

SAND FOR SINGAPORE
chedet.co.cc
January 18, 2010

1. Works Minister Datuk Shaziman Abu Mansor remarked that everyday 500 trucks carry sand from Johor to Singapore. A friend told me that it is not 500. It is 700. That's a lot of sand.
2. I thought we had stopped selling lorry loads of our land to Singapore. But my friend explained that the sand is not sand. It is silica sand.
3. Singapore needs it to make microchips. I don't know how much sand goes into those tiny microchips. Must be a lot if they need 700 truck loads of sand a day.
4. Selling raw materials gives the least return. Better to add value by processing the raw material.
5. Cannot be that difficult to produce silica from silica sand. Glass factories do that (I think) all the time. And we do have glass factories in Malaysia. Why not produce the silicon wafers and sell them to Singapore?
6. I think someone is not telling the truth.

Salam Tun,

Heard you visited Kulim on February. Why not, you extend the trip to visit Silterra, located at Kulim High Tech for their roadmaps, and understood overall usage of this material, since this company doing wafer fabrication for micro chips.

Maybe there are more ideas generated can be used for nation.

God Bless

Salam buat Tun,

Apa yang Tun suarakan adalah kenyataan. Dari sumber yang saya perolehi dari PK Kastam Johor, sebenarnya tiada satu pun lori-lori yang membawa pasir atau 'batu' diperiksa oleh pihak kastam. Apa yang dinyakan oleh Pengarah Kastam Johor hanyalah BOHONG belaka.

Jangan cuba menutup kesalahannya dia memeang tidak tahu buat kerja.

Lebih baik pecat saja Pengarah macam ni merugikan negara.

wasalam.

Salam Tun,

Well, here we go again... we Malaysians never fail to make mistakes when going into business deal. Be it in the lower level or the upper level. Singaporeans are known to be shrewd when dealing business with them and why not... they learned from the best!

We made mistake when we sell them raw clean water at lower price but instead they processed it and bottled it and sell them at higher price. Then we sell them sand at lower price for them to banked up their island and now they have banked up all the way to Johor. We sell them some lands around Johor, Malacca, Klang Valley etc... so that we could earn fdi's and they could developed it but instead they probably now owned the lands they developed. Singaporeans and Thais come into Malaysia not only for holidays but also purchased subsidised goods namely oil, sugar, rice and etc...

Now, again we are making another terrible mistake by selling silica sand. Who gains? I believe it is not the country but a few individuals. Like you said Tun, we should processed it, then sell it.. that's how Jews do business and not being so timid about it. Siapa yang berputih mata nanti??

Some writers in this blog point fingers only to Malay and the government as the main culprit. Believe me, the Malays are not the only culprits. We know the Malays are not clever and hardworking but we should not blame them as it is like we are spitting onto our own face... stop all the ridiculous beliefs and myth.. instead of saying "org melayu ni pemalas" we shud say "org melayu mesti rajin dan berjaya" or " org melayu ni suka dengki" we shud say " org melayu skrg dah maju dan suka tengok org melayu berjaya".. if we keep on repeating negative opinions about the Malays, it would stuck for many generations to come. I myself is having second thoughts on whether to be proud for being a brown skinned Malay. Is it bad to be Malay?

Well, we can't really say much about the government... the government have never been efficient since... i don't know, maybe never!... haha.. Probably worsened since Pak Lah's regim and might get even worst if Ajib decides to retract government servant's current luxurious benefits, this is what i heard from rumours.

Anyway, back to the pertaining issue. If Malaysia seriously wants to become the next advance country, to increase GDP and to increase country's per capita income. Stop saying "tak pa lah"... stop getting into lop-sided business dealings and start becoming a serious player.

Oh ya Tun, i heard this from a friend. Did u recommend for the changed of Peninsular GMT to be synchronized with West Malaysia GMT back in the 60's or 70's?? just for knowledge purpose...

Adakah

1.Pelabur Singapura yg berulang balik Johor,
ada professional work permit disini.Immigration tolong check.

Ini hasil ni.

2. Pelaburan mereka ada pendaftaran yg lurus ke, ke ada belok belok.

IRA tolong check

3. Ni kereta mereka ulang balik, tak ada vehicle permit seperti mereka kenakan kita. Ini duit ni, ini duit. Tak nak ambil duit pun susah, bro.

Jangan takut persoalan pelancung, mereka mesti keluar masuk Johor punya. Mereka tak akan terperap saja. Lihat lagi banyak Kerajaan Singapura adakan ERP, lagi banyak hasil yg di kaup. Mereka mesti keluar

punya, terperak tak payahlah beli kereta, mahal pulak tu.

JPJ, Trafik tolong check.

Bro wake up bro, wake up!

Ini bukan batu ronson, tapi ini kelemahan dan kebodohan kita.

Kerajaan hanya mengharapkan cukai dari rakyat, sedangkan ini juga merupakan mekanisme hasil Kerajaan. Kerajaan miskin, rakyat pun turut jadi miskin.

Kerajaan perlu mengadakan satu pertubuhan bagi membimbing, membuka jalan, mengajar anak Melayu ke aliran Pemasaran Sendiri.

Saya lihat anak bumi kurang ilmu dalam aliran pemasaran hasil bumi Malaysia.

Seperti pertanian, anak Bumi bergantung pada orang tengah.

Dah penat menghasilkan bekalan, pemasarannya mengharapkan orang tengah yg akan menguasai harga.

Anak Bumi mesti explore cari pasaran sendiri.

Bergantung pada orang tengah hanya menguntungkan mereka saja.

Mereka akan monopoly pasaran dan mengaturkan harga, punca kurang semangat, kurang pendapatan, dan hidup stagnant bagi petani.

We must break the Chain.

Kerajaan mesti membimbing anak bumi yg kurang ilmu pasaran luar, bukan asik kasi bantuan wang, mesin saja, malah ilmu pemasaran.

Ilmu pemasaranlah yg menentukan titik puluh petani, selama ini mengharapkan orang tengah merekalah yg lebih untung.

Beli dah murah, RM pulak tu, jual Dollar, macamana si Ah Seng tak boncit.

Tun,

Saya terlalu benci apabila menyebut nama Singapura, saya tidak akan mengeluarkan satu sen untuk Singapura, apatah melawat negara ini. saya hairan mengapa TV 3 begitu ghairah mempromosi Sentosa Park melalui berita nya.

Apa yang Tun cakap adalah benar bahawa Melayu tidak boleh berubah, kalau tak boleh jual negara, mereka akan jual pasir. Selepas Tun memerintah, tidak nampak pemimpin yang wibawa, baik selepas Tun mahupun sekarang, semuanya "play safe". Alangkah gembiranya pemimpin Singapura melihat Malaysia mempunyai pemimpin yang lemah. Tidak faham saya mengapa Melayu sanggup menjual negara ini, sanggup menerima rasuah, biarkan negara tergadai.

Sepatutnya kesalahan menjual pasir dan penerima rasuah disamakan dengan pengedaran dadah, hukum mati saja ataupun ISA. Begitu juga perasuah yang menyebabkan begitu ramai rakyat India masih berada dinegara ini sepatut dihukum mati saja. Melayu terlalu mudah ditipu... sanggup menerima habuan... asalkan mereka senang tapi negara tergadai. Ini berpunca kita mempunyai pemimpin yang lemah...

Untuk menghadapi Singapura senang saja... kukuhkan pertahanan kita sama dengan kekuatan Singapura. Lihat saja India, penduduk negara ini ramai yang miskin tetapi kerajaannya melihat pertahanan dan kekuatan negara begitu penting. One thing, never buy anything from US.

Cuma satu saja yang saya kkuatiri iaitu gejala rasuah. Adakah gejala rasuah yang di bangkit olih pakatan rakyat adalah benar dalam pembelian Sukhoi dan kapal selam. Kerajaan harus menjawab pada rakyat dan kerajaan perlu ingat rakyat bukannya bodoh untuk menilai yang mana benar dan yang mana salah.

They even have Special Singapore Customs Clearance lanes only meant for this lorries,which facilitates and expedites their movement.
I do not think it belongs to private company,maybe it is,but being masks to cover up.No Private Company can have such special privileges.
This are VIP lorries,having their own lanes,their customs only need to poke one long metal stick,just to be sure no smuggling of other item.
This VIP lorries do not queue as the rest of other commercial lorries.
Wandering when their PM recently request for Johor Customs to open 24hr does it meant for this purpose.
Their Customs are very tactful being able to detect 7 sticks of cigarettes carried by us,and imposing heavy fines even for our own usage,but for 700 lorries going through it must be 700 stealth lorries.
They expect good bilateral relations to be given to them.
Their Authority should be aware of their doings despite our keeping silence.
Sorry for those persons that was caught abetting to them by our Authority,Sorry also if we do not punish both parties, regardless of who they are.
Giving excuses that our KTM Land at Tanjung Pagar onwards to Woodland as drug smuggling activities to obtain our land, can this excuse also be use to close the causeway,or will they close their own airport as smuggling activities still exists even with their stringent checks.
It is about principles and honor.

Salam Tun,

spoke to a friend of mine in singapore regarding the issues.

silica sand for use to manufacture glass and chips require very high silica content in the sand. Something like 95% and above but the quality of silica sand being sent to Singapore only contain about 20% or less of silica.

According to my friend, there are 3 stages of test that are required by BCA(Building & construction authority) singapore before sand & aggregates are approved for import to Singapore. Imports from Vietnam, Indonesia, Myanmar.....all have to go through the tests but "MALAYSIA" don't have to. Fishy Fishy.....isn't this double standards?!

The number of trucks travelling into Singapore to deliver sand is just a small number compared to those that are exporting so called "SILICA" sand by barges out of Malaysia to Singapore! It is ridiculous! Probably they also under declare the amount of silica sand exported out of Malaysia to cover for the under table money. Someone somewhere is making a lot of money from this and at the end of the day our country & our ppl get nothing out of it!

It has been a long standing regulation that we are not selling sand to Singapore but all this have been happening right under our noses and all we can do is sit and watch. Let corruption continue. Our neighbours are probably laughing at us.

I do agree that we can sell sand to Singapore but everything has to be more transparent. Our country has to profit from it and not just for some corrupt politician or businessman to fill their own pockets with our country's money! Our Malaysian government has to make a stand and do something about this matter because our neighbour will definitely not do anything cause they are not in the losing end. The more "SILICA" sand that is exported to them, the happier they are.

Tun,

Izinkan saya menjawab beberapa ulasan cauvinis Cina, S. Tan, yang nampaknya masih aktif memperjuangkan ideologi perkaumannya dalam blog ini.

Seperti sebelum ini, kalau saya tidak belash S. Tan ini, saya rasa tidak puas.

Saya tidak mahu mengulas panjang, cuma mahu S. Tan tahu bahawa tanpa kaum Cina atau kaum pendatang, akan tetap wujud bandar-bandar Melayu di negara ini.

S. Tan kena terimalah hakikat bahawa anda golongan minoriti di negara ini, jadi tak perlulah menjawab ulasan-ulasan pihak lain terutama bangsa majoriti di negara ini.

Kalau anda tidak suka negara ini, berpindah sahajalah ke Singapura kerana orang seperti anda yang tidak patriotik, tidak layak menulis di blog ini.

Saya berasa malu apabila terdapat rakyat negara ini terutama daripada kaum lain yang mempertahankan negara asing dan pemimpin autokrat seperti LKY.

Anda tidak suka Tun, tetapi masih menulis di blog ini atas kemurahan hati Tun.

Sepatutnya mereka yang patriotik tahu membezakan batasan antara politik, hasad dengki dan negara.

Begitu juga antara pemimpin negara sendiri termasuk mantan perdana menteri dan pemimpin asing.

Biarlah mereka yang mengulas terdiri daripada anak watan yang sayangkan negara ini dan anda boleh menulis dari Singapura bagi pihak LKY di sana.

The truth is Singapore is an unviable city state that should be re-unified with Malaysia. The only way the place makes any sense is as a major city of a real country with hinterland. That means Malaysia or Indonesia. Malaysia is the obvious choice for historical reasons. If the US-dominated system comes to a grinding halt--as recent troubles indicate are possible--the Singaporeans might stop playing around with the US and Israel, or pretending to be a country, and work on repairing relations with Malaysia.

Hi Tun

Here are some of the facts that you should know on the modus operandi of Singapore contractors supplying sand to the Singapore Government.

1. As construction sand from Vietnam or other neighboring countries are excessively expensive they have no choice but to accept the sand from Malaysia under the disguise of Silica Sand.
2. The Singapore contractor then work with the Malaysian authority by some illegal means through some middleman to obtain the sand

illegally by offering huge sums of money for the sand to be taken from Pahang and Johore.

3. Now that you have brought this to light to the Government, this operation came to an abrupt halt and the Singapore counterpart is now in a dilemma on future construction sand supply to the building industries in Singapore.

4. The successful contractor who was awarded 2 recent contracts for the supply will have to obtain new sources from Malaysia as his tendered price was based on illegal Malaysian Sand. Should he fail to obtain a new source then his performance bond to the Singapore Authority will be forfeited.

5. One wonders why the Building Construction Authority knows that the sand which was banned during your time till now and yet they accept knowingly coming from Malaysia. This I do not understand.

These are some of the true facts that happen and hope your team carry some due diligence and pursue further on this matter.

Will be glad to supply more info if need to.

By [rarnasalam](#)  on [January 24, 2010 3:17 PM](#)

My original response to Samurai Melayu (and indirectly) to others, who think I have questioned Malay 'sovereignty' by my question to Chapang, was not published

– actually 2 responses weren't published but rather than let it hang in the there, I'll try again...maybe, Tun's team of reviewers are still getting thru the hundreds of response he typically gets for his famous blogs.

To my question – “where do the Malays come from”...there are a number of underlying reason(s) to this:

1/ To call someone an immigrant is fine provided they are 1st generation, but to constantly refer to their kids and kin who were not only born and bred there and following generations have established their roots there is akin to not understanding what the term immigrant OR “pendatang” means.

The questions and constant ridiculing of successive generations as “pendatang” is disrespectful and pathetic in my view.

While it’s easy to let “barking dogs bark” – I think we as Malaysians need to stop segregating ourselves regardless of our ethnicity and I will not stop speaking up for my countrymen who have worked hard to ensure Malaysia is successful.

2/ Like the Aborigines in Australia and natives in South America as well in Africa, to pinpoint the exact origin of the Indigenous people (in Peninsula Malaysia) is not really possible except for those in Borneo region.

And this is evident in the fact that the Malay people (in Peninsula) as we know today have potential to come from the broader region – there are evidence to the natives from Borneo who expanded into Sumatra and the Malay Peninsula as a result of their trading and seafaring way of life.

One could also question how old are the ‘Malay’ origins in Peninsula, where documentation indicates around 1,500 years or so. Dont get upset for the fact remains there are older civilizations who have traversed and set themselves in other parts of the globe, before Malaya as we know through our history was even established

So, what is the big concern with the question – “dari mana datangnya orang Melayu?” – Immigration is not something only of the 20th century and those very indigenous who migrated to an unoccupied land could themselves be “pendatang”

3/ The world as we know today was a smaller cluster (greater mass of land) before it broke up and moved...Our ancestors probably came from other parts of the world, and a lot of Malays probably have ancestral heritage that is mixed. Those who are the “natives of the land” have probably kin who have married into other ethnicity ..

To close this argument - I constantly ask myself why am I here? How did I get here in first place. There is no single answer. I believe God created us all and there are reasons we got dispersed geographically. When people are in the process of breaking down class and ethnicity distinctions, the few who keep telling immigrants to leave continue to remain in their arcane belief, that a country solely belongs to the indigenous people . These people need to get over it - Malaysia is for all Malaysians...period!

Hi Jahanam, referring to your blog dated January 24, 2010 5:25 AM. Actually we have no right to decide or condemn how people live their lives. They have the right to do what they like as long as they don't hurt others. Singapore is such a small country with no natural resources and no leeway for making mistakes. I can understand why they work harder than other people because of that constant nagging fear that Singapore may just collapse one fine day, if they don't. Is it wrong to work hard? As long as they don't cheat us, that is what really matters.

As regards the water issue (just in case you want to bring up this topic about them "cheating" us), I personally think that we should abide by the earlier agreement made under Tunku (or whoever it was). As a matter of fact, I won't mind even giving them the water for free as a token of friendship, that is if I were the Prime Minister. After all, Allah has blessed this nation with very

much natural resources (even petroleum!) and Allah will obviously be most pleased to see Muslims behaving with such kindness. Moreover, water is a unique and renewable resource that cannot be stored and we have many rivers flowing into the sea and getting nothing in return.

And just in passing, yes, I have some Malay friends in Singapore and I also chat with some others through the internet. I am surprised that they apparently seem to be happy to live in Singapore and feel proud that they don't need government assistance to live (by the way, it is not easy to live in Singapore, what with the high cost of living). I told them they are stupid to walk when they can get a free ride here and they said, "No, thank you! We have our pride too, you know?" Personally, I was surprised. They are such a minority in an overwhelming Chinese majority country and they still manage to do good. And if I may add, they have nothing good to say about our Malaysian Malays.

Well, different strokes for different folks then. All I can say is that since I am not in business, I don't give a damn for all these NEP stuff and I still manage to get into a public university even with the low quota for non-Malays. The government can keep on extending the NEP for all I care (but don't say 20 years if you mean indefinite).

((about the technology you are referring to i cannot believe what you say.

Let me ask one thing to you, did you know that Chinese and the European need to be taught how to use water to clean one self so they can be clean and smell nice?

So where do you think the technology you referring to came from?)))

Toilet Technology, are you referring to? but the Company TOTO in Indonesia perfect the art of water dispenser.

I understand Mahathir stands against Singapore.

I hate neighbours, friends who are selfish,

Who be niece to me for something in returns, then turn away.

Giving hands with no sincerity, something fishy in their minds.

Careless the well being of others,

Worship to outbeat everybody,

Worship Money, Slavery to Time, Live to work. Not work to live.

Work as if there are no tomorrow.

What they really lacks is the true meaning of life.

We have been giving them many, since donkey years, yet they asking for more, asking and stealing.

It is not We are Stupid, Jealous nor because LKY like or dislike Mahathir, vice versa.

We are Two different people with different concepts of life.

Let,s be honest.I do beliefs those who condemn UMNO ruling,even the Malaysian Chinese would,nt want their style of governing.
We are flexible people,who values quality of lifes not through materialistics,We are not stupid nor lazy.
Simply we are different,with different visions.

Dear YAB Tun, salam mesra harap sihat. Kiriman saya menjawab tuduhan yg dilontar dlm blog ini dgn izin....

Menjawab tuduhan dlm blog ini....RINTIHAN BANGSA TERTINGGAL

> KEDAI BUKTI MENGEMIS?

Banyak gerai Melayu tepi jalan? Gerai atap bertiang kayu kaum lain kena roboh, halau atau kacau. Mrk terpaksa sewa rumah kedai tak tahan bayar duit kopi. Banyak kedai yg sewa bukan punya. Kedai yg punya banyak kena bayar hutang sampai tua. Mrk tiada pilihan. Mrk ada kuasa halang Melayu dari sewa, beli atau bina kedai?

Jgn mata pandang tapi tak nampak.

> BANDAR BUKTI TERTINGGAL?

Bandar yg kita nampak skrg hanya wujud zaman 'pendatang'. Zaman pra pendatang mana ada bandar rumah batu? Kalau budaya Melayu hidup berbandar, mana bandar mrk selepas seribu thn bertapak? Mana bandar penduduk asal beribu thn?

Hakikatnya, bandar skrg itu 'kampung' kaum lain. Di luar bandar mrk sewa tanah, pindah ke bandar pun sewa, jadi mrk berkumpul di bandar. Orang Melayu tanah kampung harta pusaka, di bandar kena beli tanggung hutang. Bodohlah kalau tinggalkan dan berderet, berhimpit, berhutang di bandar.

> BUKAN TAK BUAT

Usaha membandarkan Melayu gagal, lihat contoh bandar khas Shah Alam dan Putrajaya. Berbilion dibelanjakan krjn Selangor dan Petronas tapi kegiatan di sana lembab banding Puchong yg satu sen pun tak pakai wang krjn. Jalanraya pun kena bayar tol. Putrajaya bebas tol dgn jejambat, jambatan dan jalanraya saja, luasnya sebesar Puchong.

Tanya diri sendiri jgn asyik dengki. Jgn buta mata, buta hati dan buta ilmu semua sekali!

> SEKAT EKONOMI

Perniagaan di bandar ekonomi sesama sendiri bukan mengambil dari bangsa lain. Ini pun ada orang nak sekat, konon ini mempapakan mrk. Orang banting tulang kerja siang malam berniaga sesama sendiri merugikan bangsa lain?

Kalau ada bukti bandar ini konspirasi memiskinkan Melayu, hantar bukti pada Tun untuk siaran antarabangsa.

Dear Tun,

Your blog is fantastic. Gives us common rakyat a good insight of various topics. But there's one thing that I dislike about your blog. That is the comments left by the members. I enjoy reading criticisms and other opinions on the topics that you have posted. I just can't stand people commenting out-of-topic, usually brainless comments when people do that.

I wish your team can filter out nonsense comments and let readers debate on the issue in discussion. Of course I know that would be too much work. So, I hope these people would wake up and realize that normally readers want to read and know more about the discussed issue rather than their feelings.

Have a good day...

Hi Jimm, boleh tanya sikit? Pada abad bilakah negara yang bernama Kepulauan Melayu diasaskan dan siapakah rajanya? Apakah yang ditulis dalam Hikayat Melayu tentang asal-usul Parameswara yang dikatakan berasal daripada keturunan Alexander Agung? Adakah Alexander Agung itu orang Melayu? Tahukah anda bahawa perkataan Melayu hanya merujuk kepada kerabat diraja Melaka sehingga awal abad ke-17 apabila ia mula digunakan untuk merujuk kepada penduduk Melaka?

Tahukah anda bahawa pada suatu ketika, orang Bugis tidak diterima oleh orang Melayu di Semenanjung dan mereka sentiasa bergaduh? Kalau tiada orang Cina dan India, saya tidak syak bahawa mereka masih bergaduh pada hari ini!

Apabila anda bercakap tentang orang Melayu, adakah anda merujuk kepada orang Melayu dari Palembang atau orang Melayu tertakrif perlembagaan yang termasuk Tun, Ahmad Ismail, Zainuddin Maidin, dan sebagainya?

Adakah istilah pendatang mempunyai had? Berapakah bilangan generasi sebelum seorang tidak lagi dianggap sebagai pendatang? Jika Adam dan Hawa dilahirkan di Kuala Lumpur, saya bersetuju bahawa orang Melayu memangnya bukan pendatang.

Biar Lambat Membangun asal Kita Selamat, Tak Tergadai

Perpatah

Yang tak bolih dipakai, seperti berikut, Nak Kena Update: Dah absulate

2. Biar orang buat kita,

Jangan kita buat orang.

TAK Bolih pakai lagi, bro

Sekarang nak kena tukar.

2a. Orang jangan buat kita,

Kita pun jangan buat orang

Nahas padahnya! Asik kita aja yg kena.

Yang ini hanya bergurau saja, jangan ambil serious,

3. Bersatu Teguh

Bercerai Roboh.

Tanpa pembangunan adakah kita akan kelaparan,seangkan kita masih punyi rahmat secukupnya.Air keperluan utama manusia, kita punyai nikmat yg tak terhingga.

Saya bukan membangkang Pembangunan,Tetapi Pembangunan ini adalah satu Alasan dan sudah berkesan bagi mereka menjajah kita.

Akuilah kelemahan kita,yg tak berupaya menandingi mereka dalam bidang economy.Tak berdaya jangan buka Gelangang,Jangan bunuh diri.

Kita tak izinkan,mereka tak bolih buat apa apa.

