## Preface

— Wonderful Good News —

The world never has had any true religion or science since its beginning. Though the purpose of religion is to give mankind eternal life and happiness by solving the problem of death, there has been no religion that made human body immortal. Even though the foundation of science is to study the essence of human being, no one on the earth has met a science that clarified the essence of human being, the cause of death and the entity of spirit and soul.

In Korea, however, God's selecting land, Messiah has come at last and opened up THE VICTORY ALTAR FOR THE HOLY SOCIETY OF GOD.

Behold!

People grow not old but young, neither fall ill nor die forever. The accomplishment of immortal life is the concrete realization of happiness and is the perfection of religion and the climax of science. People have been told so far that religion and science are irreconcilable. But thanks to The Advent of Messiah who is the Way, the Truth, and the Life, they have met together dramatically at last.

His Words as explosive as an atomic bomb annihilate all the idols of untruth, and His Words as sweet as honey touch our hearts, and His Words as strong as high voltage lead us to eternal life.

The moment you pick up this book, you stand on the Y-road of life or death. If you throw this away, it means your falling. It suggests that your desire is for something worldly and fragile. You are wasting all your life for nothing and consuming the whole food for your sad funeral. In short, you are living to die. But if you read this carefully and again, it means your leap. It suggests that your hope is for something heavenly and eternal. Your ultimate aim in life is to enjoy happy life forever and ever. In short, you are living to live.

Which way would you like to take?

Don't want to die!

We love your life.

# Contents
