Langkawi Geopark is a rare island geoparks comprising 99 islands, possessing one of the most beautiful tropical island karst landscapes in the Southeast Asian region. It was officially endorsed by the Chief Minister of Kedah on 31st May 2006 to support sustainable development of natural resources. This is manifested through sustainable ecotourism and geoheritage conservation. LADA provides the administrative backing and finance, while UKM provides academic input towards the realization of Langkawi Geopark. Geoheritage conservation, on the other hand, is carried out under the jurisdiction of Forestry Department. This book contains valuable information on geological and landscape resources essential in the establishment of Langkawi Geopark. It also includes other nature and culture resource components of the geopark.

On the first of June 2007, Langkawi Geopark was declared as a member of the UNESCO Global Network of National Geopark, the first in Southeast Asia.