Economy mereka sedang membuak to the highest peak,begitu juga kewangan mereka,the next level is B1.Meraka perlu ruangan yg lebih besar,maka bodohlah kita memberi laluan ini.

Seolah membangunkan mereka bukan untuk kita.

Sudah nyata,mereka sudah persiapkan angkatan pendatang dari China yg begitu ramai sekali,untuk menakluki Bumi Malaysia.

Sekarang mereka membolihkan anak kawin campur,memilh bangsa antara ayah atau ibu,ada muslihatnya.

Merka bikin sesuatu ada muslihatnya,bukan saja saja,tapi disebalik alasan lain.Alasan sebenar,mereka sendiri tahu.

Perkara inilah yg mengugat kehidupan kita,
menyepitkan kehidupan kita,
memecah belahkan kaum kita,keluarga kita
Punca Dan Hingga Tanah, Maruah tergadai.
Untuk Siapa,untuk anak cucu mereka.
Jangan kita Rambang mata.

.....SANCTIONS DIPLOMACY

Others practice sanctions too, but that does not make it legitimate. Two wrongs don't make a right. Should we follow what Hitler does? I hope you don't believe in tit for tat.

Sand policy is virtual sanction. It is just not on WTO list that S'pore can complain.

.....ELEMENTARY DEDUCTION

The signs are there on Thai and Indon foreign policy. Play hardball, Batam benefits. Indon and Thailand have so much more land mass and resources than M'sia. It is nothing for them to sell a tiny speck to benefit their citizens. No country in the world wants sand or else African countries are sitting on gold mines. Sand is not a global import item!

Indon and Thailand don't have S'pore phobia or middle kingdom doctrine fed into their minds. They are too big (pop and land) for a little red dot to be of any threat. They have no fears of S'pore's growth. They are more worried about M'sia. Thailand with Muslim insurgent links. Indon with Ambalat, Pendet, Rasa Sayang and Islamic crown.

.....TRADE AND PROSPERITY

Keeping our sand will enrich us? Selling sand will not help S'pore prosper any more than selling petroleum, rubber, oil palm and electronics to them.

.....SECRET TRUTH

The hidden truth about sand is the personal agenda (Mahathirism) and the open secret is the need to still pander to one person.

.....TIT FOR TAT

If giving an opinion is a buffoon, there are other more superior buffoons in this blog. You cannot distinguish these supreme buffoons? I am a flattered buffoon, a supreme intellect chose me to reason with. Buffoons are also subject to discrimination?

Your last comment is just another buffoon acting more like a buffalo?

Assalamualaikum warahmatullah,
Salam Tun Mahathir,

1. Datuk Shaziman Abu Mansor, mohon mata dibuka, langkah dijaga.

2. FACT: If every day is 500 truck, a simple formula is:

2.1. Sand Vs RM:

$\therefore 500(\text{Trucks:Loads}) \times 20 \text{ Ton}(\text{average 10 wheeler truck, max: 25 Ton}) \times \text{RM } 18.00(\text{sand, average selling price})$

$\therefore 500(L) \times 20(T) \times 18.0(RM)$
 $= 180,000.00 \text{ Per day}$

$\therefore 180,000.00 \times 26 \text{ Working day}$
 $= \text{RM } 4,680,000.00 \text{ Per Month.}$

2.2. Sand Vs Quantity:

$\therefore 500(L) \times 20(T)$
 $= 10,000 \text{ Tons Per day,}$

$\therefore 10,000 \text{ Ton} \times 26 \text{ Working day}$
 $= 260,000 \text{ Ton Per Month}$

3. Salam to Datuk Shaziman Abu Mansor and "To Whom It May Concern".

Assalamualaikum Tun Yang Amat Dihormati,

1.Saya tidak percaya bahawa negara jiran di selatan memerlukan kuantiti pasir silika yang begitu besar untuk membuat mikrochip.Pada pandangan saya,ini lebih bertujuan untuk memperluaskan kawasan negara mereka secara perlahan-lahan.

2.Amat berharap kerajaan dan pihak berwajib yang bertanggungjawab lebih peka dan mengambil perhatian serius tentang pengeluaran bahan mentah ke negara jiran ini.Mereka yang didapati bersalah memberi dan menerima rasuah dalam perkara ini,sememangnya patut dihukum.

Masalah dalam negara memang tidak pernah selesai dan akan sentiasa ada seperti di negara lain di dunia.Tetapi di Malaysia,saya tetap percayakan BN yang terbaik,parti pembangkang sesuai menjadi pembangkang(kerana mereka lebih pandai membangkang daripada mentadbir).Tetapi parti BN itu sendiri harus berusaha untuk memperbaiki kelemahan dan tidak 'menyimpan'orang bermasalah.Bagi saya 'it is still a BIG NO to PR',kerana masalah akan menjadi lebih parah.Ini adalah salah satu 'daki-daki'peninggalan PM-5,yang masih sukar 'dicuci'.

Semoga Tun dipanjangkan umur dan dilindungi Allah.

BERSATU RAKYAT UNTUK KESEJAHTERAAN NEGARA MALAYSIA,PEACE.

Dr M panned over statement

By NURBAITI HAMDAN

nurbaiti@thestar.com.my

PETALING JAYA: The statement by Tun Dr Mahathir Mohamad that the Sept 11 attack was “staged” could not come at a worse time when the nation is facing its own issues, says the Merdeka Centre.

Its director Ibrahim Suffian said Dr Mahathir’s statement did not help with the country’s image at a time of religious tension.

He said Dr Mahathir should know the difference between the fiction of Avatar and the reality of the attack that happened nine years ago.

“Conspiracy theories aside, people actually died in that suicide attack. Dr Mahathir’s statement is disrespectful to the victims for it to be described that way, with reference to a Hollywood movie,” he said yesterday.

Ibrahim said that as the founder of the Perdana Global Peace Organisation, Dr Mahathir should know the root causes of terrorism and point out what led him to draw such conclusions.

DAP adviser Lim Kit Siang in a statement said that Dr Mahathir would have created “an international incident” between Malaysia and the United States if he was still the Prime Minister.

Meanwhile, Malaysian Assembly of Mosque Youth (Pemuda Masjid) de facto leader Dr Mohd Nawar Ariffin said more discussions should take place on the allegations made.

“Dr Mahathir is a prominent figure who contributed a lot to the country. Although the statement incites controversy, perhaps it should be taken positively as an encouragement for people to dig out the truth. He is known as an evidence-based person when making statements,” he said.

The statement also sparked a chain of reactions on the Internet with many blogging and tweeting on the issue.

On Wednesday, Dr Mahathir said there was strong evidence that the Sept 11 attacks on the United States that killed nearly 3,000 could have been “staged” as an excuse to mount attacks on the Muslim world.

“If they can make Avatar, they can make anything,” Dr Mahathir was quoted as saying.

The United States Embassy declined to comment on the matter.//

Comment:

Here they go our domestic 2 x 5 "ancient" politicians of the Merdeka Centre director Ibrahim Suffian and DAP Kit Siang "pan-ning" on Dr M's remarks on 911 and AVATAR. Do they know that we are now in Cyber World, and why did The Star contacted The United States Embassy? It's very embarrassing to realize this main stream The Star online and ancient polticians in making up news like this.

How are we going to build Nuke Energy and No Plastic day for greener earth in 1 Malaysian with ancient politicians like these? Nuke energy can only be achieved through transparency. What is transparency, nuke and naked, Ibrahim and Kit Siang can google if they want to. The Pemuda Masjid is more decent and rational than these ancient politicians and main stream The Star.

Good day Ayahanda Tun. I am wondering did they watch AVATAR and Michael Moore's 911?? I bet they did not, "lampusuluh" di bawah tempurung If US can make Avatar, US can make anything due to human intelligence and interest.

On the other hand,

Dear Tun,

I am responding to the comment posted by 'S..Tan':

.....LEGACY

Embargo, sanctions, boycotts and bans are elements of Mahathirism. Look east, buy British last, US boycott and no sand! How it fits into WTO and free trade is the magic of mavericks.

THE DEVELOPED COUNTRIES ARE ALSO PRACTICING THEM. FOR EXAMPLE, THE US IS STILL ENFORCING EMBARGOES AND SANCTIONS AGAINST CUBA AND SEVERAL OTHER COUNTRIES. I WONDER WHETHER IT IS WISE FOR 'S..TAN' TO CALL THOSE PRACTICES AS MAHATHIRISM?

.....FEASIBILITY

Sand is issue of economics or pursuit of antagonism. If used for construction there should be no issues, for reclamation it can couple with 'no detriment' conditions, for industry consider feasibility. Now there is only drum beating arguments here!

Be careful, Thailand and Indonesia will be willing to sell a whole island of sand to them for the right price. They are much more endowed and spacious.

HOW SURE IS 'S..TAN' TO SAY THAT THAILAND AND INDONESIA WILL BE WILLING TO SELL A WHOLE ISLAND OF SAND TO SINGAPORE FOR THE RIGHT PRICE? HAS HE BEEN WORKING FOR THOSE GOVERNMENTS THAT HE KNOWS THIS FACT? I CONCLUDE THIS CLAIM AS FEEBLE

.....SAND DIPLOMACY

Asean policy of prosper thy neighbour on use of sanctions does not apply to Spore? Embargo can be part of bilateral relations? Try imposing an embargo on your next door neighbour? Sand diplomacy is a legacy of Mahathirism. De facto hate diplomacy? Sand in your eyes and sand in your rice bowl policy. Two wrongs make a right. Tit for tat. Black eye for Anwar, Australia and S'pore.

SINGAPORE IS NOW RECOGNIZED AS A DEVELOPED COUNTRY. DO WE STILL NEED TO PROSPER THEM WHILE WE ARE IN FACT BELOW PAR?

.....HIDDEN TRUTH

Is somebody hiding the truth? Sand ban is the hidden truth, sand sale is open secret. The only truth is another facet of Mahathirism may be out of use.

IS SOMEBODY HIDING THE TRUTH? MAYBE. 'SAND BAN IS THE HIDDEN TRUTH' MEANS THAT ALL THIS WHILE, THE FACT IS HIDDEN BY SOME PARTIES SO THAT SAND TRUCKS COULD PASS THE SOUTH BORDERS EASILY. 'SAND SALE IS AN OPEN SECRET' MEANS THAT NOW, THE SECRET REVEALED AS THE ISSUE IS BEING BROUGHT UP BY THE MEDIA AND GET THE PUBLIC ATTENTION. AND.. THE AUTHORITIES ARE TAKING ACTIONS AGAINST THOSE WHO ARE INVOLVED.

HAVING ANALYZED THE INEPT REMARKS BY 'S..TAN', I WOULD FURTHER RECOMMEND THIS BUFFOON TO UPDATE HIS KNOWLEDGE AND FIX HIS COMMON SENSE.

Salam Sejahtera semua,

1. Nak komen sikit pertanyaan sahabat Ravi yang bertanyakan dari mana datangnya orang Melayu.
2. Orang Melayu di Malaysia ni asalnya datang dari sebuah negara yang bernama Kepulauan Melayu. Kepulauan Melayu ni hari ini telah berpecah menjadi antaranya Malaysia, Indonesia, Thailand, Philipina (yang setahu saya).
3. So pergerakan orang Melayu pada waktu itu(contoh dari Indonesia ke Malaysia) adalah dianggap sebagai perpindahan dalam negeri sahaja kerana pada waktu itu Indonesia, Malaysia, Thailand adalah satu Negara.
4. Dan orang Melayu yang ada di Malaysia hari ini adalah penduduk asal negara (Kepulauan

Melayu)

5. Bukan macam bangsa lain (Maaf cakap yer) seperti Cina dan India.

6. Pergerakkan mereka ni jelas dari satu Negara (Kepulauan lain) yang lain dari kepulauan Melayu pada masa itu.

7. So mereka ni diistilahkan sebagai pendatang (Sensitif untuk disebut).

Salam dan selamat pagi Tun,

sebenarnya yang paling lemah dalam isu ini ialah penguatkuasaan oleh KASTAM, kastam harus dipertanggungjawabkan sepenuhnya isu ini, ini kerana penguatkuasaan yang dilakukan oleh kastam begitu lemah, tiada "cheking" terus je boleh masuk. masalah rasuah terlalu berleluasa, mereka mengetahui yang dibawa masuk ialah pasir tetapi mulut mereka telah ditutup dengan duit.

By JamesLabu  on [January 22, 2010 7:45 AM](#)

Angkara Siapakah sebenar dibelakang pengkhianatan ini.

Mengizinkan Pasir di jual, Tanah JOHOR dibanggunakan oleh Singapura, seolah Malaysia tak berDAULAT, seolah mereka yg punya kuasa. Lebih dasyhat dari penjajahan Yahudi! Sekurangnya Palestin membangkang, berjuang dengan nyawa mereka, walau tak punya senjata. Ini semua senyap, macam tak ada maruah.

Pemerintah, Menteri, Tengku, Datuk ke, yg berjiwa bangsat ini mesti ini dilucutkan. Tak ada siapa yg punya hak kecuali kata sepakat dari semua termasuk rakyat. Kerajaan punya kuasa, Rakyat punya suara, Sultan dihormati.

Apakah tindakan selanjutnya pada

1. apa yg sedang berlaku dan

2. Apa juga yg sudah berlaku.

Mesti di Benteraskan, mesti di Tewaskan.

Demi kita dan Keterunan, ini juga merupayi tuntutan agama Islam mnjaga maruah, dan Keterunan, mencorak, mewarnakan kehidupan anak cucu kita mengikut landasan Islam.

Tun adalah pemimpin Malaysia yg luar biasa.

Berkebolihan, Cekap ada visi kearah kemajuan dan membela hak rakyat.

Pelibatan beliau sekarang walau sudah bersara terbukti ketulinan seorang Pemimpin. Yang berjiwa bangsa dan negara.

Dari dulu, dari zaman Tun Abdul Rahman, zaman Tun Hussein Onn,

Jika kita ada pemimpin macam Tun, nascaya banyak hak kita dipelihara dan tak tergadai.

Memang lumrah penjajah, pendatang, orang luar akan mengambil segala kesempatan atas kelemahan kita.

Melayu gagal mempertahankan hak, tanah, harta, maruah dan banayak lagi.

Perkara ini bukan baru, belaku dari zaman Datuk Nenek Moyang kita dahulu.

Harapan Adik Adik,
Janganlah kita hanya menharapkan Pemimpin saja.
Pemimpin satu mana bolih jaga satu Malaysia.
Pemimpin pun ada tanggung jawab peribadi,ada masalah sendiri.
BERSAMALAH Kita,membantu Kerajaan kita,saling tegur menegur,menjadi satu
Chemistry,tukar segala detik detik hitam yg telah berlaku.
Kita masih ada suara,masih ada ruangan,maka sekaranglah kita mesti
bertindak.Mungkin dari Blogger Tun,sudah tertapis satu perjuangan,cuma kalau
disatukan,ditemukan,mungkin akan lebih berkesan,bukan setakat memberi pendanangan,malah
melaksanakan seharusnya.
Ini Adik Adik, tapi macam Abang Abang,
Wahai Anak Bumi
Perjuangkanlah kita bersama Kerajaan,
Mempertahankan hak kita,sebagai Tuan Rumah,
Pegawai Kerajaan yg bersubahat,berahsuah dengan anasir luar,
Janganlah kamu dibeli dengan harga 10c sedangkan mereka menikmati Jutaan nikmat,seolah
kamu menjual darah daging kamu sendiri.
Datuk Datuk,Nenek Nenek,Menteri Menteri yg di atas,
lihat lihatlah dibawah,janagan asik mendonggak atas saja nanti tergelincir.
Badan Badan Kerajaan,Custom,Immigrasi berlaku tegaslah kamu
menjaga pagar Negara.Jangan main chop saja,jangan ambil mudah.
Wahai Kita,
Jika kita melihat ada perkara yg agak anih,agak tak betul,
kemukakan pada pihak tertentu,lebih berkesan pada pihak media,
supaya semuanya kelihatan,jangan hanya melaungkan di kedai kopi saja.10 cawan Kopi
habispun tak berkesan,menyampai pada pihak
tertentu,pihak media akan lebih berkesan.

Hi Ravi, apakah yang kamu maksudkan dengan ungkapan "Orang Melayu"? Orang Melayu
tertakrif perlembagaan (iaitu golongan buatan) ataupun orang Melayu etnik dari Jambi,
Palembang, Sumatera, Indonesia? Jangan keliru antara kedua-dua itu!

Mengikut sejarah, orang Melayu etnik, keturunan daripada Kesultanan Melaka yang diasaskan
oleh Parameswara, putera Hindu dari Srivijaya, Palembang, seringnya bergaduh dengan orang
Bugis dari Sulawesi, Indonesia. Tanpa orang bukan "Melayu", mungkin kedua-dua kaum ini kini
masih bergaduh!

>> Kerakyatan

Duduk negara Arab sampai lupa sejarah M'sia? Kuasa bukan di tangan Tunku saja. Ingat ada British, Raja Melayu, Umno, jgn salahkan Tunku saja. Kita semua hasil sejarah yg ditentukan Tuhan.

Yg pilu kita tak boleh nampak lepas 50thn akan berdepan dgn manusia mem sdr? Kalau ini dapat di duga, tak mungkin nenek moyang kita setuju berkongsi. Nasib negara kalau tak ada persetujuan ini tak siapa yg tahu. Sdr boleh dapat belajar di Timur Tengah pun tak tentu!

>> Tak minta

Pendatang krn kehendak British dgn restu Tuhan. Banyak benda yg kita tak minta tapi diberi Tuhan.

>> Syukur dan benci

Teruskan sikap kebencian bangsa kalau ini hasil didikan ilmu dan agama. Kita belanja banyak wang bagi dia makan, minum, belajar di luar negara, ini ilmu yg terlekat padanya. Inilah manusia yg kita biayai pelajarannya dari hasil DEB. Ini hasil korban kaum lain?

>> Kiblat negara

Sdr kira tak berapa Melayu yg tak nak balik lepas di biayai pelajarannya. Bagi setiap Melayu ini, sepuluh pendatang bertungkus lumus kerja bayar cukai tanggung dia.

Dgn perangai sdr tak hairan pendatang berpatah cari perlindungan lain. You reap what you sow.

>> Buat jahat

Kaum lain punca Melayu tahu buat jahat? Ini fikiran cerdik pandai yg di hantar belajar di luar negara! Kalau ini ilmu yg nak ditimba, tak payah pergi negara Arab, masuk Umno saja. Baca tulisan dia dan faham kenapa DEB gagal selepas 50thn. Kita ambil kambing paksanya menguak!

>> Menyampah

Menyampah dgn orang yg duduk bawah sekatan DEB 40thn? Orang minta adil dan saksama (selepas 50thn menyumbang pada negara) melebihi, kamu dah dapat nikmatnya nak halau orang pula? Korban siapa memberi peluang. Gelagat siapa menyampah.

Salam Saudara (atau Saudari) Chapang

merujuk kepada kenyataan 3/ "Kalau dapat diulang semula sejarah , Demi ... kita tak patut bagi kerakyatan kepada bangsa pendatang..."

nak tanya sikit - dari mana datangnya Orang Melayu? LOL :-)

MELAYU ADALAH NAMA LAIN BAGI BANI JAWI.

1.Bani Jawi adalah nama yang diberikan bermula dari era Nabi Ibrahim menyunting seorang gadis misteri dari Timur Jauh.'Melayu' adalah perubahan pada nama kaum di mana gadis misteri itu berasal.Dalam manuskrip purba,ada tercatat perkataan dasar 'Mala'.Nama Mala inilah yang dibawa oleh kaum misteri dari Timur jauh itu.Ketika khabar tentang Mala sampai ke Tanah Kanaan,Madyan dan Parsi Kuno,nama 'Mala' ini berubah-ubah mengikut bangsa yang memanggil mereka.Orang-orang Assyria dan Media memanggil mereka sebagai 'Mala-Yu'.'Yu' adalah suffix dalam bahasa Avesta Purba (bahasa Avesta adalah asal-usul bahasa Sanskrit dan bahasa Jerman Kuno yang menjadi asas bahasa Inggeris/English itu berasal dari saduran yang 'agak teruk' dari Sanskrit sebab itu dari segi linguistiknya bahasa Inggeris terkelompok dalam keluarga bahasa Indo-European atau Indo-Iranian)

2.Bangsa Madyan (Media) yang mengasaskan bangsa Parsi (Iran pada hari ini) adalah berasal dari kaum Mada.Dalam istilah Assyrian dan Avesta,kaum ini dipanggil 'Mada-YU'.Dalam Sanskrit (ingat,bahawa Sanskrit dan Avesta ibarat bahasa/dialek Kedah dengan bahasa/dialek Kelantan),'Malayu' ini dipanggil 'Malaiyu' atau 'Malai'.'Malai' bermaksud 'gunung'.Manuskrip purba China menyebutnya sebagai 'Malai' atau Mo-lo-yue'.Dan orang Inggeris menyebutnya sebagai 'Malay'.Ini lidah mat saleh.Orang Perancis menyebut Malaysia sebagai 'Malaise',jadi jika hilang 's' itu atau hanya 'Malay' sahaja,mungkin pendekatan yang logik ialah 'Malai',sama seperti sebutan dalam Sanskrit.

3.'Mala' adalah nama asal kaum gadis misteri ini.Ia adalah nama kuno yang terahsia.

4. Keturunan Nabi Ibrahim a.s dengan gadis misteri tersebut ketika baginda berdakwah di Timur Jauh inilah digelar sebagai Bani Jawi. Dari enam anak hasil perkahwinan baginda dengan Siti Keturah, tiga orang telah dibawa oleh Nabi Ibrahim a.s ke Tanah Kanaan, manakala tiga yang lain ditinggalkan di 'Promised Land' bersama ibu mereka. Perlu diingat, ketika itu tiada kapal terbang, jadi apabila Nabi Ibrahim berdakwah ke Timur Jauh, sudah tentu memakan masa bertahun-tahun, dan perkahwinan dengan orang tempatan adalah perkara biasa bagi lelaki yang merantau; tidak kira apa tujuan mereka, tambahan lagi nabi Ibrahim adalah lelaki terhormat, bijaksana dan punya pekerti mulia.

5. Bani Jawi yang kini mewarisi apa yang dinamakan 'Indonesia', 'Malaysia' dan 'Brunei' adalah mereka yang dekat dengan 'induk' Bani Jawi. Mereka juga masih mempertahankan budaya, bahasa dan raja-raja mereka.

6. 'Bani Jawi', ini termasuklah semua kaum-kaum yang menggunakan bahasa yang mempunyai tatabahasa dan kemiripan di antara satu sama lain. Pakar-pakar linguistik menamakan bahasa-bahasa ini sebagai Malayo-Polynesia. Kaum-kaum ini berasal dari induk mereka yang misteri. Bani Jawi adalah satu kumpulan kaum-kaum yang menggunakan bahasa Malayo-Polynesia ini. Kaum-kaum ini yang dikesan menggunakan lingkungan bahasa ini terdapat di kawasan tasik di pedalaman Jepun, Taiwan, Asia Tenggara ('Homeland' Bani Jawi) ke timur mencapai pulau-pulau Pasifik seperti Hawaii, ke bawah mencapai pulau-pulau Papua, Solomon, New Zealand dan Fiji mendekati Australia (sebelum penjajah Inggeris tiba di sini, Australia diduduki oleh kaum aborigine Austronesian). Ke barat sehingga menjangkau Madagaskar berdekatan Benua Afrika. Selain dari Bani Jawi di sekitar Indonesia dan Malaysia, kebanyakan kaum-kaum Bani Jawi yang diluar lingkungan ini telah terasimilasi dengan teruk ketika penjajahan dan terputus dari warisan induk mereka. Di sini kita faham bahawa Bani Jawi yang menduduki Kepulauan Indonesia dan yang terdapat Malaysia adalah Bani Jawi yang berbeza, mereka adalah dari kelompok yang berjaya menjaga warisan moyang mereka, lebih bijak dan berfikiran luas. Bani Jawi di sini juga berjaya memegang tampuk pemerintahan politik dan berkuasa atas tanah-tanah mereka, tidak seperti yang terjadi kepada Bani Jawi yang lain terutama di Pasifik.

