in Gross Domestic Product (1960-81)
- 9: How Singapore's pattern of overseas trade has changed (1960-81)
- 10: Annual growth of visitors to Singapore (1960-81)
- 11: A guide to inflation: the relative value of Singapore's dollar (1960-81)
- 12: What other currencies are worth internally in 1981 compared with 1960
- 13: Global Inflation (1960-80)
- 14: Decline in Vernacular School Attendances: Trends in student attendances at Primary and Secondary Schools by language stream 1947-82
