

# BUREAUCRACY AND RURAL DEVELOPMENT IN MALAYSIA

BY GAYL D. NESS

**THE POLITICAL ECONOMY  
OF INDEPENDENT MALAYA  
A Case-Study in Development**

Edited by T. H. SILCOCK and E. K. FISK

"In this outgrowth of a research seminar at the Australian National University, nine specialists, all except one Commonwealth scholars, give the first complete picture of present-day economy, mainly of the Federation of Malaya and Singapore. This is a thorough, fact-packed, up-to-date and well-balanced presentation."—*Library Journal*

\$6.00

**THE PLURAL SOCIETY IN  
THE BRITISH WEST INDIES**

By M. G. SMITH

"Unquestionably the most important recent contribution to Caribbean studies. Considering the density of the arguments, the exposition is clear, the bibliographic notes and index exemplary, and the contents suitable for outside reading assignments in a number of sociology and anthropology courses."—*Choice*

"This is a first-rate book, a fine blend of ethnographic and theoretical writing. Smith has the rare capacity to infuse even dense material with insight and literary grace. For all of its wealth of data, the book remains uncluttered by excess baggage. This is an important book for all sociologists."—*The American Journal of Sociology*