7. Inilah asal-usul 'Melayu' dari segi saintifik, sejarah dan akademik.

tadi ada menteri cadang dalam berita nak ubah hukuman kepada pemandu bas yang sebabkan kecederaan/kemalangan sehingga boleh denda maksimum RM500,000.00.... manakala bagi syarikat takde pindaan takut bantut kan perniagaan mereka...

memang la bodoh depa-depa ni....

undang-undang apa ni..

yang lemah dan miskin kena perah habis-habisan...

yang kuat dan kaya dilindungi....sampai mampus...

dan dah tentu driver bas tu rata-rata melayu..
gaji setakat RM 1500.00 sebulan..
mana nak cari RM 500,000.00 nak bayar denda...

maaf tun..
tapi saya memang tak dapat tahan lagi melihat kebodohan pemimpin kita.. yang dengan
bodohnya nak membodohkan rakyat...

kalau pun nak tunjuk kpi bagus..
bukan dengan cara macam ni....
saya nak tau la sangat-sangat..
cara kira kpi menteri ni sekadar kira bilangan pengumuman menteri dalam press conference saja
ka..
ka lagu mana..
lagi berita pasai voa..
untuk pelancong india....
yang 40 000 pun tak jumpa-jumpa lagi..
ni nak tambah berapa ramai lagi ni....
kalau imigresen nak cari yang hilang tu bukan susah sangat..
boleh dimulakan dengan restoran mamak..
sebab memang banyak yang dari india..
cuba pi buat operasi..
mana tau ada yang sangkut..
dan berita pasai pasir dah keluar tv....
johor siap bagi statistik lagi berapa lori yang keluar..
batu?....
singapura beli batu nak buat apa ya?..
tapi tetap ada syarikat yang jual silika ke singapura..
tak tau la tun..
rakyat memang dah makin meluat dah dengan bn..
nak sokong bn.. meluat..
nak sokong pembangkang memang mengarut..
tapi kalau bn memang tak reti-reti bahasa jugak memang ramai yang akan sokong pembangkang
walau tak rela...

hoi pemimpin bn dok leka ulit duit lagi ka..
bila nak sedar diri oii...

jaga diri tun....

What happen to Malaysia Gov nowadays.

Blind or Open Eye but can't see what's had happen infront even by corner of their eyes.

Lulus aja apa apa asalkan nama tak sama dengan nama dalam list bahan dilarang eksport. Jadi belasah jer RM.....penuh. Kan yang di eksport tu cuma silika setelah dikaburi dengan nama lain (kan tiada dalam list jadi tak salah atuk dia si penyangak dalam selimut)

1) Malaysian leaders are short thinkers. BETUL BETUL BETUL.....

2) Why are we still supporting Singapore when they are stabbing us from behind? TAK PA TAK PA TAK PA.....

3) I agree with your view that we should add value to the raw material rather than selling them just the raw. What are we gaining by just selling our natural resources? Just money but not knowledge.

MONEY MONEY MONEY IN THE RICH MAN WORLD.....(BUAT PA NAK SUSAH)

4) Those who sell the sand are betrayer to our country. We should revoke their citizenship.

TRACK WHO DID AND HUKUM.....TAPI JANGAN SEKADAR BEBERAPA

RENUNG & FIKIR

We sell sand to Singapore then we buy chips from them. (ORANG TENGAH BOLEH/DAPAT BUAT DUIT TAMBAHAN UNTUK URUSNIAGA)

We sell water to Singapore then we buy treated water from them. (SINGAPOREAN KATA MALAYSIA TAK PANDAI PROSES TAK DE TEKNOLOJI TERKINI KONON)

Why do we always sell cheap to Singapore then later on buy from them dengan harga yg mahal? (UMPAMA MASAKAN SENDIRI ATAU DI RUMAH TAK SEDAP TAPI MAKAN KAT LUAR LEBIH SEDAP WALAU PUN LEBIH MAHAL)

Dont we have adequate land, human resources & expertise to do everything here & sell to them the end product? (BUAT APA SUSAH SUSAH, DUIT JUAL "SILIKA" KAN ADA BELI AJE KALAU BELANJA PUN SETAKAT BEBERAPA RIBU..... BUKAN BANYAK DIA ORANG DAH BELASAH JUTA JUTA BARU 0.0000% JER TAK LUAK LAGI)

Sampai bila kita ni diperbodoh2kan oleh Singaporeans? (SAMPAI BILA BILA SELAGI TIADA KESEDARAN DIRI DIPERBODOH BODOH KAN)

To all that I ter cut and ter paste artical kengkawan I am sorry...

Tapi sampai bila kita nak menenggelamkan semenanjung Malaysia yang kita sayangi dek PENYAGAK dalam Negara sendiri.

Dearest Tun,

SILICA SAND IS JUST A TYPE OF SAND. In other words, silica sand is actually SAND.

Definitions:

What is silica?

“A chemical compound that is the main constituent of most of the Earth's rocks. Silica occurs naturally in five crystalline forms (quartz, tridymite, cristobalite, coesite, and stishovite), in a cryptocrystalline form (chalcedony), and in an amorphous form (opal). **It is also the main chemical compound in sand.** Silica is used to make glass, concrete, and other materials. Also called silicon dioxide. Chemical formula: SiO₂. “(Source: <http://www.thefreedictionary.com/silica>)

What is silica sand?

“**Silica sand is one of the most common varieties of sand found in the world.** It is used for a wide range of applications, and can be purchased from various suppliers throughout the world. Silica sand is used in industrial processing, to make glass, as fill, and to create molds and castings.”

Tun, yang peliknya, dalam Utusan, ada pula kenyataan-kenyataan yang membezakan pasir silika dengan dengan pasir. Pasir silika boleh pula diekspot sampai berlori-lori. Hebat betul kenyataan pegawai kastam di tambak Johor seperti dalam berita di bawah.

“JOHOR BAHRU 20 Jan. - Kesemua pasir yang diangkut dari Johor ke Singapura adalah pasir silika seperti yang dibenarkan oleh undang-undang untuk dieksport. Pengarah Kastam Johor, Datuk Md. Subre Ishak berkata, kenyataan yang menyatakan sebanyak 500 atau 700 buah lori mengangkut pasir itu setiap hari ke Singapura adalah tidak tepat.”

Kesian betul, jika ilmu kurang. Kononnya, PASIR SILIKA BUKAN PASIR BIASA...pasir silika ialah pasir LUAR BIASA...lucu sungguh.

*** May Allah SWT bless Tun & family ***

Assalamualaikum,

Yang bagi komen tentang isu pasir ni, ramai yang sengal, bagi komen tak relevan dengan tajuk, ikut suka hati engkau orang je apa nak tulis. Kalau nak tulis sangat apa je yang engkau suka, buat

blog sendiri, tak payah la nak menempel kat blog orang. Cuba la membincangkan perkara tu mengikut tajuknya.

Lagi satu, apasal ramai sangat yang memainkan isu perkauman? Jangan dimain mainkan perkara ni, apa nak diulang semula ke 13 mei? Nanti kalau terjadi semua orang susah, silap haribulan perang dunia ke-3 pun boleh tercetus. Nak berperang sangat ke wahai semua rakyat malaysia?

Ini lagi satu hal, kenapa dipersalahkan pemimpin pemimpin kita yang lepas lepas. Engkau orang ingat senang ke jadi perdana menteri ni? Cuba tanya tun dr mahathir, betapa amat susahnyanya bebanan jawatan itu. Apa yang berlaku dulu dah pun berlaku, tak perlu disesali dan tak perlu dimarahi. Buat umat islam, bukankah kita berkewajipan percaya kepada qada' dan qadar, maka redha la dengan segala apa yang berlaku. Menuding jari dan menyalahkan orang lain hanya memuaskan hati engkau orang sendiri je, sedangkan perkara yang berlaku itu sudah pun berlaku. Apa yang perlu kita lakukan, ambil iktibar daripada kesilapan silam untuk memacu negara kita ke arah yang lebih baik.

Dan satu lagi, tentang UMNO, tak payah la sape sape pertikaikan apa yang berlaku baik di dalam atau di luar parti itu. Ini politik la, kalau tak kotor tak politik la namanya. Engkau orang cari mana satu parti politik yang suci sesuci sucinya, bawak mai sini tunjuk kat aku, dalam PAS pun ada 'cah keting' bak kata tuan guru nik aziz.

Dan yang ini khusus buat rarunasalam @ ravi, jangan engkau sesekali menanyakan lagi soalan itu. Engkau tak sekolah ke? Tak belajar sejarah? Orang melayu penduduk asal persekutuan tanah melayu ini. Jangan engkau pertikaikan itu, cari maut tu. Kaum cina dibawa masuk oleh british untuk menjadi kuli di lombong bijih timah. Begitu juga kaum india, di bawa masuk oleh british untuk menjadi kuli di ladang getah. Kalau tidak kerana nenek moyang engkau ke sini dulu, bukan rakyat sini engkau ni. Demi untuk merealisasikan impian 'MERDEKA', maka pemimpin melayu pada waktu itu diberikan garis panduan oleh pihak british tentang syarat syarat yang sehingga membolehkan tanah melayu mendapat kemerdekaan daripada british, yang antara syarat itu ialah semua orang dalam persekutuan tanah melayu harus hidup bersama, maka oleh kerana yang demikian la tidak diusir imigran yang dibawa masuk oleh british. Tak perlu la sesiapa mengungkit hal yang dah lebih 50 tahun berlaku. Kesilapan yang lepas biar la ia menjadi kesilapan yang lepas. Orang melayu tetap akan merajai persekutuan tanah melayu ini, sampai akhir zaman, ini kontrak sosial dan etika yang perlu dipatuhi dan ditaati, oleh setiap warga malaysia, engkau orang semua faham tak?

Wabillahitaufik wal hidayah, wassalamualaikum warahmatullahi wabarakatuh.

salam tun,

saya membalas apa yang saya baca didalam komen bagi tajuk ini.

saya tak marah, tapi sekiranya saya komen dan boleh dianggap tidak sayang lagi pada umno dan bn, diatas apa sebab?.jangan salah anggap membari komen adalah untuk kemajuan. kalau adik beradik saudara telah diberi biasiswa untuk belajar itu adalah kerana pencapaian saudara. let just say u fail, u still have to pay...right?then it will be another situation!. what do you think will happen if the opposition site gave you and your sibling the money to go abroad and study? kami sayang kan umno dan bn...tetapi apa yang sedang berlaku telah menyebabkan kami hilang kepercayaan. one good deed are not to cover bad one...it is just simply a good deed.

maybe it is a good time for someone new to lead and guide us...because we really in need of a truly good leader especially in the current economics situation
don't be mad people...i'm just giving an opinion!!!

Seperti biasa la Tun, mesti ada gunting dalam lipatan, menjual hasil negara untuk kepentingan poket masing2..apa nk diherankan kalau maruah negara tergadai sekalipun, apa yang penting duit poket cukup tanggung anak menantu cucu sampai 7 keturunan...

Siapa makan cili terasa pedas, pihak berkenaan harus mencari dalang sehingga ke akar umbi, jangan biarkan sikap sebegini terus membusuk dalam masyarakat, ambil kesempatan yang ada membuat perubahan.

Berani kerana benar takut kerana salah.

Semoga Tun dalam keadaan sihat hendaknya.

Tun,
Saya berharap atas sokongan dan kuasa yg ada ,BPR,Menteri haraplah tumpukan keadilan di JOHOR.Kita sering pertikaikan nasib Palestine,Dunia Luar,sedangkan Tanah,Pasir JOHOR bukan saja di Rompak,malah mereka membangunkan Johor seolah milik mereka.

Perhatikan di Taman Molek,Pasir Gudang,Skudai,Senai dan banyak lagi seolah Johor bukan milik kita.

Harap kerajasaan rakyat bersuara,sampaikan pada media tentang apa jua yg kelihatan tak senang,apa jua pun,
supaya kelihatan.Kerajaan perlu bertindak keras,jangan menyepi nanti nangis tak berlagu,tak guna.

Tanah Melayu kan nama sebelum Malaysia..Tanah Melayu pun di tengah rumpun melayu. Indonesia, Thailand, Brunei, Phillipine. Itu sebab perkataan Nasi = rice juga difahami by those phillipines. They also using the word "pulut" which I'm quite suprised..

Ayahanada Tun,

Ha..ha..ha.. he is lucu.... and comel.. and now he only realised our Mother Slogan of Rukun Negara, Malaysia.

//By pakbelalang on January 21, 2010 1:41 AM//

Abg pakbelalang,

Mother Slogan is our Rukun Negara, Malaysia. But our politicians tend to forget this Mother Slogan when they have climbed to the top. Once they forgot, they would ..plunge to ground zero Our PM can create any sub-slogan(s) that he wants in order to keep up with the trend (arus) of the world.

1. What is Middle Malaysia? Future Malaysia in year 5010.
2. What is Malaysian Malaysia? Past Malaysia in 1965.
3. What is ONE MALAYSIA? Current 1 Malaysia moving toward 1 CLIMATE, ONE WORLD.
4. What is "rakyat didahulukan, pencapaian diutamakan"? Well, if you want to know what this meant, refer to our YB Tsu Khooon and Idris Jala on Rukun Tetangga, one of the proven best method in the 70's whereby all Malaysians fought against "pencurian and kekacauan", lu lupa ke?
5. What is Islam Hadhari? Air Asia.....
6. What is Berseh, Cekap, Amanah? Toyota Pius, top sales in the world.
7. What is Gemilang, cemerlang dan terbilang? Kerana slogan ini, BN hilang kerusi 2/3 majoriti kerana "Ketuanan Melayu" telah disalah gunakan selepas Malaysia menutupkan ekonominya.

What? What? What? These can be the brand names Wira, Myvi, Kia, Naza, Sony Erickson, Panasonic, Elba, Nescafe 3 in 1, Power Root Coffee with Tongkat Ali, Coca Cola, Guess, Republic Banana, Gucci, Pucci, LV macam2 lagi

//It is all rubbish !!!//

This is the trend (fashion or taste), and rubbish..... may turn into wealth if we know the technique.

Take care Ayahanda Tun.

P/S: abg samuraimelayu, kini DAP is De-KitSiang-kan, PKR is De-Anwar-kan, PAS is De-NikAziz-kan so that PR can create a middle platform means neither here nor there, or we can term it as hanging in the air. If the politicians are wise, smart, civilised and matured, they should have learned to complement one another to come out with 1 best approach in developing Malaysia due to limited resources or scarcity..... Though it's late, it's better than never....

By Alan  on [January 21, 2010 6:12 PM](#)

Tun, for once of a few occasions you are on the right track. You are highlighting international issues that are non-racial.

Singapore is a such a small country and has no resources except for money and manpower. They raise their ppl to excellence through meritocracy and acquire more intelligent ppl especially from Malaysia by 'advertising' many multinational companies based there. The leftovers, still more but comparatively less intelligent ones, remain in Malaysia. Like any parents, we wish our children

to excel and work in a non-discriminatory, happy and advanced environment. Educated and young graduates wld try to work in a large well-run corporation, hoping to bring their experience back home. Malaysia does not exhibit such environment as many of their own citizen are discriminated against or in-fighting. These things take away the real focus of things.

Your highlighted issue would not take front stage, like illicit drugs that affect all races. Because in the so many issues you have written, many have racial tones, blaming this race and that race when basically we are of one race - human race. Like you said, it was not constructive at all. This impedes our forward growth. If you look at longer term and be critical yet liberal view, our half-decade of independence still has not driven us to 'adult-like' thinking. All politicians still think we are like 'little kids' and require smothering. We are always warn to 'do this or else you are in trouble or ISA thrown at you'.

Back to this issue you have highlighted, Singaporeans are 'stealing' sand from us legally or illegally but it is our resource and our 'treasure'. If only we have been less distracted by arguing over petty issues at hand (examples are race and Allah etc) and looking at more important issues, we can all demonstrate to the Government tht this 'theft' be stopped. But then again, we are stopped by no-gatherings-allowed' to voice our opinion.

These are our impediments. We cannot move forward and we cannot voice out aloud to the right authorities. I hope what I mention here wld open up yr perspective a bit, if not at all.

I believe he has studied Malaysian History only since 1980 and not before that, where the contribution of the so called "Pendatang" towards the infrastructure,economy, finance, commodities ie Rubber, tin,palm oil gave the foundation of the Malaysian Economy today. I would advise him to read the proper Malaysian History for the past 100 years. Janglah bak kacang lupakan kulit.

ravi ravi..

masih tak faham2 lagi kedudukan bangsa melayu di tanah melayu.

kami ada raja kami sendiri,siapa pulak raja pendatang2 drp kaum2 lain? kami pernah dijajah.. dan penjajah lah yang membawa bangsa asing ke tanah melayu.

bukan kami hendak mengungkit tapi ravi masih tak faham sejarah atau buat2 tak faham.ravi masih mempersoalkan kedudukan org2 melayu. saya tak heran. bangsa lain yang melawat tanah melayu dan hilang tanpa dikesan oleh immigration officer akan mempunyai pendapat yang sama macam ravi jugak kalau sudah beranak pinak disini. mereka tak perlu tukar nama, tak perlu cakap melayu dan tak perlu pun berkawan dgn org2 melayu.. peduli apa bangsa melayu? kan?

memang kami akui ramai diantara kami berhijrah drp tempat2 lain. tapi bukankah tempat2 itu dinamakan gugusan kepulauan melayu? alah ravi senang jer kalau ravi nak faham.. macam org india dari chennai berhijrah ke delhi lah lebih kurang. bagaimanapun yg menyedihkan akhirnya kami dipisah2kan oleh penjajah kristian dgn membahagi2kan kepulauan tersebut sesuka hati mereka.

oh yer ..ravi mungkin tak tahu yg filipina dulu mempunyai raja melayu islam dimanila. tak silap saya namanya sultan sulaiman.

udah ravi yer...jgn ungkit2 lagi ttg melayu ni kerana kami malu nak menerangkan kpd ravi takut2 ravi kecil hati... begitulah sifat org2 kami org melayu.. lebih jaga hati org drp hati sendiri....hmmmmmmmmmm

Salam semua,

Just nak bagi pendapat.

Kenapa kite tgk zaman skarang ni, ramai sgt orang nak condemn orang lain. Just tgk saje dalam comment2 nih. Semua orang nak condemn orang lain je keje. Macam dah takder keje lain je. Kite toksah cakapla pasal bangsa Melayu dok condemn bangsa lain, semua pun sama je! Bende nih mmg berlaku kat maner2. Usah cakap Malaysia, Singapore, sama je! Manusia nih mmg dilahirkan dengan hasat dengki. Tak boleh tgk orang hidup senang, regardless of how he got to hidup senang.

Kalau dier pelacur, kite nak marah. Kalau dier buat MLM, kite nak marah, politician pon orang nak marah, uztaz pun ader jugak orang nak marah! Memang betul, kita sama2 orang Muslim kene saling ingat mengingati. Tapi sedarlah, diri kite sendiri tak betul, macam maner kite nak expect orang nak dengar cakap kite? Bukan nak cakap yang kite tak boleh nak tegur, tapi ingatlah sikit, rezeki masing2.

Kalau rezeki dier atas mengajar, mengajarlah jawabnye. Kalau rezeki atas politik, politiklah jawabnye. Halal dan Haram tu kerja Allah, janganlah dok pikir pasal orang lain sampai diri sendiri tak pernah nak betulkan.

Sorry for the language, as i a modern guy with my own way of talking/writing.

Assalamulaikum,

Tun dan Isteri serta semua saudara Islam,

Segala Puji bagi Allah, Tuhan Sekelian Alam.

Menyentuh dan berbicara mengenai kemelut didalam pentadbiran Kerajaan Malaysia berhubung berbagai ISU yang jelas telah mencemarkan pentadbiran kerajaan sekarang. Sebenarnya rakyat MUAL melihat suasana apa yang sedang dihadapi sekarang. Dengan banyak permasalahan yang berbangkit berkenaan seperti,

1. Rasuah, Mencuri serta menyalahgunakan Harta Kerajaan.
2. Menyalahguna KUASA dan ada sebahagian Wakil-Wakil Rakyat di PARLIMEN yang mempunyai sikap lebih teruk daripada sikap pemandu TEKSI dan pekerja bawahan.
3. SOMBONG dan MEGAH dan tidak membantu rakyat bawahan.
4. Berebut kuasa untuk mengumpul HARTA KARUN (supaya apabila MATI boleh dibawa bersama bagi membeli "KAYU API").
5. Tidak ADIL dan pilih KASIH dalam semua urusan.
6. SINGKIR dan BUANG pemimpin yang memberi masalah kepada kerajaan serta rakyat dan bawa ke pengadilan jika didapati salah.

Bagi mengatasi semua pemasalahan ini, kami RAKYAT Malaysia menyeru sewaktu pemilihan pemimpin berilah KAMI yang benar-benar pemimpin yang beriman. Kami yakin dikalangan ahli UMNO dan parti lain ada pemimpin sebegini.

Dato' Seri Najib mesti bertindak TEGAS dan BERANI supaya rakyat berasa selamat dan terpelihara.

Amin.

salam YABhg Tun,

Nampaknya isu pasir yang Tun bangkitkan telah trigger banyak isu-isu lain yang diutarakan oleh pembaca blog Tun. Seperti biasalah tu.

Saya pun samalah macam yang lain-lain, cuma saya tak bercadang nak tambah apa2 dah.

Kesimpulannya mudah je pada saya Tun. Ramai yang dah menyampah, meluat, muak dengan keadaan negara sekarang yang takde hala tuju.

yang parti memerintah tak boleh nak diharap. Kononnya nak berubahlah, rasa denyut nadi rakyatlah, apalah. tapi lagu tuuuuu jugak.

yang parti pembangkang pulak, dok kerja banggggggkangggg jelah. bagi memerintah tak nampak lainnya pulak. alasan, baru memerintah. sibuk dengan modal kata rakyat nak tu rakyat nak ni, rakyat sapa? yang mana?

semua gila kuasa dan memperjuangkan agenda sendiri bukan agenda untuk rakyat.

sekian sajalah, lagi banyak tulis lagi banyak merapu sebab amarah yang teramat sangat membeku di kalbu.

Assallammualaikum warah matullah hiwaba ro katuh..

Semoga di izinkan Tun..Terima kasih..

I thought to let it go but maybe the time have come to penned my thought on **desensitization**..

First let follows the daily life stories of two commmuters through a small town.Abdul the lorry driver and Dollah the teacher.

As a lorry driver, Abdul know the need to keep to the speed limit.Initially he observes this.But if you care to knows..It is difficult for a lorry to maintain alternative speed.If you are on speed of 90km/hour and have to slow down again when approaching city limit and hospital at 60km/hour and pick up speed again after,you will find this is **taxing**..

Not only it is taxing to the body..It is taxing to mind.To be able to follow rules,one need to have discipline..In Abdul case or any other's, one might be tempted to ignore the speed limit when nobody enforce it like the police or JPJ..Hence Abdul can maintain speed limit of 90 km/hour in going through places that he finds it taxing to maintain..to obey the rules and regulation..

So..if he keeps violating the speed limit, he actualy ignores his own conscience..What the heck?..If I don't get involves in accident..what is the problem?..We call this **desensitization to his own conscience**..

Likewise Dollah in the first place always maintain his discipline..But as times goes by,he finds it more and more difficult to wakes up early in the morning to be able to drives within the speed limit.To compensate to be able to punch the clock he speeds and no longer observes the speed limit..Hence another case of **desensitization**..

Actually..what it is all about?..When you did not cares about other people factor's in your lives and only cares for your own..the other's might do the same towards you..

Consequently we have people who does not cares..They speed in the middle of crossing school children hoping and expecting other's will make ways for them..In short..they demand the world must orbited around them..and not the other way around..

So..When we have lacked people cares for each other..what do we have?

That is banality. When reality does not come checking and bring the rude awakening..people will want to maintain their attitudes which might be lacking in social contract values..

There..the vicious cycle of banality keeps turning..And that is what we have in society today..

Sand to Singapore?..What do I care ? UMNO wants to die in his own dug grave?..What is that got something to do with me? Barisan Alternative won PRU 13 and starts calling American to gives them political adviser..so..hey..do I gets something from this..? Allah name is abused..So..I cannot "cari makan"?

It will always come to the individual values..I will not care if Japanese rules the country..Kempetai wants informations..I will give them..If I don't..I can and will implicate others..As long as I have the usual supply of rice..Anybody can call me traitor..My stomach and children's stomach cannot eat on rhetoric's!!

So..If politician wants to be righteous, they must provide and feed the basic need of it's people..Unfortunately..lives values are corroding and erode..

In this regards I must thank Tun that educated us this folly..Life is not just brisk walk on the park..but braving the stormy road ahead and must be able to understand the vicious robber's and thief along the way..Be compassionate to tramps and vagabond..We could end like them..So we care other because we care about our own survival..

For those who caught up in those vicious cycle of banality try to enjoy this song from Linkin Park..

"Numb"

I'm tired of being what you want me to be
Feeling so faithless lost under the surface
Don't know what you're expecting of me
Put under the pressure of walking in your shoes
(Caught in the undertow just caught in the undertow)
Every step that I take is another mistake to you
(Caught in the undertow just caught in the undertow)

[Chorus]

I've become so numb I can't feel you there
Become so tired so much more aware
I'm becoming this all I want to do
Is be more like me and be less like you

Can't you see that you're smothering me
Holding too tightly afraid to lose control
Cause everything that you thought I would be
Has fallen apart right in front of you
(Caught in the undertow just caught in the undertow)
Every step that I take is another mistake to you

(Caught in the undertow just caught in the undertow)
And every second I waste is more than I can take

[Chorus]
I've become so numb I can't feel you there
Become so tired so much more aware
I'm becoming this all I want to do
Is be more like me and be less like you

And I know
I may end up failing too
But I know
You were just like me with someone disappointed in you

[Chorus]
I've become so numb I can't feel you there
Become so tired so much more aware
I'm becoming this all I want to do
Is be more like me and be less like you

[Chorus]
I've become so numb I can't feel you there
I'm tired of being what you want me to be
I've become so numb I can't feel you there
I'm tired of being what you want me to be

Couple this with Kenshin Himura Battousai..you will find it poignant..

Ribuan terima kasih Tun..

Saya tak heran sangat dgn tangkapan yg dibuat. Kalau kena denda pun nanti berapa sen sangat la. Lepas tu kes senyap jer. Entah la apa nak jadi kat Malaysia sekarang ni. Makin lama makin teruk.. rasuah bermaharajalela.. ekonomi tak berkembang. Penguatkuasaan begitu teruk.

Apa kata kita ikut saja seperti di China.. buat salah yg melibatkan kepentingan umum dan membawa malu kepada negara dihukum tembak saja. Saya tgg pemandu teksi di Beijing pun tak berani nak menipu. Kemana kita hendak pergi semua dengan resit dan tiada sebarang alasan.

Kami dah bosan dengan kepimpinan baru yg begitu teruk. Jangan la setakat kasi gula gula sahaja tapi harga barang tak henti henti naik. Nak sokong pembangkang pulak.. lagi la teruk..

Begitu banyak isu panas yg tak terkawal. Yg didakwa bukan pihak yg menjadikan punca isu Allah tapi orang2 yg memberontak. Datuk Nazri boleh tak diam sahaja. Jaga la anak sendiri yg perangai pun tak senonoh.

I HATE MALAYSIA GOVERNMENT.

Dr M.. I missed ur leadership.

YANG SENTIASA DI-BERKATI DAN DI-RAHMATI ALLAH AZZA WA JALA
TUN DR. MAHATHIR YANG SAYA KASIHI SERTA HORMATI.

TUN, SEDIKIT TENTANG PASIR SILICA DARI RUJUKAN YANG TELAH SAYA
DAPATKAN UNTUK TATAPAN PEMBACA SEMUA.

Sand is the general term for broken down granules of minerals or rocks, technically between about one-sixteenth of a millimeter to two millimeters in diameter, falling between silt and gravel in the spectrum of sizes. There are many varieties of sand in the world, each with their own unique composition and qualities. The white sandy beaches of iconic tropical destinations, for example, are made up primarily of limestone that has been broken down, while many black sands are either volcanic in origin or contain magnetite. Other sands have high levels of iron in them, and so are rich and yellow in color.

The most common mineral in the Earth's continental crust is quartz, and most silica sand is made up of broken down quartz crystals. Silica is another name for silicon dioxide, SiO₂, of which quartz is a specific latticed structure. So silica sand is quartz that over the years, through the work of water and wind, has been broken down into tiny granules. These granules can be used for many different purposes, and can be found in most non-tropical regions of the world.

Silica sand is used throughout the world, and in so many different ways it is hard to imagine a world without it. From water filtration, to glass manufacture, to industrial casting, to sand blasting, to producing concrete, to adding texture to slick roads, silica sand impacts every aspect of daily life. Many industrial suppliers carry silica sand in bulk quantities, while some smaller household stores sell it in smaller amounts for home or home construction use. One of the major uses of silica sand in the modern world is as an ingredient in industrial concrete. Silica sand produces the bulk of a great deal of concrete, although some concrete bypasses its use for safety and strength reasons. At industrial scales, silica sand can cost less than \$0.50 US Dollars (USD) per pound, while the consumer rate is around \$1.50 USD per pound.

Hairan mengapa pihak berkuasa tidak mengambil tindakan sedang perkara berlaku di depan mata. Nak kena tunggu orang awam buat laporan baru ambil tindakan. Bukankah di setiap jabatan ini ada unit perisikan mereka sendiri? Jika tidak boleh berfungsi, tutup sahajalah unit tersebut. Pegawai kastam dan imigresen di check points dah kekenyangan agaknya. Bagaimana dengan rasional pengeluaran lesen melombong dan menjual pasir di dalam negara kita? Logik ke kalau sebuah syarikat di pantai barat semenanjung diberi lesen berkenaan untuk dibekalkan ke pantai timur semenanjung pula. Di sebelah sana tidak adakah syarikat berlesen

melombong pasir? Penghantaran pula melalui jalan laut (barge) dan perlu melalui Selat Singapura untuk ke seberang sana. Tambah pelik lagi, syarikat melombong pasir dari pantai timur pun bekalkan pasir kepada pembeli di sebelah pantai barat, juga hantar melalui jalan laut! Tak bolehkah hantar pasir-pasir ini dengan lori, guna jalan darat sahaja? Siapa yang tentukan barge bawa pasir tadi benar-benar sampai ke destinasi? Kalau 1 dari setiap 5 barge ini singgah di Singapura siapa yang tahu?

Kelemahan kita dalam menguatkuasakan undang-undang serta prosedur sudah menjadi bahan jenaka sedunia. Di Malaysia semuanya BOLEH...

Selling sand is not a crime.

Sand is not like cigarettes, alcohol can kill. Sand is a fill material. Ban the sale of sand to Singapore was decided by Mahathir because he hated the guts of Lee Kuan Yew. On a one-to-one battle of wit, LKY and Mahathir may draw. Unfortunately, Mahathir did not have a team calibre of LKY's evolved from meritocracy. So Mahathir used strong arm tactics to force Singapore into submission. This will not work. There are many other sources. This whole wayang on sand is to eliminate Pakatan Rakyat MPs.

Assalamualaikum Tun

Saya adalah peminat setia Tun. Komen Tun adalah komen membina. Tetapi sebahagian yang memberi komen saya rasa tidak begitu waras dan tidak rational. Asal Tun komen sahaja mereka buat andaian itu mesti salah UMNO. Asal terlibat saja orang kerajaan mesti salah UMNO.

Apakah semua kakitangan kerajaan yang bersubahat tu orang UMNO?. Cuba buat tinjauan ke pejabat-pejabat kerajaan tak kiralah kastam ke, pejabat Pos ke, tentera ke atau jabatan lain. Adakah semuanya penyokong UMNO yang menjadi kakitangannya. President CEUPEC sendiri mungkin penyokong pembangkang.

Yang jahat itu adalah manusia. Tak kira ahli parti mana. Bagaimana dengan krisis rasuah dalam kerajaan Kelantan. Adakah perbuatan orang UMNO. Maka yang di tegur oleh Tun tersebut adalah culprit dikalangan kakitangan kerajaan. Bukan UMNO. Apa baik sangat ke orang PAS, PKR, DAP dan lain-lain ahli pembangkang dalam kerajaan?.

refer to Sun Tzu strategies...

"If a general regards his men as infants, then they will march with him into the deepest valleys. He treats them as his own beloved sons and they will stand by him unto death. If, however, a general is indulgent toward his men but cannot employ them, cherishes them but cannot command them or inflict punishment on them when they violate the regulations, then they may be compared to spoiled children and are useless for any practical purpose."

Maybe Malaysia will be same as Maldives one day...coz sand one of material that resolves the wave from sea....

Pasal Pasir ke Negeri Jiran adalah cerita lama, bukan tu je, pihak kerajaan perlu lihat barang barang kawalan:- macam beras, gula dan minyak makan yang dibawa keluar dari JOHOR BAHRU, bayangkan berada buah kereta mereka yang masuk dalam sehari? ini belum termasuk hari minggu dan cuti umum. Belum kira lagi minyak kereta, berapa banyak kerjaan rugi? jangan lihat Negara Jiran di Utara sahaja.

i think the character (ie. Tun) should be changed in order to make Malaysia move forward ... day and night blame others for own failure is not a good idea ...

Did Singapore pointing a gun to Malaysia to force us to sell sand to them? The answer should be No ... so who's fault? then you will say is Abdullah's fault

Did Abdullah pointing a gun to force Tun to choose him as the prime minister? The answer should be No also ...

If the entire citizen of Malaysia inherit the character always blame others for own failure ... i guess everyone will pointing to Tun for this sand issue ...

Good morning Ayahanda Tun,

May I....,

Typical example Melayu bukan Ahli Politik .. Kelabu ASAP

Hello sdr chapang,

.....By Malay "chapang" on January 20, 2010 9:45 PM..

Hang tulis apa ini?? Hang ini macam orang "ancient", hang tak pernah belajar sejarah Tanah Melayu di Sekolah Kebangsaan Malaysia ke??

//1-Kenapa Tun Rahman begitu mudah bagi kerakyatan kepada kaum pendatang??//

Kalau tak tahu, hang refer back to Sejarah Malaysia Tingkatan 3, 4, & 5 dan Pengajaran AM, Malaysia lah. It's Tunku Abdul Rahman, not Tun Rahman.....

//2-Pernahkah kita minta mereka datang ke Tanah Melayu??//

Kalu soalan ini hang tulis dalam Facebook dan Twitter, pasti hang akan dapat worst feedback in Malaysia. Ini zamam 1 Dunia, zaman 1 Malaysia, bukan zaman 1 Tanah Melayu.

//3-saya amat berterima kasih kerana dibawah pemerintahan UMNO saya dapat belajar ke Timur Tengah, dan jika ditanya kebanyakan golongan yang berpendidikan saya rasa ramai yang amat kesal dengan apa yang Tunku buat dulu . Kalau dapat diulang semula sejarah , Demi Allah kita tak patut bagi kerakyatan kepada bangsa pendatang.//

Itu lah sebabnya mengapa UMNO lemah kerana orang2 Melayu macam hang yang dapat belajar ke Timur Tengah, tetapi malas nak ambil tahu apakah yang sedang berlaku di dunia. Kalu dapat diulang, UMNO akan lemah jugak kerana sikap orang Melayu macam hang ini.

//4-Kepada bangsa asing dan pendatang tu sedarlah, walaupun kamu pakai pasport malaysia tapi dihati kamu masih berkiblat negara asal kamu. so what if kamu tak datang ke Tanah Melayu orang Melayu tak tahu nak buat semua apa yang kamu buat????????????????????????????????????//

Kalau hang selalu panggil orang bukan Melayu ini bangsa asing dan pendatang, orang Melayu ancient macam hang ini pasti akan digulung pada satu hari nanti oleh Malays sendiri. Salah bangsa asing dan pendatang?

//5- Tun, perasaan tak puas hati dan meyampah kepada bangsa asing diMalaysia ne memang dah lama dan saya rasa if tanya semua orang Melayu 90% akan setuju dan meyampah dengan gelagat bukan Melayu sekarang.//

Hang jangan tipu dan fitnah bangsa asing dan pendatang bangsa Malaysia. Hang adalah satu penyebab mengapa orang Melayu lemah pada hari ini. Ini kerana hang suka main silap mata isu perkauman kerana hang tarak faham kaum dan bangsa. Kini, Wikipedia Malaysia kata Kaum Melayu hanya mempunyai 52% saja daripada jumlah penduduk di seluruh Malaysia termasuk Sabah dan Sarawak.

//6-Tetapi bagi saya , kesemua itu adalah salah kita jugak.Kenapa kita mudah bagi kerakyatan??//

Bukan salah sdr chapang orang Melayu, kesalahan ini dibuat secara tidak sengaja oleh semua kaum berbangsa Malaysia di 1 Malaysia. Possible"kan" semua kaum di bawah 1 Bangsa Malaysia, impossible"kan" kaum2 opportunitis yang cuma memainkan isu2 berbau kaum seperti sdr chapang ini. Hang janganlah ingat 1 Malaysians ini Ngok.

//7-Kenapa kita malas dan tak kuasai banyak ilmu????????????????????//

Melayu naik cepat kerana ..Clause Ketuanan Melayu telah salah diggunakan oleh Malays.

//8- kehancuran dan binasa masyarakat Melayu, sosial, ekonomi dan politik orang Melayu ialah pada Zaman pemerintahan Abdullah Badawi, kerosakan yang dia buat akan ambil masa yang lama untuk dipulihkan . itu pun jika dapat. akan tercatat dlm sejarah Malaysia perdana menteri yang tak tahu apa yang dia sendiri cakap, melalut tak pasal pasal, tak ada vision dan dasar, pentingkan diri dan keluarga dan tak ada kebolehan langsung.Anak cucu cicit kita akan kenang semua tu.//

Yang hanya kenang kesalahan Pak Lah adalah orang Melayu ancient (conservative and hard-nose) macam hang ini, bukan salah orang asing, pendatang Malaysia dan Malays.

//Keadaan Malaysia sekarang ni amat teruk sekali, jgn nak tipu rakyat yang semuanya okay. Banyak masalah belum selesai dan satu saja pesan saya kat Dato Najib.Nasib Dato akan sama seperti Pak lah jika Dato' tak sensitif dan peka kepada persekitaran dan cara orang Melayu. Dolah Badawi jatuh kerana menantu dan keluarga dan jangan sampai Dato najib jatuh kerana Bini dia. It's seem funny and joking but it's true.//

Kalau PM Najib peka hanya kepada kehendak 1 Melayu macam hang, then it will be better off for PM Najib to be the President for UMNO. Mentaliti hang ini memang problem lah kerana sikap .. "Ketuanan Melayu" tidak mengikut akta2 dan constitution Malaysia, our so-called Malay Studies graduates, hang dari universiti mana?

//Tak banyak orang mau cakap begini tapi saya rasa lebih baik kita luahkan supaya jadi peringatan.

Jangan sampai orang menyampah bila asyik2 tengok Bini PM keluar TV and entah mcm mana kenas bagi 100 juta untuk PERMATA!!!!!!!!!!!!!!!!!!!!//

Hang tak pernah baca women magazine ke? Stail penerbit2 majalah macam ini memang dapat jual majalah2 mereka dengan "show off" pakaian bini VVIP, hang tak tahu ke apakah kehendak wanita2 Malaysia kita ini ke?

//Ingat!!! niat mungkin baik tapi bila masa dan keadaan tak sesuai untuk dilaksanakan maka keburukan akan kelihatan.Masalah pemimipin sekarang ne, kuat sangat kelabu asap sebab

mereka fikir rakyat tak tahu dan terfikir dan analisa apa tindakan mereka. Itulah kesilapan dan kebodohan paling besar//

Kesilapan yang paling besar adalah rakyat2 kita sendiri kerana bersikap .. Ketuanan Melayu Bila hang buat macam ini, kaum lain bangsa Malaysia pun ikut Ketuanan Mereka sendiri ..lah Nak salah siapa lagi??? Biasa lah.. sikap lampusuluh di bawah tempurung kita ini yang tidak akan mengakui kelemahan mereka.

Take care Ayahanda Tun.

P/S: Hi to you, S..Tan and Gong Xi Fa Cai.

Tun,

Begitulah keadaan malaysia sekarang.bukan semakin elok tapi kui(makin) merosot,rosak,celaru dan gawat.

2. begitulah suratan malaysia hari ini.janji ianya melayu,boleh jadi PM,ketua pengarah dan sebagainya.Kebolehan dan kemampuan tak jadi hal.ad sokongan boleh naik.Tak kira macamana cara nak dapat sokongan,asalkan orang sokong sudahlah.

3. Kebelakangan ini kita mendapat ketua kerajaan baru.Hadhari dan 1Malaysia.Saya tak rasa satupun peningkatan atau semakin baik keadaannya jika dibandingkan yang terdahulu.Apa bidang pun serupa saja kecuali peningkatan dalam kesempitan hidup.

4. Pemimpin2 begini biasanya dari kalangan yang tiada kecenderungan atau 'Minat Membaca'.Padahal pada rakyat disuruh tanam minat rajin membaca.Nampak akan sedikitnya ilmu yang mereka ada.Banyak keputusan2 yang mereka buat memeningkan kepala ramai orang.Singapura hanya mengambil peluang atas jahil dan tamaknya ketua-ketua yang dijaja sebagai pejuang melayu dan pemimpin negara membangun contoh.Adoi malunya kita.....

5.Hal pasir dan Singapura adalah hasih kebolehan pemimpin kita hari ini.Kebolehan dalam urusniaga antarabangsa.Nampak ada juga kemajuan kerana sebelum ini kerajaan telah berniaga dengan rakyat bagi mengisi tabung kewangan negara dan tabung individu tertentu.Semuanya kita dapat maklumat melalui media raya sekarang.Akhbar,tv,internet dan keluhan orang ramai.

6.Harap Tun dapat ikhtiar merubah sedikit keadaan.

Sorry Tun, I want to divert on something else. I had commented on the issue of sand earlier. Now I want to touch on slogan:-

What is Middle Malaysia?

What is Malaysian Malaysia?

What is ONE MALAYSIA?

What is "rakyat didahulukan, pencapaian diutamakan"?

What is Islam Hadhari?

What is Berseh, Cekap, Amanah?

What is Gemilang, cemerlang dan terbilang?

What? What? What?

It is all rubbish !!

Do we realise that the mother of all slogans is still the RUKUNEGARA. We need just that, period.

Why don't we just stick to it and move forward and together make our country safe and prosper.

The Rukunegara is a national slogan or philosophy which had been painfully crafted after the May 13.

If you were to reflect, why do we really need all kinds political slogans which at the end of the day will only confuse the rakyat?Gross stupidity!!!

The rakyat have already declared the following national philosophy as the one and only that stands which is very clear and concise.

BAHAWASANYA NEGARA KITA MALAYSIA mendukung cita-cita hendak :

mencapai perpaduan yang lebih erat di kalangan seluruh masyarakatnya ;
memelihara satu cara hidup demokratik ;
mencipta satu masyarakat adil di mana kemakmuran Negara akan dapat dinikmati bersama secara adil dan saksama ;
menjamin satu cara liberal terhadap tradisi-tradisi kebudayaannya yang kaya dan berbagai corak ; dan
membina satu masyarakat progresif yang akan menggunakan sains dan teknologi moden.
MAKA KAMI, rakyat Malaysia, berikrar akan menumpukan seluruh tenaga dan usaha kami untuk mencapai cita-cita tersebut berdasarkan atas prinsip-prinsip yang berikut :

KEPERCAYAAN KEPADA TUHAN
KESETIAAN KEPADA RAJA DAN NEGARA
KELUHURAN PERLEMBAGAAN
KEDAULATAN UNDANG-UNDANG
KESOPANAN DAN KESUSILAAN

cara dapat duit tanpa bebaskan rakyat.

Pertama sekali perlu usaha dn kos.Perkasakan penguatkuasaan dan teknologi di sempadan.Kenakan cukai contohnya rm50 perhari pada hari berkerja pada setiap kenderaan (kereta) untuk memasuki Malaysia.
Jika penguatkuasaan kita berkesan kita akan dapat berjuta saman setiap hari dari warga asing yang melanggar undang-undang di Malaysia.
Di lebuh raya kita sahaja kita dapat lihat kereta warga asing memecut laju tanpa pedulikan undang-undang kita.

Keduanya setiap kenderaan yang ada saman tidak di benarkan keluar dari Malaysia. Bayar saman dahulu baru boleh keluar dari Malaysia. Kita perlukan perancangan teknologi dan usaha dan kerajaan akan dapat banyak duit dari saman-saman ini. kebanyakan warga asing memperlecehkan kita.

Jika ada yang mengatakan kita akan kerugian sebenarnya dalam jangka masa panjang kita tak rugi. Lihat saja berapa ribu warga kita pergi ke negara jiran walau bermacam yang perlu di bayar. Kalau warga asing tak nak masuk Malaysia kita tak rugi. Negara kita di hormati negara berdaulat. jangan tunduk pada ugutan.

Demi Tanahair Tercinta

Assalamualaikum TDM

It seems to me that UMNO is not learning from their mistakes. You lost one vote from me for the state seat and still managed to have one vote for the parliament just because everything goes up. If this continues, UMNO will lose the other one vote instead of gaining back that one vote lost to PR. But, UMNO thinks its because they did not close to the people. I am a person of no party. The only party in my mind is "What's best for me and my family".

That's not the reasons. You are still in the state of denial. Hey guys wake-up and smell the coffee.

Last night I watched Al Jazeera Nilesat where Khalid samad, Marina Mahathir and Yusri mohd were in a forum discussing the issue of using the word Allah in Christian newsletter. They are no matched to TDM in analysing the facts. They are "fighting" with each other in putting their facts. The whole world is watching. I dont want them (PR) to rule the country but UMNO's behavior leave me with no choice.

And now things are going to start again, with sugar going up, petrol, and everything is about to go up again. Remember - you almost lost. Its not because you are not close to us but you failed to know our needs. Its all about your greed. It's just a matter of time if this is not corrected. TDM is smart. Everytime when it is close to the election, we will have the people's budget. That is why he ruled the country for decades.

Remember - the oppositions managed to paint that the government is corrupt. And the are doing it on and on. They have started their election campaign while the UMNO is still sleeping. They have planted this in every people's mind. I you go to a coffee shop and ask this question - Is it true the government is corrupt - the answer is most likely - biasala. The UMNO's keeps on confirming the facts what the opposition had painted - a corrupt government. This sand issue is just another one confirming that UMNO is a corrupt government. It's just a matter of time we become Singapore.

If we failed to realised this - can say goodbye to form BN government in the next coming election. After all Najib is the last name after Rahman - the first Prime Minister. R-Rahman, A- Abdul Razak, H- Hussein Onn, M-Mahathir, N- Najib.

So, I do hope TDM can do something to make the UMNO people realised the importance of painting a new picture.

Help us - we surely do not want Malaysia to be like Singapore.

Thank you for giving me time to express my feelings.

MALAYSIA JUAL PASIR UNTUK SILIKA.

YANG PALING PERLU DISELIDIKI IALAH PESANAN TUN " I think someone is not telling

PERTAMA : BETUL KE DI DALAM LORRY TU PASIR UNTUK TUJUAN YANG
DINYATAKAN.

KEDUA : BERAPA PERATUS DARIPADA PASIR DI DALM LORI JADI SILIKA.

KETIGA: BERAPA PERATUS DARI PASIR DALAM LORI JADI BAHAN "REJECT".

KEEMPAT: APA SINGAPORE BUAT DENGAN BAHAN 'REJECT" TU? TAMBAK LAUT
KE? BUAT JALAN KE?

KELIMA : SIAPA YANG CHECK SEMUA PROSES NI?

Bila agaknya KITA PENDUDUK SATU MALAYSIA akan terhindar dari PENIPUAN
Singapura. AIR MENTAH KITA HANTAR KE SINGAPORE, BELI AIR BERSIH. BAHAN
MENTAH SILIKA HANTAR SINGAPORE, BELI YANG DAH JADI SILICON. SEMUA INI
BERLAKU SEBAB KITA TERGOLONG DALAM GOLONGAN YANG DIKATAKAN
PEPATAH " di tipu mentah-mentah".

Salam TUN,

saya kerap hanya membaca apa yang TUN tuliskan. saya percaya ini adalah apa yang TUN
rasakan jauh didalam fikiran TUN. tapi sebelum ini saya tidak memberi komen sehingga kini.
jual pasir...dan banyak perkara lain yang telah dan sedang berlaku sedang berlaku. yang ruginya
adalah kita rakyat. apalagi kepada mereka yang mendengar berita dan percaya bulat-bulat apa
yang diberitakan didalam "main stream media". setahu saya sekiranya ada pihak yang ingin
menjual pasir keluar malaysia memerlukan kebenaran dari banyak pihak terutama mereka
kakitangan kerajaan yang berpangkat tinggi. ini satu cerita yang tak diceritakan dengan habis
lagi. ini belum masuk kes enjin kapalterbang yang hilang. dakwaan kepada 3 pegawai
berpangkat rendah dan seorang orang awam. mustahil untuk orang yang berpangkat rendah
untuk membawa enjin kapalterbang keluar dari kem tentera apalagi menjual diluar negara.
memalukan pihak tentera.

belum lagi kes royalti minyak untuk kelantan lagi. saya mengulangi apa yang pernah TUN tulis
sebelum ini:

Dear Tun,

I think this is the right place where i can voice out my disgust... The world knows that Haiti been ravished by earthquake, and the whole world send in their help, US send their troops to help them. I can see the suferings and the childrens crying for help to come asap. But why our government is not sending our troops to Haiti? Are we waiting to go under the UN banner? coz as far as i know people are dying there and we are here squabbling about who get the name of God, corruption nad etc. Are we gonna go there when every haitians die there?.

We have medical specialists, armies, and many malaysians that can go there and help out. We have food here, why dont we send some for them. Look at the haitians, dear Tun, you have been a fervent fighter for the 3rd world countries, could you give your sarcasm remark to our malaysians especially the government so that they can stop spending money to luxury places and help the needy... lets look at the haitians as human ranther than their color or religion. Where is MERCY Malaysia?? are the merciful enough??

Dear Tun,

I understand that you regard Avatar with 9/11. Well yes US has the potential but killing their own people to conquer other land seem to be far than a movie. Anyhow I do understand your frustration on the Jews, and I dont actually agree on the Jews killing innocent palestine to get the land. In fact I feel they need to be brought to justice, but what is justice in this world if its controlled by the powerful people. It may sound like there is no end to this. I refer to the book of Revelation in the Bible on The End of Days where everything will come to an end. Do you think that the world will end when the Jews+ christians fight with Islam people (1.6 billion) ?. At that time God will send the destruction to wipe out the earth....this may sound like a movie, unfortunately I can feel its happening. The ban of the word God in our country, the earthquake in haiti...I'm worried...the end may be near

Tun,

I had read some comment about other member regards to the fuel subsidy issue, well frankly speaking, some of them suggested that it should be abolished.

for my personal humble opinion, before it is being abolished, one thing the country must fix first... (The Car Price)

Car prices should be reasonably low like those that is selling in the US, if they impose so much on the car tax..

else it would not be fair to us that we did not get subsidy for fuel yet paying such high price for car...

Salam YAB Tun yg sentiasa di kasihi....

Saya tak faham laa...kenapa ada saja rakyat Malaysia yg nak jugak menentang kerajaan yang ada sekarang nie...

Untuk paparan YAB Tun..

Ini email dari kawan saya:

(A) Si Polan bin Si Polan:Car price after May

"Anybody sure regarding below???"

Not sure true or not but stay tune...

PUTRAJAYA, Jan 8 - The mechanism for fuel pricing in Malaysia has finally been finalized and controlled under one mechanism, which also takes the high and lower income group people into consideration, according to Finance Trade Minister Tan Sri Anuar Ali. "From May 1, the fuel will be pegged at RM 3.90 per litre for RON97, while RON95 will increase to RM 3.70 per litre. However, the prices of national-made vehicles will be lowered by at least 40 percent. For example, a full-spec family sedan Proton Persona 1.6 litre engine will cost around RM 23,000.00 excluding road tax and insurance. Import tax and excise duty will be revised to only 30 percent, from the current 200 percent. Imported vehicles such as the new Toyota Camry 2.4 litre engine will cost around RM 65,000.00." he said. The mechanics has been said to be undertaken by a team of experts from Australia and Canada who were earlier briefed on the issue of subsidy in this country, whereas after consideration by the transport minister, they have signed the constitution that the system will be made on May 1, the day it goes into effect.

Under the new system, there will be a major effect on the existing consumers who have already purchased a vehicle and to those who are in the midst of repaying the loan of their vehicle to their financial institutions.

Ahmad Tajuddin said the government might also re-introduce a cash return annually to Malaysians who own a 1,500 cc and below vehicle. The amount have yet to be decided but he assured that the amount will compensate the price of fuel by at least half to eligible Malaysians based on bumi quota.

One typical sand carrying truck or lorry could transport roughly 3 tonnes of sand. Assuming 500
trucks crossing our border on daily basis means that 500 trucks/day x 3 tonnes = 1500

tonnes/day. Which means in 1 month (minus Sat and Sun) about 7500 metric tonnes of sand is moved out from Malaysia into Singapore! '

A typical truckload of sand is around 12-15m³. General conversion for density is 2.2-2.4 ton per m³.

So, pertruckload is around 25 ton minimum (considering strict road regulation by Singapore.)

This is for 10 wheeler truck.

This is from man-at-site, actual working data.

Please, I assume 'ir' stand for engineer, which refer to professional engineer (PE), make sure your data is realistic.

Unless you buy sand for DIY home renovation from local hardware shop, they don't use 3 tonnes lorry to transport sand nowadays.

25 tonnes X 500 truck = 12500 tonnes perday

12500 tonnes X 20 working day permonth = 250000 metric tonnes permonth.

Compare to your calculation, what you get for a month is less than what I get for just 1 working day.

Usually a truckload can carry equivalent of 6 m³ of compacted sand, to normal JKR earthwork standard (6 passes of 8 tonnes roller compactor for every layer of 300mm bla bla bla.....) and JPJ regulation. Sure you can specify which MS or BS it refer to, since you're a PE/ir, don't you.

To put things simply for layman, if Singapore use the silica/sand for land reclamation, they can reclaim 1 hectare of land every month, from sea where the depth less than 6 metres.

There is nothing wrong doing business with Singapore. Singapore has demand, and we can supply.

But there is something wrong with our leaders. They only know how to sell natural resources, but they dont know how to encourage our people to innovate. Our government officials are short sighted and do not know how to run complicated things. Please employ university graduates with 3.5 GPA/above to work in govenrment departments. And please nominate politicians that graduates with first class honours in general elections. Please change education system to the one that encourages our younglings to be innovative. Or else, 30 years later, new generation is Malaysia still sell sand to neighbouring countries. Oh no... no more sand to sell.

By sypatracusAuthor Profile Page on January 20, 2010 12:53 PM

Salam Tun

Someone is definitely not telling the truth, and that someone is getting richer by the minute, by selling the country. It's beyond my imagination that 500-700 truckload of sand being exported daily to Singapore for the production of silica/chip. It must be something else, something really big.

It think the silica factory is just a front for a very mischievious plan, to reclaim masssive land in the island, and very soon we are going to see land areas and buildings popping up across the causeway and its vicinity. I think this is being done legally (export of sand silica) by twisting the laws somewhere to allow sand be termed as silica, and I believe some government officials, politician and businessmen are involved in this scam.

This must be made public, in all newspapers so that all Malaysian know who is that someone (and his accomplices) and action be taken against them, for treason. Let us not let them getaway with this easily.

Thank You Tun

antara yang dapat dipelajari dari apa yang berlaku ialah:-

1. musuh2 Tun menggunakan segala kesempatan untuk menjadi 'penyangak / penyamun agung' dengan ketiadaan Tun.
2. barangan yang 'add value' tidak mendatangkan 'komisyen cepat' kepada penyangak / penyamun negara.
3. 'penyangak / penyamun agung' ini berbangsa melayu yang sejak azali bersifat sedemikian yang suka menipu dan menghancurkan bangsa sendiri DAN negara.
4. 'penyangak / penyamun agung' ini dilindungi oleh 'raja segala penyangak / penyamun agung'... saya yakin dan percaya Tun dan rakyat jelata tahu siapa dia.
5. 'penyangak / penyamun agung' ini terus bermaharajalela kerana kuasa ditangan mereka, tanpa sedikit pun mempedulikan nasib rakyat.
6. 'penyangak / penyamun agung' langsung tidak mahu mempelajari ilmu yang telah diturunkan / diberi / ditunjuk ajar oleh Tun...
7. pandangan / pendapat /idea Tun sekarang ni dibuang begitu sahaja oleh 'penyangak / penyamun agung' ... kenapa ? ... kerana mereka tu semua memang 'penyangak / penyamun agung'... kurang ajar dan biadap terhadap Tun... kalau dengan Tun pun mereka berani, apatah lagi dengan rakyat jelata

.
.

moga Tun dapat terus mencurahkan ilmu, bakti dan jasa kepada bangsa, agama dan negara walaupun Tun sudah tidak berkuasa lagi... tapi satu perkara mereka lupa . . . 'Tun masih berbisa !

this new one had shown us in one year only...

vision that they will pay in the next years...

in the last pru the people try to tell bn something..

but what a pity we got pm that knew nothing...

i'm not accusing the pm is stupid..

he knew nothing because he done nothing....

yeah ... he done something..

but nothing is for the people sake..

it just for nation sake....

and thus reward only the "nattiaonal" people...

we the lower people had been ignored...

the next pru, it's our time to ignore them...

Assalamualaikum Tun.

Singapore ni tak dapat akar,rotan pun berguna.

Tujuan utama singapore tak nak buka tembok johor adalah kerana ingin mendapatkan pengesahan keluasan wilayah darat negara secara psikologi.

Bukan macam bulan dengan bumi yang tergantung tanpa tali.

Apatah lagi kalau PM nak buat jambatan ke-3.Orang mengatuk disorong bantal lagi.Dahla dapat menang dari segi peluasan wilayah darat,dapat pula meneroka hasil bumi Malaysia dengan kadar yang murah.Pulangan yang lumayan.

Kemudian bina pulak keretapi berkelajuan tinggi hingga ke Siam melalui pantai barat.Boleh melancong tanpa pandang sebelah mata pun ke kita ni.Maklumlah keretapi terlaju sekarang ni kat China pun dah capai 370km/j.Korang ingat diaorang sempat ke nak cam muka kita yang tak berjerawat ni?

Saya ada terbaca tentang balaci-balaci (maaf,seperti yang disebut oleh penulis buku politik masa perhimpunan Agung UMNO).Saya tahu ramai 'pengikut' ahli politik membaca blog ni.

Pada saya biarlah saya makan benda yang halal.Kalau tak halal pun saya usaha cari skill yang dapat membantu saya pada kemudian hari cari duit halal.Janji ada hati untuk ke jalan kebaikan.

Mintak la pada ketua politik jalan mendapatkan 'skill' yang dia dapat bagi.Kalau setakat bagi wang ringgit sampai hari kiamat,kirim salam laa...dapat duit,makan,kemudian gi tandas melabur.Tak dapat duit kena pergi menyudu pulak tu...anak yang kita hantar pergi belajar ke universiti pun belum tentu dapat bawa balik buah tangannya.

Saya pernah jadi jaga di bandar Johor Bahru dulu.Selalu juga tidur bawah tangga beralaskan kotak-kotak.'Abang Johor' saya mula-mula tu marah jugak,tapi takpelah katanya sebab alas kotaknya bersih.

Di Johor Bahru kos hidupnya tinggi.Bayar tambang bas pun dah RM10 sari.Keluar kerja dari jam 6 pagi,balik rumah 1 pagi.

Terlalu keras.

Alangkah baiknya kita tidur beralaskan pasir daripada beralaskan kotak.

Terima kasih Tun.

Hopefully they are not repeating the mistakes done by some of our past leaders. In this sense allegation that 'Melayu mudah lupa' atau 'pemimpin Melayu mudah lupa' is proven true and valid.

Sadly to say they still drifting with their dream and power given by their people. Please do something Tan Sri Mahyuddin. I know some of the cabinet members are sincere and clean. But do not forget there are still some of them are questionable. We most of UMNO members who love the country more than the.... will be behind you.

Sand goes to building more HDB flats. For once I can't and I won't blame the Sinkaporeans. Why blame highly intelligent species over the meeklings that is us? Not only are we now meeklings, but we are also incompetent fools in still hiring and maintaining the AJK T4 teamsters. Now they are slowly absorbing themselves into the mainstreams of UMNO. Noh Omar is home free now – congratulations by the way (by leveraging with UMNO Selangor). Shahziman is Khairy's cousin. Tampin and Rembau is merely jogging distance. When things went Pakistan after PRU13 (a lot sooner than expected) who do you think would emerge in UMNO? It's AJK T4 and thus giving Khairy leverage to bargain with PAS and PKR for a Malay bloc. See these flying saucer priest in East Malaysia would drag BN down if BN loses Sarawak. In the ensuing chaos or maybe simultaneously in dissolving DUN with Sarawak, we may see Penang, Kelantan, Kedah and Selangor in tandem in dissolving their DUN as well. So what to do with 1 Malaysia? Bang balls. We go join the Duvalier in Cote de'Azur. The poorer ones can skip the "de Azur" part and just make do with the former. It's a mess. Damn you Dollah!

Salam Ayah Det...i feel compelled to pen down a comment which has nothing to do with the topic above ...but more about your daughter, Marina Mahathir's article in the Star today on the

gratitude of the cool heads. it is a very good article and i believe all malaysians would feel the same...i mean all malaysians who are selfless and who wished for Malaysia's continuous harmony and peacefulness..and not those malaysians who has a personal agenda; including all politicians..not one leader from the present government would stand out as stated in her article...it is mostly the common selfless malaysian who are the ones taking this big step to prevent the repeat of history...i think our leaders has forgotten of the negative effects of that horrid day in may..do we need to send our leaders for a refresher course on the malaysian history..the demonstrations and all negativities to the country were all brought to live by the one you had admitted sometime ago that you had wrongly picked. the country was a safe and harmonious place to be in when you were helming as the PM...i wonder what happened to those good old days..the country is in a shambles and thanks to the present leadership and also the previous one..how could you have handed down the reigns to someone who would be destructive to the country??...i still wonder with amazement..the cost of living is sky-rocketing and all the policies being implemented are just short of childish...or more like child's play ...is this what you had taught them??..the present leadership were once under your supervision..and they had turned out to be a whole lot of selfish and conceited ppl - only with their personal agenda as priorities..

the only consolation is that we still have a minority of malaysians like your daughter writing on the present situation of the country with sensitivities and a balanced mind..trying to inhibit the re-occurrence of that dreadful day in May!!!!!!..may i trouble you to convey my compliments to her..

you know deep inside what is happening to the country and i really hope & pray that you have a solution to return malaysia back to her glorious days when you were helming the leadership.

i apologise if i had provoked or hurt anyone in my comments and it never crossed my mind to do so..it is only facts that is being stated as the situation of the country is getting from bad to worse and if nothing is done to rectify it, i am very sure that there will be a change in the leadership in the next GE...it has been proven by the lost of majority in the previous GE and yet the present leadership is still in the state of denial...we, malaysians get to voice out our dissatisfaction only once every 4-5 years and i will not be surprised by the outcome of the next GE..

sending ayah, mama and family my warmest regards...salam ..suffian NG

Any comment on fuel subsidy restructuring scheme? FYI, government spent about RM18b on fuel subsidy alone in 2008 (when average oil price spike to USD100 pb) and in 2009, its expected to be RM9b (with average oil price around USD60 pb).

KENAPA SUKA JUAL

Yang Berbahagia Tun. Semoga Allah memberikan Tun berdua kesihatan dan umur yang panjang.

Saya bersetuju dengan pandangan Tun. Kita telah pun menamatkan penjualan pasir ke Singapura semejak tahun 2001 lagi atas alasan telah digunakan untuk penambakan dan pembesaran wilayah yang keterlaluan sehinggakan mengganggu sempadan dan perairan kita. Mengganggu laluan kapal ke pelabuhan Tanjuang Pelepas. Syukur diatas perhatian Tun ketika itu ianya dapat dihentikan.

Kita juga menjual air dengan harga lelong 4 sen/sejuta liter kemudian membelinya semula dengan harga 50sen seribu liter. Kawasan logi air ini dikawal oleh tentera Singapura didalam negara kita yang berdaulat. Sebaliknya kita tidak boleh kawal wilayah kita di Singapura milik KTM. Maka bebaslah penerokaan haram dilakukan oleh rakyat Singapura. Kita hanya mampu memprotes dan merintih.

Kini jualan pasir untuk industri. Jumlah 700 lorry sehari terlalu kecil untuk menambak laut. Kalau benar pasir itu pasir silika yang mempunyai 'value added' yang tinggi kita perlu memberikan kemewahan itu kepada industri di negara ini. Itu yang terbaik.

Namun dari 700 lori itu mungkin selepas diproses hanya 10% menjadi bahan industri 'kaca silika'. Sisa buangan kemana diletakkan. Sudah tentu menjadi bahan menambak laut juga. Kalau setiap hari baki 630 lori dibuang kelaut bagaimana jumlahnya dalam setahun. Dan bagaimana pula dalam tempoh 10 tahun dan seterusnya. Bumi Singapura yang kecil akan menjadi bertambah besar. Janganlah kita ulangi kesilapan datuk dan ayah kita dahulu yang menjual harta untuk menampung hidup yang selesa dan bergaya. Kemewahan seperti ini tidak akan kekal lama. Mereka yang membelilah yang akan menjadi kaya dan mengekalkan kekayaan. Semoga Allah mengampunkan mereka.

Selama ini kekayaan yang dinikmati oleh Singapura sebenarnya hasil dari bumi serta sokongan kerajaan dan rakyat Malaysia dan Indonesia. Dua negara inilah yang menjadi Singapura negara maju dan makmur. Setelah kaya untuk membesarkan wilayahnya tidak sukar kerana wang boleh melakukannya. Banyak wilayah dalam Malaysia telah dimiliki oleh orang Singapura atas nama pelaburan. Bukan sahaja untuk membina kilang malah perumahan, ruang perniagaan, kawasan pertanaan dan pelancungan.

Di Melaka sebagai contoh, kawasan yang amat bersejarah dimana berlakunya pengistiharan kemerdekaan Tanah Melayu oleh almarhum YAM Tengku kini telah dimiliki oleh orang Singapura, menjadi kompleks perniagaan hebat yang peniaga-peniaga Melayu hanya menumpang dipinggiran. Hendak menjaul telekung pun tidak dibenarkan. Ingatlah keadaan yang sama akan berlaku di Wilayah Sri Iskandar, Johor. Dalam tempoh 10 tahun lagi anak-anak kita akan terus merintih dan menyesal lagi.

Highway utara-selatan PLUS menjadi tempat warga Singapura menguji kelajuan kenderaan mereka. Apabila ada kereta laju dibelakang, pemandu Malaysia meminggirkan diri memberi laluan. Rupa-rupanya kebanyakan yang memotong laju ialah kereta bernombor plate Singapura. Pemandu Malaysia kebanyakan terpaksa ikut undang-undang kalau tidak 3 bulan kemudian surat saman sampai di rumah. Sedangkan kenderaan Singapura disaman atau tidak 'wallah hualam', kalau ia masakan mereka masih berani memandu laju. Khabar angin mengatakan ada arahan menteri yang bertanggungjawab membawa pelancung yang mengarahkan jangan ambil tindakan nanti takut pelancung Singapura tidak datang. Kalau ini alasannya, ianya amat mudah dan memalukan.

Terima kasih saya ucapkan kepada Tun kerana sekali sekala menunjukkan perkara seperti ini supaya rakyat Malaysia yang cintakan negara tahu dan mereka yang memegang kuasa tidak terlalu leka dan khayal dengan kuasa mereka. Lihatlah didalam kemewahan dan kemakmuran yang dinikmati oleh rakyat Singapura gejala kemiskinan rakyat negara ini seolah-olah semakin meningkat dan sering terpapar di kaca TV dan di muka-muka akhbar.

Cintailah negara dan hindarilah perpecahan agar kedaulatan negara dapat dipertahankan.

Tun Mahathir,

Salam dengan penuh hormat,

Singapore of today is not Singapura as we know of yesteryears.

When the British left our shores, they move in droves to set up base in Singapore. The British knew very well that the agreement on HK as a colony would be maturing and Singapore need to be defended till the end of time as it is strategic to them when China claim the return of HK.

I remember most of my chinese friends in school followed their parents to Singapore and in the late 60's every 2 Singaporeans, 1 is former Malaysians. We dont have to ask why as we know the answers quite well. If we discuss on this subject, we will be labeled as racist.

When the Penoi chased out the American from Subic, Singapore opened up their doors wide and becomes the designated state of USA.

The development of Singapore is a duplicate of Israel and remember when LKY was prepared to go to war with any of the neighbouring contries and that they have similar armerments that obliterated Iraq.

Do we know precisely why Singapore dumped Malaysia ? Do we know exactly the pressure applied by US/UK upon Tungku for the departure?

It is a very sad experience and believe me, we will be seeing more of many sad experiences to come from US and their allies through our not so friendly neighbour.

Asean is another sad ending of great Asian foresight and who amongst the Asean members that loaded their heart and soul for APEC? is there any one out there who are not sure of the history?

Perhaps we need to rewrite the history from an Asian perdperspective.

What have we learnt from our relationship with Singapore during the last 30 years ? Without US/UK/Israel what sought of power play can Singapore thrust upon their neighbours. Remember how LKY cretcised China and the Chinese during the 80's when every single allied countries of US stepped upon China's flag for their policies in maitaining order in their country?

China keep to themself and move on and paced themself very well and now US need Chuna's money to keep their own country afloat.

I am sure China has already been forewarned of what happened to Germany and Japan and I am also in the opinion that China would be the biggest target yet and US need as big a country and economy to face China head on and who could it be if not India and who would be the fiddler from this region, if not Singapore . They are now singing a different tune,not the old tune sarenaded by LKY.

Tumasik was just an island under Johor/Riau kingdom but now, under the ploy and deceptions of the British it has become an island nation and they need to continue such strategies. Not so many Singaporeans want it that way but the Government of Singapore needs to prostitute the country so that the US will ensure there will be no suitors of their south eastern concubine.

Where else can Singapore get their resources if not from their hinterland and where is their hinterland ?

We must be blind if we do not realise this.

Tun, you have explained to us of your idea to enrich thy neighbour policy and it is almost divine and unfortunately it was misunderstood by many as "enrich thy family".

If we leave it to the business people with their capitalistic views where money is God to them, the country will be ruined. No doubt we need them as power base to push the Country's economy but there are too few of these people who would defend the Nation. Yes in times of need, they will splash their cash and put up a superimposed pay order that is so big that you can see from a mile.

Pray to Allah to spare us the real crunch and spread the wisdom to our leaders to keep our nation together and at peace all the time.

Is that enough or just food for thought.

Salam Tun & fellow CheDet bloggers,

What next? Jadi memang benarlah cerita tiga Abdul. Kenapa? Salah siapa? Itulah akibat bala yang diterima kalau kita lupa ajaran kepada ilmu Quran & hadith yang haq. Dengan ramainya mengutamakan hal dunia maka Allah berilah kita dunia. Bukankah dunia ini syurga bagi orang kafir dan neraka bagi orang yg beriman. Untuk keselamatan kita di dunia dan di akhirat, Allah perintah kita supaya berpegang kepada talinya Allah tapi ramai engkar. Oleh itu siapakah kita yg sebenarnya. Tepuk dada tanya selera. Kalau cakap nanti ramai yg marah pula tapi memang ramai yang sudah menjadi munafik.

Inilah akibatnya jika kita membelakangkan ajaran Islam yg sebenarnya. Yang ada sekarang Islam terus dipolitikan dan diperniagakan dengan ghairah dan penuh kebanggaan oleh orang Melayu "Islam" sendiri. Kita terus berbalah sesama sendiri. Musuh hanya ketawa. Sampaikan Kalimah ALLAH pun kita bacul nak mempertahankan. Mana jihadnya untuk mempertahankan kesucian Allah? Inilah balanya.

Maaf Tun, saya tak tahu apa nak cakap lagi dan Tun beberapa kali dah pun meluahkan perasaan kecewa Tun kerana kerenah bangsa yang bernama Melayu ni.

Semuaga Allah terus melindungi mereka yg beriman.

"I thought we had stopped selling lorry loads of our land to Singapore."

Hi Tun, I wonder what the rationale is for not selling sand to Singapore. Malaysia is well-endowed with natural resources and some of our rivers are silting.

And whatever happened to your "Prosper thy neighbour" campaign? Instead of trying to hurt Singapore, why can't we coexist peacefully and look into areas of cooperation where we could benefit mutually? Given that Singapore has hardly any natural resources, I think they have done incredibly well. Honestly, I doubt any Malaysian could have done what they have achieved. On the contrary, that nation would be bankrupt in no time if UMNO or MCA had run it. If I run it, it would be bankrupt in no time too, LOL. Just telling what I really feel... not trying to deride anybody.

Look at all of you, complaining about corruption. A show of hands from those who are against corruption but are voting for a corrupted party. Malaysian are of the same character as their leaders. Cakap banyak, idea banyak tapi kurang action.

You want to make changes? You want to give Malaysia a chance? You want to bring back Malaysia's glorious past? You want to give your kids and their kids a chance? Vote for those who champion freedom, transparency and accountability whoever they may be.

Assallammulaikum,

Tun dan semua bloggers.

Berkeenaan ISU subsidi minyak yang telah mendapat rungutan daripada NGO dan rakyat sendiri. Saya telah memberi beberapa pandangan berkenaan ISU ini.

Oleh kerana kita pun tidak mengetahui bagaimanakah pembahagian subsidi tersebut maka saya sekali lagi ingin berkongsi idea dengan semua blogger dan rakyat Malaysia.

Disini saya memberi contoh seperti:

1. Semua harga PETROL di stesyen minyak tertera harga TANPA SUBSIDI.
2. Setiap RAKYAT Malaysia berumur 21 tahun layak menerima subsidi PETROL.
3. Hanya satu kenderaan sahaja bagi setiap rakyat Malaysia yang didaftarkan layak menerima 300-400 liter subsidi minyak sebulan.
4. Membayar harga tanpa subsidi jika penggunaan lebih daripada yang diHADkan.
5. Motorsikal menerima kurang daripada kereta.
6. Mesti menggunakan MY KAD/MY ID semasa membuat pembelian petrol sebagaimana membeli menggunakan KAD kredit,
7. Pembatalan MY KAD/MY ID secara automatik sepanjang hayat jika terdapat penipuan seperti menjual minyak subsidi.
8. Permohonan mendapat subsidi minyak dan membaharui setiap tahun sewaktu memperbaharui cukai jalan.

Ini semua bagi mengelak supaya rakyat asing tidak mengambil kesempatan membeli Petrol tanpa subsidi Rakyat Malaysia. Ini juga bagi mengawal pembaziran wang kerajaan dan mengelak dari penyalahan penggunaan oleh mereka yang mempunyai banyak..... kenderaan (spt. sesebuah keluarga mempunyai 7, 10, 15 mungkin 30 kenderaan).

Andaikata terdapat penambahbaikan kita sama-sama berkongsi pandangan.

Sekian.

Dear Tun

Saya sudah tahu semenjak Pak Lah jadi PM. Saya ada komen dalam Utusan Dengan PM yang Pak Lah berikan pada rakyat membuat komen tapi kosong tindakan (25 Mar 2005). Laman web itu buang masa rakyat sahaja tak ada tindakan di ambil.

Saya sendiri tinggal di Pasir Gudang. Lazimnya Sungai dibelakang rumah saya jernih airnya tetapi sekarang berkeladak. Kalau hujan semakin teruk. Ini bukan saja di Pasir Gudang, Kota Tinggi pun begitu (Komen dari Kawan saya). Ingat tak lagi banjir di Kota Tinggi pada tahun yang lepas. Mereka kata korek dalam-dalam nanti Kota Tinggi tak akan banjir lagi tetapi ini tipu belaka.

Pak Lah kata batal Jabatan maka jualan Pasir tidak akan diberi.

Sudahlah, rasa bosan saya dengan kerajaan sekarang. Mereka cakap ini tetapi buat yang lain.

Sama seperti Minyak. Kerajaan katakan rakyat Singapura kongsi faeadah Minyak bersama rakyat Malaysia tetapi mereka tidak tahu siapa boss station Minyak, semuanya ada pangkat dalam kerajaan. Kalaulah kerajaan kenakan toll RM30 pada kenderaan Singapura maka subsidi minyak tidak akan dinikmati oleh rakyat Singapura. Kita juga jangan perdulikan rakyat Malaysia yang memandu kenderaan Singapura kerana mereka ini juga mampu membayar sebab gaji mereka melebihi SGD\$5000 (kalau ditukarkan melebihi RM 11000 sebulan). Mereka boleh beli

kenderaan Singapura disebabkan lepas tol Singapura SGD\$30 sehari (tukar Malaysia RM80) dan menaikkan ekonomi Singapura dalam penjualan kenderaan. Mana pakar ekonomi Malaysia? Semuanya makan gaji buta dan rasuah. Sudahlah saya malas nak tulis lagi.

Kalau dikenakan Tol seperti saya cadangkan maka selesai

1. Subsidi Minyak
2. Harga barang di Johor Baru juga turun
3. Kos sara hidup rakyat Johor akan turun.
4. Tiada seludup tepung, gula dan susu oleh rakyat Singapura.
5. Kerajaan sendiri mendapat pendapatan.

Dear Tun, salam mesra harap sihat sentiasa. Kiriman saya untuk seri tajuk ini dgn izin...

.....LEGACY

Embargo, sanctions, boycotts and bans are elements of Mahathirism. Look east, buy British last, US boycott and no sand! How it fits into WTO and free trade is the magic of mavericks.

.....FEASIBILITY

Sand is issue of economics or pursuit of antagonism. If used for construction there should be no issues, for reclamation it can couple with 'no detriment' conditions, for industry consider feasibility. Now there is only drum beating arguments here!

Be careful, Thailand and Indonesia will be willing to sell a whole island of sand to them for the right price. They are much more endowed and spacious.

.....SAND DIPLOMACY

Asean policy of prosper thy neighbour on use of sanctions does not apply to Spore? Embargo can be part of bilateral relations? Try imposing an embargo on your next door neighbour?

Sand diplomacy is a legacy of Mahathirism. De facto hate diplomacy? Sand in your eyes and sand in your rice bowl policy. Two wrongs make a right. Tit for tat. Black eye for Anwar, Australia and S'pore.

.....HIDDEN TRUTH

Is somebody hiding the truth? Sand ban is the hidden truth, sand sale is open secret. The only truth is another facet of Mahathirism may be out of use.

PS: Hi pada sdr 'owlz' on January 18, 2010 9:04 PM (Selamat berjaya) and HBT.

All the speculations are just speculations. Anyone can speculate but an ex-premier should not. There are avenues for him to find the truth, nothing but the truth. I will add another speculation.

If there are 700 lorry loads of sand heading for Singapore daily, it is for only one reason. To look after a very important Malaysian company, World Resort Sentosa. It is competing against Marina Bay Sands.

Resort World Sentosa (RWS) opens its first four hotels tomorrow and soon, most of the other facilities and casino will start operation. It means big bucks and many Malaysian companies and all the big shots (the datuks) have big quantity of shares in Genting. They want to win. otherwise, how can so much construction be completed in so short a time despite shortage of various materials.

If there are no strong reasons, how can so many loads of sand pass through Malaysian Customs? Of course, if my speculation is correct, some people will make some money, somehow. Like they say, "Malaysia Boleh!" but nowadays, hardly hear of such war-cry, since everyone knows, Malaysia Tak Boleh especially in religious harmony. Even Lee Chong Wei beat Peter Gade, no "Malaysia Boleh" war cry.

By the way, last week, I went to Johor and was surprised that I did not need to fill the white card and was told by immigration officer, it is a temporary arrangement. Then, I heard another explanation, "We have run out of white cards". So, Malaysia Boleh or Tak-Boleh? I took the risk and went in with a stamp on my passport. It turned out OK. Might as well do away with the white card. So efficient and fast

Poor Marina Bay Sands, still struggling since it has no god-fathers. They started their construction first but only can promise to launch something in April, although, its boss is not the least worried. He said, "We can learn from the mistakes of RWS". He seems to know Malaysia and Malaysian companies extremely well, that they are mistakes prone.

My own take of this two Integrated Resorts is that they will bring in more and more tourists from all over the world. There will be more jobs for Singaporeans and foreigners. The multi-plying effect in the economic development will be so fantastic.

It is not just about the two IRs. Many developments are there for people to enjoy Singapore. Nothing remains the same, not even the museums.

Today, 10M people visit Singapore. In two years' time, maybe 15M and 5 years' time surely 20M. In 10 years time, 30M and it will keep growing. I think we need another air port as four terminals may not be enough.

My apologies if I hurt anyone.

Respectfully

Pungut Kassim

Y.A Bhg Tun,

Sudah terang tak payah bersuloh lagi. Kuasa mengeluarkan permit untuk pemindahan rocks materials saperti diperuntukan dibawah Kanun Tanah Negara terletak kepada Pihak Berkuasa

Negeri. Pengarah Tanah dan Galian mengeluarkan permit tersebut selepas mendapat kelulusan Majlis Mesyuarat Kerajaan Negeri yang dipengerusikan oleh Menteri Besar.

2. Isu yang Y.A.Bhg timbulkan harus dijawab oleh Menteri Besar Johor sendiri. Kepada siapa permit dikeluarkan dan apakah syarat-syarat yang dikenakan bagi membolehkan bahan pasir tersebut dibenar untuk dipindahkan ke Singapura.

3. Sungguh mustahil dan tidak masuk akal sekiranya pemindahan bahan pasir dalam apa bentuk sekali pun dalam kuantiti yang banyak sehingga beratus lori sehari tidak mendapat kebenaran Kerajaan Negeri.

4. Tafsiran Y.A.Bhg mengenai isu tersebut mungkin berbeda dengan pertimbangan Kerajaan Negeri.

5. Perkara yang ditimbulkan boleh menimbulkan prasangka burok rakyat kepada Kerajaan Negeri Johor sekiranya penjelasan tidak dibuat bagi membolehkan orang ramai memahami isu yang benar.

6. Pihak tertentu jangan terlalu cepat membuat dan melemparkan tuduhan kepada mana-mana pihak kerana Kerajaan Negeri Johor terutamanya para pentadbir dibawah perkhidmatan JCS mempunyai tradisi dan kewibawaannya tersendiri. Johor telah muncul sebagai sebuah negeri yang paling modern dan maju kerana kewibawaan pegawai tadbirnya sendiri.

7. Isu yang telah dibangkitkan harus mendapat penjelasan lebih lanjut supaya Kerajaan Negeri Johor tidak menjadi pihak yang harus dipersalahkan oleh orang ramai.

8. Perkara yang harus diperjelaskan ialah apakah bahan yang diangkut oleh beratus lori setiap hari itu, siapakah yang bertanggung jawab memberi dan mendapat permit dan berapa kadar premium yang dikenakan bagi setiap ton pasir dikeluarkan serta justifikasi kebenaran diberikan.

9. Saya yakin Kerajaan Negeri Johor dibawah kepimpinan Ghani Othman adalah sebuah Kerajaan yang bertanggung jawab, bersih dan beramanah dan tidak membiarkan pemindahan pasir berlaku tanpa pengetahuan Kerajaan Negeri.

Yang Iklas,  
Abd Rahim.

AKUI kelemahan kita  
Jangan salahkan mereka

Kekuatan mereka, Kelemahan kita

1. Berilmu, berteknologi tinggi punca kejayaan

Kita berilmu, berteknologi bomoh, punca kehancuran.

2. Mereka keluar negeri, menimba, membawa balik ilmu membangunkan negara.

Kita kurang menimba ilmu, tak nak terima bahasa English, tapi yg keluar menimba ilmu, bawa balik bini atau laki orang English

3. Hidup dalam kenyataan, lebih practical, lebih positive

Kita dalam berangan, lebih khayalan dan emosi.

Tanah, Hasil Bumi masih kita miliki

Haruskah kita

1. Bergadai ini demi Pembangunan mereka, yg mana kita hanya melihat, menghayati saja, BUKAN memilik, menikmati dan tak punya suara, sebab pembangunan itu milik mereka.

ATAU

2. Memelihara apa yg ada, bimbing generasi baru kita keluar menimba ilmu, dan merekalah yg membangunkan Negara kita kelak.

Meraka tak bolih buat apa apa jika kita tak mengizinkan mereka menapak di Bumi Malaysia. Meraka perlukan ruangan yg besar, kita ada ruangnya, tapi akibatnya kita akan rugi. Sudah kelihatan di Pulau Indonesia, di Batam, Riau, Bintang dan banyak lagi, dah merupai Singapura kedua, dan ada juga yg sudah masuk arena politik.

Saya lebih selesa hidup seperti Zaman Kampung,  
walau kurang selesa tapi sehat,  
walau nampak tak modern tapi banyak pergertian,  
walau tak membangun tapi masih hak kita.

Apa yg dinamakan Tuan Rumah jika nak masuk rumah pun kena minta izin pendatang. Dayus!  
Minta maaf bukan ucapan ini penghinaan tapi angganlah ini sebagai membina nasib malang dari kita sendiri.

Datuk Moyang mereka sudah lebih dulu berjuang untuk kesenangan mereka sekarang, apakah kita nak biarkan anakcucu kita, senasib kita sekarang.

Assalamualaikum w.b.t Yang Berbahagia Ayahanda Tun dan Isteri,

Pasir yang dieksport ke luar negara iaitu pasir silika mestilah dimasukkan (load) ke dalam lori dengan diisi ke dalam guni besar. Di samping itu, kilang pengasingan pasir perlu dibina oleh pengesport khas untuk pasir silika. Pasir sungai tidak boleh dieksport. Tetapi saya rasa pasir

yang dibawa oleh lori menyeberang adalah pasir sungai untuk tujuan membuat bangunan dan menambak laut. Jabatan Galian dan Mineral serta orang-orang di Wisma Sumber Asli, Putrajaya perlu buka mata. Jadi mungkin Ayahanda Tun boleh minta SPRM masuk campur supaya jerung-jerung dapat didakwa kerana menjual pasir sungai secara haram. Satu lagi, buat pengarahannya bahawa pasir tidak lagi boleh dieksport dengan lori, perlu hanya menggunakan tug boat atau kapal dagang. Dengan ini kos pengangkutan menjadi lebih mahal dan lebih lambat untuk tiba di Singapura. Satu lagi, lesen mengeksport pasir ni diharamkan terus. Lepas tu kita buka kilang buat wafer cip. Jual ke Singapura seperti yang Ayahanda Tun sarankan. Dah tentu pasir kita takkan dieksport lagi sebab takkan nak tambak laut pakai wafer cip dan buat bangunan pakai wafer cip. No wonderlah Tambak Johor selalu jem sebab lori pasir buat penghantaran pergi balik 1400 kali sehari. Wassalam

Assalamualaikum,

Y.A.Bhg. Tun dan isteri dan semua bloggers.

Berhubung isu penjualan pasir kepada Singapura memang jika difikirkan kita sebagai RAKYAT Malaysia begitu marah. Tetapi SIAPA kita dimata PEMIMPIN TAMAK ini.

Saya ingin berpesan sekali lagi kepada semua pemimpin yang TAMAK kuasa, yang mempunyai kuasa supaya menjalankan TUGAS-TUGAS yang diberi dengan JUJUR dan AMANAH. Sesungguhnya Allah sentiasa Mendengar, lagi sentiasa Melihat.

Inilah dia contoh sebahagian pemimpin bernama Islam. Yang telah memberi implikasi yang buruk pada agama Islam. Benarkah pemimpin-pemimpin bernama Islam ini benar-benar berIMAN?. Adakah tidak AMANAH seperti MENIPU, RASUAH dan MENCURI dibenarkan dalam ISLAM?. Hanya orang-orang yang bernama Islam sahaja yang boleh melakukan semua ini.

Tetapi tidak bagi Orang-orang yang berIMAN. Cuba tanya mereka yang berIMAN kepada ALLAH. Mereka-mereka ini takut untuk berbohong, menipu, mencuri waima untuk mengambil HAK orang lain. Bagi orang-orang berIMAN dengan sebenar-benar IMAN mereka telah menjatuhkan HUKUM pada diri mereka sendiri. Mereka TAKUT pada seksa ALLAH.

Dan bagi mereka yang tidak beriman, mereka tidak takut untuk melakukan semua kesalahan dan dosa. Bangga dengan harta serta wang ringgit yang tidak bersih. Tunggu saja seksa ALLAH, pasti akan TIBA. Mereka ini tidak percaya pada seksa ALLAH, apabila sakratul MAUT tiba barulah mereka ingin bertaubat dan pada ketika itu ia sudah terLEWAT.

Salah satu pesanan Nabi Muhammad pada Khutbah terakhir Baginda adalah "Ingatlah bahawa sesungguhnya kamu akan menemui TUHAN kamu dan Dia pasti membuat perhitungan diatas segala AMALAN kamu".

Pesanan buat saya dan yang beragama Islam segeralah berTAUBAT sebelum terlambat. Mulalah dengan satu titik keINSAFan dan keSEDARan. Supaya diAMPUNI oleh ALLAH yang Maha Pengasih Lagi Maha Penyayang.

Disini saya BERPESAN pada diri sendiri dan semua yang beragama Islam supaya dijauhi tipu daya iblis dan syaitan.

Amin... Semoga kita semua senantiasa di RAHMATI ALLAH hendaknya.

YABhg Tun'

Away from the subject matter.

I cant wait to comment on a daily news today that a colonised 'mud-head' minded minister said its alright to use the word 'ALLAH' in the states of Penang and Federal territory KL just because these states are not under the perview of a sultan or malay rulers. If it is true he has made the most insane statement and being foolish on the issue as we are awaiting the higher court to deliver judgement very soon. As a minister who claimed that he knew the constitution well and understood his own people feelings has now opt to lay the principle away from the whole thruth altogether. We in penang are asshamed and humiliated over his statement as we thought he is far from getting sanile at that age !

Sell silicon wafers to Singapore instead? How? May I ask?  
Do you think Malaysia still have the human resources capable of performing such highly skilled task after exporting all of the brightest students overseas? Do you still expect these students to show loyalty to the country after being unfairly denied entry into the local university despite having the best grade?

Salam Tun,

Bukan hanya sand,air atau apa,maruah pun sudah digadai.

Kerajaan Singapura berkeras haramkan rasuah sama sekali,

tapi mereka hanya perlu beli satu atau dua menteri kita untuk menghalalkan kehendak mereka,tak perlu satu malaysia.

Malah dengan mereka membangunkan JOHOR,begitu pesat seolah milik mereka.

Apa Guna pembangunan JIKA Tuan Rumah,anak Bumi,hanya melihat pembangunan,tidak memiliki,tidak menikmati,tidak ada suara,ada perkerjaan pun cukup makan,hanya menghayati saja,Kerajaan kita pun tak pandai ambil cukai sewajarnya seperti mereka cukai perlabur asing mereka.

Kenapa biarkan mereka melangkah ke tanah kita sedangkan kita

dilayan seperti banduan,banyak peraturan yg ketat,melalui undang undang mereka,sedangkan mereka bermaharajalela di Tanah kita.

ISTILLAH Saya,akuilah kelemahan kita,

Jika tak kuat jangan gaduh,ibarat bunuh diri,

Jikan tak berkebolihan nak membangun jangan pelawa penjajahan

Biar Lambat asal selamat,nak cepat siapa nak kerja kita,

nak cepat tergadailah maruah dan tanah air anak Bumi Malaysia.

Kita perlu mendidik generasi bumi muda kita dengan pelbagai ilmu,

minmba ilmu luar,cari pembangunan cara kita sendiri,

My WAY,My Style,My Progress.

Satu Malaysia mencerminkan kelemahan UMNO sekarang.

Kiat perlu perlawa orang Islam Asing,seperti dari Orang Padang dari Indonesia,Islam

Bangladesh yg berkebolihan,dari Iran

seperti mereka dari dulu hingga sekarang membawa masuk Cina dari China, yg melemahkan kedudukan orang melayu sana.

Perhatikan juga di PINANG bakal ada penambahan orang Cina Singapura dan China.

Tun,

Apa sahaja yang membabitkan singapura sepatutnya membuatkan rakyat Malaysia muak.

Mereka terlalu banyak menghina kita. Mereka terlalu memandang enteng terhadap kita. Mereka tidak menganggap kita sebagai sahabat, sebaliknya menagih segala kemudahan daripada kita.

Mereka bukan negara yang boleh dibuat sahabat dan kita pun tak memerlukan sahabat seperti singapura. Walaupun nampak terbentang sesuatu itu kesalahan mereka tetapi mereka tetap juga akan menegakkan benang basah mereka. Lihat sahaja isu air, kwsp singapura, pulau batu putih, sempadan ruang udara- mereka tetap mengatakan mereka di pihak yang benar walaupun itu membabitkan kedaulatan kita.

Sudah lama saya mendengar cerita dan berita tentang penjualan pasir ke singapura. Saya beranggapan perkara ini tidak berlaku lagi kerana negara kita tidak membenarkannya, rupanya sebaliknya. Tak mungkin perkara ini berlaku secara haram kerana tidak mungkin juga pegawai kita tak nampak sebesar lori dan beratus buah pula. Yang pasti perkara ini berlaku secara halal dan berlesen. Soalnya siapa yang memberi kelulusan untuk urusan pasir ini? Pasti melibatkan PTG negeri. Mereka ini tolol sangatkah boleh memberi kelulusan penjualan pasir kepada jiran durjana itu? Di mana menteri besarnya? Apakah menteri besarnya kroni singapura? Apakah menteri besarnya tidak tahu akan hal ini?

Ada khabar angin yang saya dengar, isu ini membabitkan kuasa yg lebih besar daripada kuasa menteri besar. Betulkah begitu? Kalau betul maka sekali lagilah kuasa x itu akan menggadai negara ini kepada orang asing. Kuasa x tak pernah serik walaupun datuk nenek mereka dulu pernah berbuat demikian semata-mata untuk kepentingan poket sendiri. Sedarlah semua rakyat Malaysia tercinta sebelum terlambat. Ingatlah kita ada maruah diri.

Assalamualaikum Tun,

What is it about Singapore that we must always show respect to and always at our expense? Even the very existence of Singapore is at our expense, since Singapore was once part of Tanah Melayu formerly known as Temasik. Singapore gain independence is also due to us. Singapore separation from Malaysia is also due to us. Land, water, Pulau Batu Putih, what else must be given to Singapore? What about the crooked bridge? Need Singapore permission also? I guess this is what being neighbourly is about. How I wish my neighbour is like Malaysia. Sungguh baik hati!

I think Tun's writing is more than meets the eye. Tun knows more than what his writing's shows. I guess its up to us or the relevant parties to do the research.

Salam Tun

Regarding sand export to Johor, I prefer you ask Ghani to explain. He is in the best position to explain. He knows who are involved and making tons of money. The enforcement team dare not touch the transaction because they are scared of their rice bowl. I am a Johorean, more or less I know the story. The best thing ask MACC to investigate without favour and fear. This matter had been going on for so long. Earlier by tongkang and now by lorries. Catch hold the culprits and bring them to court, regardless of their position.  
It is no point to bark on this matter, the transaction is still going on. I think MACC pun tak beranilah.

Terima kasih Tun

Salam Tun,

Saya berpendapat pasir ini digunakan sebagai pasir konkrit bagi pembinaan di Singapura. Ianya dijual dengan harga yang sangat baik di republik itu. Tetapi adakah kerajaan Johor mendapat bayaran royalti yang tinggi daripada penjualan pasir ini? Saya fikir tidak.

Saya juga berpendapat memang pihak berkuasa dan penguatkuasa tahu pasir di bawa ke Singapura setiap hari, tetapi rasanya mereka tidak berani untuk berbuat apa-apa. Kenapa? kerana ada penglibatan daripada kerabat dan istana? kerana ada penglibatan daripada orang politik? entah... Tun lebih arif rasa nya. Terangkan lah kepada kami.

Dear Tun,

Why don't you look at our current state of economy? I'm afraid even before what you think Singapore can be, our country will be so poor that it needs to sell more sand to Singapore.

The flight of both local and foreign investors are really at a worrisome level. The government policies, the NEP, the religious fight, all these are chasing investors away and pulling the country backward. Even large local corporations are packing their bags and sending their assets overseas. We are losing out our competitive edge. Why not you tackle this first? Tell me, is our economy stagnant? Why are we playing with religion and some other non-sense when the economy is in a critical need for attention? We are fighting within ourselves, we are not fighting for the economy in the international arena.

The fact that our second Finance Minister voiced his is enough to reveal what's underneath. Tun, in the long run, will we fall behind Vietnam and Indonesia?

On the sideline, I don't know if you have recently watched Al Jazeera's "Inside Story - Religious violence in Malaysia" interview (available on YouTube), the interviewee representing the Muslim Youth had really poor public speech. Reading from script all time, not knowing how to respond, and then asking the newscaster if he can stop answering. Should we be worry about Malaysian education system too?

Salam Tun,

Berulang kali DYMM Sultan Johor menitahkan supaya dirobuhkan tambak Johor tetapi masih tidak sanggup melaksanakan. Bahkan pasir negeri Johor pula diberikan kepada Singapura. Sepatutnya Rukun Negara Kesetiaan kepada Raja dan Negara itu dilupakan sahaja. Tiada lagi perlu untuk ikrar rukun negara pada setiap pagi 31hb Ogos dan diperhimpunan bulanan Putrajaya. Tukarlah ke kalimah lain pula. Kura-kura dalam perahu..

Tun

I guess we dont just experience this "loss" you're expressing from Sand or water alone, we experience (and continue) to experience this loss from the numerous brain drain this country has suffered since your administration...what do you say about that?

You say why doesn't Malaysia manufacture and sell the finished products instead of just selling the raw material - well I guess it comes down to 2 things - Hardwork & Quality.

One might argue what is lacking in Malaysia's hardwork and quality standards - well, lets look at what the country has done since your time

a/ Education standards - where do you think we stack in the Regional scene, let alone the World stage?

b/ Politics - what is the education levels and accomplishments of our Politicians? How many people did you have in your cabinet that were truly academically advanced?

c/ Manufacturing - where does Proton or MEC stack when it comes to the Internation scene? How are our exports doing in other countries compared to the competition that comes from Japan and Korea? And if there are those who argue on the basis that Japan and Korea have been manufacturing for a lot longer, well, what is our plan and strategy to enhance Malaysian product status in 10 years from now?

Do we have this thing called "strategy" in anything we do in first place? Is this strategy related to enriching one's coffers or enriching one's personal legacy?

Salam Tun

Boleh tak Tun komen sikit pasal Datuk Nazri Aziz cakap yang orang keristian Sabah dan Sarawak boleh guna perkataan Allah dalam urusan agama. Lihat Utusan hari ni 19/01/10

Larangan guna kalimah Allah

Oleh HATA WAHARI

pengarang@utusan.com.my

KUALA LUMPUR 18 Jan. – Enakmen Agama Bukan Islam (Kawalan Pengembangan di Kalangan Orang Islam) 1988 mesti dikuatkuasakan segera bagi memastikan bukan Islam tidak menggunakan kalimah Allah dalam penerbitan agama mereka.

Menteri di Jabatan Perdana Menteri, Datuk Seri Mohamed Nazri Aziz berkata, penguatkuasaan itu dikecualikan untuk Sabah, Sarawak, Pulau Pinang dan Wilayah Persekutuan (WP) yang tidak mempunyai enakmen tersebut.

Menurutnya, Menteri Dalam Negeri juga boleh menggunakan kuasanya di bawah Akta Pencetakan dan Penerbitan 1984 untuk melarang agama lain menggunakan kalimah Allah di negeri yang tidak mengguna pakai enakmen berkenaan.

“Isu sekarang bukan soal agama lain boleh guna atau tidak kalimah Allah kerana ia sebenarnya dilarang sama sekali oleh undang-undang.

“Isu utama ialah penguatkuasaan dan ini bermakna sesiapa yang melanggar undang-undang itu harus didakwa di mahkamah bagi negeri-negeri yang mempunyai enakmen tersebut,” katanya.

Beliau bercakap kepada pemberita selepas melancarkan Kempen Kesedaran Hak-Hak Pengguna Pengangkutan Awam anjuran Lembaga Pelesenan Kenderaan Perdagangan (LPKP) di Hentian Puduraya di sini hari ini.

Hadir sama Timbalan Menteri Perdagangan Dalam Negeri, Koperasi dan Kepenggunaan, Datuk Tan Lian Hoe dan Pengerusi LPKP, Datuk Halimah Mohamed Sadique.

Mohamed Nazri berkata, kerajaan tidak akan menarik balik rayuan di Mahkamah Rayuan berhubung keputusan Mahkamah Tinggi yang membenarkan Herald-The Catholic Weekly menggunakan kalimah Allah ataupun menyelesaikannya di luar mahkamah.

“Kes ini dibawa oleh Ketua Paderi Gereja Katolik, Tan Sri Murphy Pakiam, maka beliaulah yang sepatutnya menarik balik kes tersebut dari mahkamah dan mengapa kerajaan dipersalahkan (apabila merayu)?

“Kerajaan perlu menghormati sistem keadilan negara, membuat rayuan satu daripada pematuhan kepada sistem keadilan iaitu perkara yang dibawa ke mahkamah perlu diselesaikan di mahkamah,” katanya.

Beliau menegaskan, mengapa tindakan kerajaan menjaga sensitiviti orang Islam di negara ini dipersoalkan sedangkan banyak kes melibatkan sensitiviti agama lain diberi perhatian oleh kerajaan tidak dihargai.

Kata beliau, kerajaan sebelum ini mengambil tindakan ke atas beberapa orang dengan mendakwa di mahkamah di bawah Akta Hasutan kerana cuba mencetuskan ketegangan kaum apabila memijak kepala lembu iaitu tindakan yang mengguris perasaan penganut Hindu.

“Kalau kerajaan menjaga sensitiviti tujuh peratus rakyat beragama Hindu dalam hal itu mengapa sensitiviti 60 peratus atau majoriti penduduk iaitu orang Islam tidak boleh dipertahankan?” tegasnya.

Mohamed Nazri memberitahu, beliau secara peribadi beranggapan penghakiman Hakim Mahkamah Tinggi Kuala Lumpur, Datuk Lau Bee Lan adalah salah.

Katanya, ini kerana isu sebenar bukan berhubung penggunaan kalimah Allah tetapi mengenai adakah Menteri Dalam Negeri mempunyai kuasa untuk membuat arahan di bawah Akta Pencetakan dan Penerbitan 1984 yang melarang penggunaan kalimah tersebut.

Menurut beliau, penghakiman Hakim Bee Lan juga menyatakan tidak ada bukti dikemukakan bahawa berlaku huru-hara di negara ini akibat penggunaan kalimah itu.

“Bagaimana kita hendak kemukakan bukti sedangkan tindakan kerajaan atau menteri merupakan tindakan bagi menghalang daripada berlakunya huru-hara di dalam negara akibat tidak menjaga sensitiviti orang Islam,” katanya.

Beliau juga mengulas pendakwaan segera yang dilakukan terhadap penuntut tahun satu Akademi Seni dan Warisan (Aswara), Mohamad Tasyrif Tajudin, 25, atas tuduhan memberi komen pada laman web Facebook yang bersifat mengancam dengan niat mengganggu orang lain.

Katanya, kes tersebut adalah mudah kerana ia kenyataan menghasut dan pihak berkuasa dapat mengesannya serta mempunyai bukti mengenai tindakan pelajar terbabit.

Menurutnya, bagi kes membabitkan komen-komen di laman berita seperti Malaysiakini dan beberapa lagi tidak dilakukan segera kerana tidak dapat mengesan siapa yang bertanggungjawab kerana mereka menggunakan nama palsu serta tidak dapat mengesan Protokol Internet (IP) yang digunakan kerana ia dimuatkan oleh laman berita bukan pemberi komen.

Salam Tun.

Mohon komen berkenaan laporan berikut:

KUALA LUMPUR: Mulai 1 Januari lalu, pengkelasan tempoh hutang tidak berbayar (NPL) bank bagi semua jenis kemudahan kredit diselaraskan kepada tiga bulan berbanding sehingga enam bulan sebelum ini.

Tidakkah langkah sedemikian akan membantutkan pemulihan atau pertumbuhan ekonomi negara. Bukankah langkah pada tahun 1998 dulu terbukti gagal mencapai matlamatnya dan meningkatkan bilangan orang muflis.

Apa dah mereka lakukan ini?

By BenderbuzzAuthor Profile Page on January 19, 2010 4:44 PM

Salam Tun.

Merujuk kepada komen "By fndhalily on January 19, 2010 10:02 AM"

1 Mei 2010 telah dipilih oleh pak menteri sebagai tarikh bermulanya diskriminasi ke atas rakyat malaysia. Khabarnya, subsidi minyak akan dibeza-bezakan antara warganegara dengan bukan warganegara. Begitu juga antara pemilik kenderaan cc besar dengan yang cc kecil. Bab hak warganegara saya sokong tapi bab kapasiti enjin saya protes.

Saya tidak tahu kenapa pak menteri begitu buta mata dan hati dalam soal ini. Apakah beliau rasa undinya sudah terjamin dalam PRU-13 nanti? Membezakan miskin atau kaya berdasarkan kapasiti enjin kereta amat tidak logik.

Apakah kaya seorang itu jika memiliki kereta 2500cc model tahun 1970an(Volvo 240GL/740GL, Toyota Crown, Merc 280E dsb)yang pastinya nilai pasaran tak melebihi RM10,000?

Apakah miskin seorang itu jika memiliki kereta bawah 2000cc model terkini yang nilainya melebihi RM130,000? (Contohnya BMW 116i, Merc A170/B170/C180, Audi A4 1.8T Multitronic, Citroen C2/C4, Peugeot 206 Coupe dan banyak lagi!!!)

Kalaulah begini tahap intelek menteri yang ada, rasanya tak perlulah mereka ini menjadi wakil rakyat lagi.

Kalaulah kerajaan yang ada sudah tidak mampu memberi subsidi minyak, hentikan saja semuanya, jangan beri subsidi lagi, biar semua orang tanggung. Cuma jangan ambil langkah yang dangkal seperti sebelum ini.

This is a really sad state of affairs. As of to put salt to the wound, they have the audacity to say that the sand is silica, when everyone knows that it is sand for reclamation and construction.

The government has again underestimated the intelligence and knowledge of it's own people, and if they continue doing this, they will pay a very heavy price in the future.

By Mag58  on January 19, 2010 4:06 PM

Dear YAB Tun,

It is indeed no surprise to us that we are the victim of a bully but the sad thing is we are being continuously bullied by a small 'kid' called Singapore. From a no man land, Singaporean now had their own Republic even though their areas are as small as 224 sq. miles way back in 1965 when our late Tunku give-in to the pressure put on by PAP led by a young Peranakan Baba by the name of Lee Kuan Yew.

What Singapore has that we don't have? Everything they have, we do have and in fact we have extra edges as compared against them. We have abundance of raw materials, abundance labor, abundances capital/finance and know-how but yet still 'kow-tow' to this small dwarf.

I am a Singaporean before and I surrendered my citizenship coz I am fed-up with the arrogances of this Republic. I used to stay in Chinatown, an area named Outram Park. Singaporean does not have space to even plant a plot of taukeh/bean sprouts plot in their backyard coz these people do not own any backyard at all. Land is more expensive than gold. Yet their per capita income are higher than that of the western countries. They got their independence much later than us but why are they so much more advance than us? The marked differences that I can deduced between them and us is..... Singapore is a maker country and we are more of a consumer type of country. We are always contented with what we had while they are always striving for the best. They are corruption-free while we are struggling to combat corruption and are still on an uphill battle.

How I wish to have Tun to be alive for another 500 years to ramify all the ruins and discrepancies left by your predecessors and successors but this could just remain as a wishful thinking. You are the P. Ramlee of the political arena and there will never be another Tun Dr. Mahathir in this near 200-300 years. Salam Tun, have a nice day.

By irasyd  on January 19, 2010 3:57 PM

Ybhg Tun,

Jangankan SAND tak dapat dipertahankan, isu kelimah Allah pun orang kita nampak tak sehaluan. Seorang pemimpin Islam kata gini dan seorang pemimpin Islam pula kata gitu. Para pemimpin kristian senyap mungkin bagi meredahkan keadaan, tetapi kita orang islam pula keluarkan kenyataan yg nampak tak selari. Kita berdoa kepada Allah tuhan yang amat berkuasa, supaya isu kalimah Allah ini dapat di atasi dengan baik.

Dalam kes SAND para pemimpin kita kena berdiri atas satu prinsip yang sama. Jual atau tak jual.

Assalamulaikum Tun and all.

why the hoohaa..very simple ask the government to ban export of silica sand now. for Collin Ng from spore for your info the restriction imposed on selling sands to singapore bcas they reclaimed near teluk ramonia which caused congestion to the approached sea lane to malaysian naval base and pasir gudang port..so why should we sell sand to a country who used it to cause hardship to the seller?

for the water agreement which was signed by the british and johore before Tun come to power we dont have to renew it after expiry.

i urged macc/sprm now investigate and book the seller and confiscate the wealth accumulated from the sale of sands/silica.

Salam hormat Tun Mahathir

Sebahagian besar rakyat Malaysia tidak dapat merasakan kalau suatu hari negara Malaysia di perintah bangsa pendatang. Sudah banyak negara2 lain dijajah bangsa pendatang dan peri bumi kehilangan negara yang di tinggalkan nenek moyang kita.

Lihat sendiri di Malaysiakini koment2 mereka tentang artikel ini. Mereka anggap bangsa ini tidak ada otak (brainless) di tempatkan

di University dan tidak mampu mengendalikan negara. Memang bangsa terbesut paling kurang ajar, biadap dan sombong kononnya mereka hanya yang pintar. Dengan secara tidak langsung pemimpin melayu termasuk Anuar Ibrahim, Zaid, pemimpin Pas dan Umno semua "brainless"

Niat mereka jahat dan menggunakan parti Pas dan Pkr untuk agenda mereka yang tersumbunyi. Saya percaya banyak pembaca termasuk Anuar Ibrahim dan Zaid baca koment2 biadap di Malayiakini terhadap bangsa mereka sendiri di panggil "brainless". Saya berharap jagoh2 bangsa hati2 dengan perjuangan mereka.

Malaysia masih belum capai level negara maju makanya janganlah terperanjat kalau bangsa melayu mengamok apa bila hak, agama dan negara mereka terancam dengan kaum pendatang. Kebelakangan in banyak terjadi hal tidak di ingin kan setelah masalah penggunaan Allah. Perasaan rakyat yang majority tidak pernah di ambil kira sehingga mereka mengamok. Ini ternyata kelemahan unsur2 intelligence di peringkat bawahan. Dalam bidang ini Malaysia harus belajar dari Indonesia dengan masa yang singkat Nodin Top di hapuskan.

Kalau lah bangsa ini di panggil "brainless" bila lagi bangsa ini mahu bersatu dan buktikan tanpa bangsa asing masih boleh mengendalik negara Malay----sia dengan cekap dan sampai tahap negara maju.

selling sand to our rich neighbor making them richer ? After all "Someone" will benefit from this, sudah..la politician suka sangat play up rakyat to benefit their own popularity and making them Hero to the nation give us a break from all this useless plays. Singapore is not a threat to us, someone is jealous of their success in my opinion. If the Minister responsible in this matter has the gut, then BAN the export of sand to Singapore IMMEDIATELY. If it is detrimental to the economy of our country then it is only logical to act without fear and favour. Hopefully, the Minister concerned would make a statement on this issue and tell the WHOLE TRUTH whether what you said was the TRUTH! You have exposed it and now the ball is on the Minister's court to clear the matter in order to maintain his credibility. Don't take it as no issue and sweep it under the carpet.

so why it seems always other's fault in the issue? why not look into your/oneself about the capability to produce nice water for nice rakyat? malaysia has the hardware and software/talent(ie rakyat) to produce nice water for people or even foreigner! but they chose not to and alot of them leave the country(quite a significant amount leave for singapore, pathetic!), because of injustice system in malaysia, a inexcusable result of leadership under BN after so many years, and the leadership of the many "smart" PMs.

What are you implying this time?

There are traitors in Malaysian Administration working for Singapore or Malaysian got cheated again by Singapore?

State your opinion clearly and don't keep us guessing!

[By al-Din](#)  [on](#) January 19, 2010 11:55 AM

For all you know, buried cunningly in the lorries of sand are bags of heroine, emphitamines, gold, arms and what have you. Can the customs really check on that?

This is the case where enrich thy neighbour doesn't work here. They are already richer than us.

How to break the Sing's monopoly on the trade route.

1: build the crooked bridge;

2: build an east-west Panama-like canal linking Kuala Muda-Merbau Pulas-Kg Keruna-Tasek Chendroh-Kg Timor-Kg Hulu on the Kelantan River. The voluminous soil dug up can be used to enjoin Penang to the mainland, and Langkawi to K Perlis.

With those two built we can talk eyeball-to-eyeball with the Sings.

Thailand will never agree to build a canal across the Isthmus of Kra for strategic reasons to contain the trouble south and its break-away to autonomy and even independence.

Assalamualaikum Tun,

I shall just say that it is really pitiful when our very own people believed in and got into the practice of being "Penny Wise Pound Foolish" sometimes. What can one say when such beings allow themselves to be made fools of!

They talk about rights for each and everyone. They questioned, 'What's wrong with doing business with others' (supplying materials to meet the needs of any other foreign party for that matter) when there exist demands!

My question is will these same people be ever willing to part with their very own 'precious household treasures' at any time when outsiders sought for their benevolence to do so? The answer I strongly believe will be a BIG negative 'NO' with all the excuses ('in the world' as one reality artiste puts it!)being given.

Let me finish this in Malay:

Ramai orang mengamalkan sikap "HARTA SENDIRI PANDAI SAYANG". Oleh kerana pasir itu harta negara tak payah pedulilah. Apa nak jadi jadilah ... Jangan begitu kawan. Janganlah nak tunjuk konon fikiranmu terbuka sangat dalam hal-hal begini. Nanti "MENANG SORAK KAMPUNG TERGADAI".

Maaf Tun saya mengambil ruang lebih sedikit kali ini.

isu pasir ni memang meyakinkan hati, kalau Tun senang datang lah ke Telok Ramunia, Belungkor dan Pengerang Johor. Mungkinkah pasir pasir ini digunakan utk menambak Singapore? Mungkinkah Malaysia ini memang tiada harapan lagi?

Dear Tun,

Agaknya kebanyakan musuh2 masa pentadbiran Tun dahulu kini bermaharajalela mengaut keuntungan maksimum drpd kealpaan kerajaan kini. Mungkin masa Tun memegang teraju dahulu Tun telah cuba sedaya upaya untuk memantau semua petualang2 yg memperlekehkan hasil negara kita. Kenapalah agaknya mereka2 ini tidak suka berkongsi hasil2 dari bumi Malaysia ini?

Maybe they are too busy putting their money in their pocket that they forget the economical value for the other countrymen and women. What is so great of one man income compare to the entire nation needs?

Most of your enemies during your premiership are laughing their way to the Bank when our government oversee the potential of our silica as you mentioned. These people are those whom you have kicked out of your government with your wistful fist. they are consider Knick Knack to our country then and even now. They cash in their cheques at the singaporean banks and bring in the dough in big ammount of cash.

Yg Berbahagia Tun.

Tidak syak lagi penjualan pasir ke Singapura di buat secara terang-terang dengan menukar nama amnya pasir kepada nama saintifiknya silika. Undang-undang negara kita hanya mentakrif bahan

pasir sebagai bahan yang tidak boleh di jual kepada Singapura. Oleh itu selain dari pasir boleh di jual walaupun ianya adalah bahan yang sama.

Sebenarnya penjualan ini melibatkan orang-orang yang berpengaruh di Negara ini samada dari gulungan ahli politik atau dari kalangan istana.

Adalah mustahil ianya di lakukan oleh orang-orang biasa yang tiada kuasa.

Yang sebenarnya mengadai negara kita adalah orang-orang yang berpengaruh.

Harap dapat Tun memainkan peranan menghalang Negara kita tergadai sepenuhnya.

Sekian.

Dear Tun,

Any comments on the fuel subsidy?

I own a big cc vehicle... Naza Ria 2500cc.

I bought it not for leisure but untuk memuatkan 5 anak & luggage (contohnya beg sekolah kebangsaan/beg sekolah agama).

Its not fair to exclude us, yang beranak ramai ni, from the subsidy.

The same dilemma faced by my friends form ria family group.

Kalau pun nak buat kasta mengasta, I hope gomen do think about it thoroughly sebab frankly speaking, they have lost my vote.

Dont u think that orang kaya can still buy a few kancils & ganti seat belakang with an additional fuel tank to isi minyak & then suruh driver pump fuel from the kancil into their luxury cars?

Best way for me - under the spirit of 1Malaysia - is to hapuskan sama sekali subsidy ni. No subsidy means every Malaysian will be treated fairly. When its fair for everyone, peluang nak manipulate/menipu pun kurang & this can also jimatkan wang gomen as they can reduce portion provided for enforcement.

I do hope this issue can be discussed further...

Dear Tun,

This is not only happened to the sand.... it is also happened to our subsidized white sugar which has always being smuggling to our neighboring countries! I wonder if without corruption from the respective government departments, do you think the traders could do it?

[By glokaltower](#)  [on](#) January 19, 2010 9:53 AM

It is for poly-silicon processing. It is the material for IC chip and solar panel. If we do it ourselves, we need capital, technology and human resources.

Why Malaysia does not do it? It is because our leaders are not knowledgeable enough.

We sell sand to Singapore then we buy chips from them.

We sell water to Singapore then we buy treated water from them.

Why do we always sell cheap to Singapore then later on buy from them dengan harga yg mahal?

Dont we have adequate land, human resources & expertise to do everything here & sell to them the end product?

Sampai bila kita ni diperbodoh2kan oleh Singaporeans?

[By Ir. Syahrizan](#)  [on](#) January 19, 2010 9:30 AM

Asalamualaikum Tun,

One typical sand carrying truck or lorry could transport roughly 3 tonnes of sand. Assuming 500 trucks crossing our border on daily basis means that 500 trucks/day x 3 tonnes = 1500 tonnes/day. Which means in 1 month (minus Sat and Sun) about 7500 metric tonnes of sand is moved out from Malaysia into Singapore!

That amount of sand is more than enough to keep the construction project at Singapore running. It is also enough to "tambak" some land or to build another island. The next Dubai's Palm Island perhaps?

Some "middleman" is making money out from thin air, again.

Not just Sand, but how about new oil subsidy system, sugar, AP, NAP, Proton and et-cetera?

It's day and night robbery. Eventually the ones that will suffer are Malaysians themselves! \*sigh\*

Assalamualaikum Daddy Tun,

Semuga sentiasa berada dalam keadaan sihat sejahtera dan diberkati Allah S.W.T.

Kenyataan yang telah dibuat oleh Datuk Shaziman mengenai 500 buah lori pasir (atau lebih) yg penuh dengan muatan pasir dibawa ke Singapura ada benar tanpa prejudis. Saya selalu berurusan dengan pihak PTG dan secara peribadi mereka akui perkara ini memang benar belaka.

Pasir silika tidak sampai 10% manakala selebihnya adalah pasir dari sumber beberapa buah sungai dalam negeri Johor yang dijual ke Singapura setiap hari. Pihak PTG berkata jika benar ianya silika sepatutnya pihak Jabatan Galian dan Mineral yang buat kenyataan atau perakuan.

Namun mereka tidak boleh berbuat apa-apa kerana ada tangan Ghaib yang sangat besar di negeri Johor yang merelakan dan menghalalkan penjualan pasir kita yang berdaulat kepada negara yang berpaksikan YAHUDI dan BARAT demi kerana kekayaan dan kemewahan yang ditawarkan kepada mereka.

Sebagai rakyat biasa, apa yang mampu kita buat, selain menunggu hari PRU untuk menghukum mereka.

as far as i'm concerned, selling materials or goods to foreign countries like singapore at under the market value determine that the seller has no experience knowledge of business plus he/she is selling malaysia out!!!! there's no doubt this particular person has some hidden benefits received as Tun and the world has remarked that malaysia government officers are among the top-most corrupted people in the world.

it is just very sad these people can't be easily charge in courts because of their abilities to buy over the relevant authorities like the polis, customs and even judges !!! just look at the history of al capone ... he could do it so its not surprising malaysian corrupted people can't !!!! it just needs a bold judge, polis and custom to say "NO TO CORRUPTION" instead of "NO SMOKING" !!!

There is this thing call comparative advantage and competitive advantage. A country, even if it is good in everything, will find it mutually beneficial to outsource it to another country because of the concept of comparative advantage - a win-win situation.

Yes, Malaysia can produce silica, but at what cost?

How about producing steel? Oh, forgot - we did that with Perwaja Steel - and what is the outcome?

How about producing cars - oops, we have Proton - and what is the outcome?

How about Malaysia producing rockets, aeroplanes, submarines and all those high-value added stuff?

Dalam isu jual pasir ini, saya amat bersetuju dengan pandangan Tun. Kalau inilah sikap pemimpin kita, maka Malaysia tidak akan maju, dan berterusan kekal sebagai penjual komoditi atau bahan mentah sahaja. Dahulu kita jual biji timah, getah dan balak. Kemudiannya komoditi minyak kelapa sawit, minyak mentah (crude oil), air mentah ke Singapura, dan sekarang pasir. Malaysia akan hilang maruahnya apabila tanah-tanah pesaka juga dijual nanti termasuk menjual peralatan perang. Wawasan 2020 akan hilang begitu sahaja. Apa harus kita buat Tun ?

It seems that Najib's government is becoming more and more corrupt. He is emulating his mentor - the useless but cunning AAB. We should stop selling sand to Singapore because we know what it is used for - to reclaim land to expand pulau batu putih and to block our pasir gudang and ptp ports as well as our naval base near teluk ramunia. If Najib continues this corrupt practices which is basically his trade, his government will fall 110% in the coming GE13 along with his phony and lousy 1malaysia.

[By andrewtay](#)  January 19, 2010 2:47 AM

Dear Mr. Mahathir

Why only now have you realise that the Government has no idea how to do business? Why back then when you were the Head of the Government, allow the sale of crude oil/gas to be refined in Singapore and we have to buy back the finished product. Isn't this the same with our water. Sell raw water to Singapore and buy back treated water.

Tun yang disayangi ,

Thanks for your information .I can't imagine why are our ministers , government servants in charge of our valueable natural resources are so negligent in disposing off their duty .If 700 lorriload of sand and land are brought to Singapore everyday then before the year end Singapore Island will be bigger . They will annex Pulau Batu Putih to the Island proper and the Selat Tebrau will be narrower .These Officers needed further training in the Kamunting Camp for being negligence and act of treason to the country .These people are not doing their work . They shouted the slogan "1 Malaysia" but didn't know the meaning and patriotism behind it . We hope Tun can unfold their wrong doings so that the rakyat can pull them out and pave the way to the jail .Thanks Tun .

Dear Tun,

Is there a ban to sell sand (any sort of sand) to Singapore?

If we leave it the business men they will do whatever business where they can make a profit. Is it being left to the busniesses on this matter?

So, the decision must be a political one. Thereby it needs to be enforced by the relevent goverment agencies.

So what is the position now?

Konsesi Pasir & Balak lazimnya dikuasai oleh Raja Raja Melayu. Proses pengeluaran pasir & balak di uruskan oleh Pegawai Kerajaan berbangsa Melayu juga. Peniaga yg mempunyai logistik seperti sawmill, quarry lesennya lazim dimiliki oleh orang Melayu juga dan dikongsi bersama pedagang berbangsa Cina yang sama sama menjadikan Malaysia sebagai tanah tumpah dan ruang untuk mencari rezeki dan juga Empayar. Mengapa orang Malaysia sanggup membina empayar dengan membantu MUSUH yang NYATA. Singapore is NOT a good neighbor and yet we support them to gain profit for their benefits. Once Singapore developed what they wanted, it will surely effected our economy and our empire, hence why we have the POLICY not to export the sand when we don't have any POLICE to safeguard our sovereignty??

With Tun WISDOM and saya percaya Pegawai Kerajaan & Political Warlords yang menyanjungi Tun, Tun mampu memberikan guidance untuk mereka bertindak menjaga kedaulatan Negara dan menjadi POLIS kepada Negara Malaysia yang tercinta.

Hi, Tun & Others

Jika dan hanya jika ianya benar...

Ketika makan malam tadi beralaskan helaian surat khabar 2-3 hari lepas(dont pity me...i ate ikan patin buah masak tempoyak anyway..haha) saya terbaca artikel yang ditulis oleh bekas pengarah Bursa Saham malaysia kalau tak silap(saya dah buang surat kabartu pun)...Beliau menulis tentang "kepentingan strategi pemasaran dalam perniagaan" ..Sudah tentu beliau lebih fokus tentang bisnes tapi terdapat sedikit content yg rasanyer macam ada sedikit indirectly berkait dengan isu ini..

---> " Singapura mengimport beberapa buah-buahan eksotik yang mempunyai nilai komersial yang tinggi dari Malaysia, membungkusnya dengan sangat baik dan seterusnya mempromosi dan mengeksportnya sebagai produk mereka..dan mereka sangat berjaya" (good packaging in the sense of bringing up a good presentation...further= Good marketing)

Point saya:

1) Kita kaya dengan sumber alam dan tanah kita subur..Alangkah baik jika dapat menambah nilai produk kita and make more profit..Yang penting kita faham konsep pemasaran yang sebenarnya..Singapore good at it, why not we??...

2) Get/create our own niche...Sebagai contoh(hanya contoh), dalam industri kosmetik, agar sukar untuk kita hendak bersaing dengan Clinique,SKII dan sebagainya...Tapi sebagai contoh, kita mempunyai warisan formula tradisional dalam dunia kosmetik.It's not only about how we believe the ramuan tradisional will works, but most important, bringing up something good that new to others...Let's commercialize it to the max..Give it the best fancy packaging ever, and above all...with the best marketing strategies..If it's really good, result will tell then..

But anyway, if this has something to do with politic, I'm totally out of topic then(sigh..)

regards

HRS

Tun

When there's demand, there's supply. Isn't it free economy supposed to work this way? However, politicians will always have their own agenda, rightly or wrongly...retired, included. What is so wrong to sell sand to Singapore on a commercial deal, even for the purpose of reclaiming land? I think it is more wrong for one country to sell fighter jet engine to another country on the sly and it clearly shows gross act of mismanagement on the part of the ruling side. Was it inheritance

from the previous government by the present? To smell a rat, it always takes a bigger one to sense that first hand first, Tun.

[By capello08](#)  [on](#) January 18, 2010 11:03 PM

People will do lots of things for money. Some people even are willing to sell their dignity, pride and honour just because of money. Some tell lies, some cheating their own countrymen.

Some like to take an easy way out for money and will sell the country for their own glory. These people shouldn't be our leaders or administer the country. Those people who are cheaters to their race, religion and country like illegally selling sands should be tied to a lorry and driven all around the country from Perlis to Perlis Sabah. The betrayers should be prosecuted and stripped their dignity to deter others from doing the same shameful act.

What a joke in selling sands to Singapore. Don't the authorities notice the obvious?

Dear Tun Dr M,

The crime rate, non-compliance of law and greed for wealth at any cost have all escalated tremendously not only in Malaysians but all at large. Unless we be remorseful and act accordingly, we are going to be the ultimate losers. Some businessmen use their materialistic powers to get favors from whatever source. Sad to say, some politicians (can be from any political party) too use their influence and power for personal gains. All this need to be curtailed. If not Malaysia would just be another Caribbean country or one of those notorious African country.

Konsep 1Malaysia sepatutnya cakap A pasti A tetapi keadaan sekarang sebaliknya berlaku. Politik bercakap berbelit-belit, cerita dimahkamah pun berbelit-belit. Semuanya berbelit-belit, pening kepala dibuatnya. Yang bercakap berbelit-belit tu semua terdiri dari orang yang sepatutnya bercakap benar. Mereka ramai pengikut dan juga ramai orang bawahan. [By amin tan](#)  [on](#) January 18, 2010 9:59 PM

Dear Tun,

We should sell anything saleable to anybody who is willing to buy at the agreed price. If we do not sell our sand to Singapore, they can buy from Indonesia, Cambodia or Vietnam. What they do with the sand is none of our business. We are doing a perfectly legitimate business by selling sand to Singapore unless we have some political reason like wanting to embargo Singapore. Then it becomes illegal for whoever sells anything to Singapore.

In this case, we have to be practical as long as the sale and purchase is legitimate and both sides are happy, the trading should continue. The price should be of market equilibrium depending on supply and demand or the skill in negotiation and other factors. In the case of Malaysia selling raw water to Singapore, the price was preposterously cheap and maybe this is due to our negotiator not being smart enough or other factors like corruption is involved.

amin tan

Assalamualaikum and Hye everybody...

Dear Tun,

Certainly... someone is not applying LAW to the large number of rich and powerful people that have violated our Constitution and plunged the nation into economic disaster... Someone is/are not placed into the justice system after they have misbehaved and have broken the law in the past... Someone is doing his rhetoric when he refuses to enforce the rule of law for past actions by some of the most powerful people in Malaysia...

Come on!!! Who gave the "go" for 500 trucks carry sand from Johor to Singapore..? Surely its politicians!!! Plus it is a silica sands and can be used to make microchips... Microchip is a miniaturized electronic circuit consisting mainly of semiconductor devices, as well as passive components... We also call it as integrated circuits (IC) and are used in almost all electronic equipment in use today and have revolutionized the world of electronics...

We have a raw material and we have the knowledge - then build it!!! The Prophet Muhammad (peace upon him) was a politician as well as the messenger conveying the risalah, murabbi - teacher, Qadi - Chief Justice, Head of the nation and Imam of the ummah... The Khulafa' al Rasyidun - the rightly guided leaders who succeeded him were also politicians following the Sunnah - way of the Prophet, establishing just administration, practising ihsan - the betterment of good and providing the leadership of 'ilm - knowledge and Iman - belief... But what is our politicians..? Anyone can describe..?

p/s: Holy Quran state a loootttt of things about the Jews... Perhaps we can learn something from them since 1500-3000 years ago...

-----

The Kingdom of Judah existed at two periods in Jewish history. According to the Hebrew Bible, a kingdom emerged in Judah after the death of Saul, when the tribe of Judah elevated David (pronounced as Daud in Holy Quran), who came from the Tribe of Judah, to rule over it. After seven years David became king of a reunited Kingdom of Israel. During this period, Jerusalem became the capital of the united kingdom.

SALAM KASIH DAN SAYANG  
AYAHANDA RAKYAT TUN  
IZINKAN,

2. I thought we had stopped selling lorry loads of our land to Singapore. But my friend explained that the sand is not sand. It is silica sand.

IF WE WERE NOT MISTAKEN, MUSA HITAM DID MAKE A STATEMENT DURING OSMAN SAAD (ALLAHYARHAM) MB'SHIP THAT SAND IS PROHIBITED FOR EXPORT TO SINGAPORE.

WE HAD TO ABANDONED OUR PLANS THEN I.E. TO SHIPPED SAND TO SINGAPORE AFTER SO MUCH COSTLY EFFORTS HAD BEEN MADE BY OUR ASSOCIATES AND THEIR SINGAPORE COUNTERPARTS.

EVER SINCE WE NEVER RECALLED THE CABINET UPLIFTING THE BAN. PERHAPS, SILICA SAND WAS NOT INCLUDED IN THE BAN.

SOMEBODY SURELY KNEW THE LOOPHOLES.

ALFATIAH, AMIN.

By pakbelalang  on January 18, 2010 8:38 PM

Dear Tun,

Yes, yes, yes! Somebody is not telling the truth. Make no mistake about it. The Minister who gave the statement was not doing his homework.

Those who gave the information to the Minister must be giving false information for their vested interest.

Nampak gaya tak habis-habis negara kita kena jual. Masih lagi tak sedar diri. Hancur negara !!!!

Dear Dr M.

I read you blog with some interest from time to time. I'm a guest in your country, so please take this comment whence it comes.

Wasn't there a time when Malaysia actually fabricated the chips to which you refer? Seems to me many of your initiatives have fallen by the wayside, for reasons I will never understand.

Also, I can't quite get my head around the animosity that appears to exist between Malaysia and Singapore.

PETRONAS has an admirable philosophy - their nobles oblige. Is it not incumbent on the bigger neighbour to help its smaller cousin?

Sincerely

Stuart

[By rm\\_mommy](#)  [on](#) January 18, 2010 8:04 PM

At last, someone willing to discuss this.

You are right Tun, if you are diligent enough to stand near Tanjung Puteri checkpoint, you can see every other lorry carries sand to Singapore. The Johorean are sick of the lyings, Singapore doesn't have that kind of industry that needed that much sand. Except for construction.

The politicians got to do something, a mere cab driver in JB pointed out to me about the lorries (large ones) and the lies. The number of lorries crossing the causeway are too large to cover.

[By aah](#)  [on](#) January 18, 2010 7:42 PM

Ybhg Tun,

Since The Johor Government and Federal Government can't stop the selling of sand to Singapore it's best that Najib sell of Johor to Singapore and if still not enough then sell the whole country to Singapore.

Malaysia will be deleted from the world map and all of us will be known as Singaporean.

Making silicon wafers is very different from making glass. Silicon wafers are what we call 'single crystal' silicon. What this means is that all the silicon in the wafer is aligned in a single direction, and a very specific direction at that. Glass on the other hand, is totally random. After making this silicon, the ingot has to be cut wafer thin. Again, it requires very precision cutting. Not to mention, all of it has to be done in a clean environment.

So, you are right in that processing wafers is a very lucrative business. However, the necessary technology to do it is not like glass making. (= We need the necessary equipment, expertise and experience. However, the more lucrative business is up the value chain, making actual silicon chips. We are behind the world market in making chips - even with Silterra.

However, we can hope to move even further up the value chain, in designing the chips. However, there are no major design houses in Malaysia as they are largely based in the west. We lack the necessary people and the weirdest thing is that our very own *government scholars* trained in chip design are put to work in non-chip design related areas instead when they return.

Ayahanda Tun,

//4. Selling raw materials gives the least return. Better to add value by processing the raw material.

5. Cannot be that difficult to produce silica from silica sand. Glass factories do that (I think) all the time. And we do have glass factories in Malaysia. Why not produce the silicon wafers and sell them to Singapore?

6. I think someone is not telling the truth.//

Let it be, how much can they survive with these raw sand's sales by pooring the State, rich-ing themselves.

This year Eclipse landed in Maldives on Jan 15, 2010 for 11 minutes and 8 seconds, it's time the Jews strikes back..... after being wonton for so many years now .....

Take care Ayahanda Tun.

The Works Minister must be working from the house (as per his draughtsmen/women are allowed!) during office hours as such that he is oblivious of daily happenings in order that decisions made are not detrimental to the country.

For a few RM more we sell sand so that the Sings can expand their coast line to narrow the Straits to Johore besides the billions of microchips can be manufactured as what the silica sand are purported for. How gullible we can be! Is Malaysia that bankrupt?

The PM is desperate for votes. Hence, he is busy with daily nitty-gritty things to show he cares which is best left to the appropriate ministries. What has he done or undone here and in Saudi Arabia to be so awarded! To show that we belong to the same club of Master Brinkmanship?

He better focus on bigger things that matters as PM in terms of security and other aspects of high national interest. Anyway, during his many absences, Nazri take to centre stage! Used to be anak rajas roaming around in the old days.

[By](#) TW79  [on](#) January 18, 2010 6:16 PM

Salam Tun.

Just a few weeks back i met my someone whom just so happened to have a brother who has strong connections with Angkatan Pemuda Keadilan. He told me that his brother is currently doing a business related to selling sand. However, he mentioned that the sand the brother was

selling was related to production of cement. Am not so sure about this. I was thinking that maybe the other way around. I always think negatively when it comes to these kind of things. I suspect maybe he is selling sand to Singapore with the cable connection from Angkatan Pemuda Keadilan. But then again maybe not.

Anyway, someone is making a killing out of selling sands to Singapore & i think we should do something about this. This is treason like selling part of our country bit by bit to another. Dont even think of what Tun Pak Lah & gang did. I smell a rat.

[By](#) Mag58  [on](#) January 18, 2010 6:13 PM

Tun,

Selling silica sand or sand per se is one and the same. Since prior to Independence day, we have been selling ALL our raw materials, I emphasized ALL our raw materials to this tiny island and prosper thy neighbor usuriously whilst we ourself earned a 'kais pagi makan pagi and a kais petang makan petang' income. Name anything.....rubber, tin,, water, sand, granite....just name it, Singapore is the Towkey and we are the 'kuli'. Until and unless your young successor do have your kind of mentality, Malaysia will remain as it is for another century to come. We have abundance of God natural gifts but we wasted it but instead let a small island benefitted from what we have. That's a disgrace. If we are that desperados, why not we 'sell' Johore' to them so that we can have easy life now and let our generation to come suffer. Well, we still have another 10 states to live in though. 'Panas!!!!Panas!!!!!!difikirkan. Korupsi berleluasa. Thanks Tun, take care and be cool.

[By](#) char koay teow  [on](#) January 18, 2010 6:11 PM

agree on point No 4. BUT we do not have the technologies, why??

i think maybe foreign investors not willing to invest in our country due to 30% shares.

Look at S'pore what the have basically no natural resources at all but the still do well in petrochemical and compare with Petronas. But the do have a lot talented people from different countries.

[By](#) Aku Pening  [on](#) January 18, 2010 6:08 PM

Salam Ybhg Tun,

The Singapore goverment need the "silica" in order to produce more microchips. After it has produce the chip, they will in return sell it back to Malaysian companies...sounds familiar?

It is the same thing as Singapore selling water back to Malaysia. It is unfortunate that we still have "hoodlums" that are not patriotic. They only want to make money for themselves regardless what Singapore is doing to us.

Malaysia have trillions cubic meters of "silicon" sand but it seems we don't have the expertise to convert this sand to microchips? What we Malaysian do have is professional "brokers" that are willing to their country for profits...are we on the right track?

Personally I feel the "croked bridge" and sand issue is not being given priority attention. We should stop all this nonsense of selling our sand to Singapore and start constructing the bridge immediately!

The goverment should ban all sand export to Singapore as it is tecnically Malaysian "land"...I wonder what would those sand brokers feels if we start digging big hole in their garden? Would they get angry?

It must be legal, if not how come lorries of sand are exported to Singapore. The point is: Who the hell made it legal to sell sand to Singapore. Not me, not you.. must be someone during Pak Lah's regime!!

Make a guest...

Aa..hah!!! who else?? Your guest is as good as mine..

Selling sand is like selling land to Singapore. Selling land is like selling Malaysia to Singapore.

[By](#) hannibalceno  [on](#) January 18, 2010 5:38 PM

salam tun.....

hahaha...

memang mentaliti orang melayu...

suka tipu bangsa sendiri....

saya tu teringat dialog filem p ramlee....

3 Abdul....

menteri disana tu penyamun....

menteri disini penyangak...

dah kena dah penyamun jual penyangak....

tapi ni bukan takat penyangak je kena jual...

habih semua dah...

penipuan dah banyak, seingat saya la...

satu masa dulu...

minyak naik dikata kerajaan tak mampu tanggung subsidi..terpaksa naik harga... habis harga

barang naik semua...semua buat pejam mata...

minyak turun bangga umum satu malaysia.... harga barang yang dah naik tak turun pun ....semua buat taik mata...

bila rakyat dok kata minyak naik.. konon nak tolong pi buat rebet minyak masa renew road tax insurans motor kereta... lepaih tu syarikat insurans pakat naik premium harga.. lagi.. semua pakat buat taik mata....

tahun ni gula naik harga... dikata rakyat malaysia banyak kena diabetes kena kurang gula.. cara paling mudah naikkan harga gula...

lepaih tu peniaga naik harga pakat pi saman tarik lesen depa...

ada pulak yang tolong buat kira kira...harga teh tarik 39 sen saja satu gelas...

bijaknya depa..ni saya nak tanya, bil ayaq depa dah kira sekali ka...

bil letrik lagi... upah pekerja lagi.. sewa kedai lagi... cukai pintu lagi...lesen niaga lagi... alam flora lagi.. indah water lagi.. pbt lagi...

kata la peniaga ambik kat tiap item ni sekupang dah jadi berapa harga semuanya.. tak ka jadi RM1.20 saja...

kalu gula naik harga.. berapa lama depa peniaga boleh bagi kita maka / minum free.. semua kos ni depa kira...

kalau nak buat kira kira pasai meniaga pi la tanya kompeni naza ka, mamak n gang ka macam mana depa letak harga...

peniaga yang letak harga bukan persatuan pengguna la...

sekali lagi memang depa nak tipu kita...  
bila cerita enjin jet hilang...  
depa kata takpa nilai dah tinggal kurang separuh harga....  
ni bukan pasai nilai, ni pasai aset negara..  
apa kalau aset negara tu kita beli RM6 juta... dah 5 6 tahun tinggal RM1 juta, sapa sapa jual pun takpa, macam tu ka?..  
saya rasa menteri semua ingat kita hidup di zaman batu belah batu betangkup kott..takpun zaman tanggang...

satu lagi saya paling benci la ni...  
sikap media kerajaan...  
memang la nama media kerajaan... mesti sokong kerajaan..  
tapi jangan buat rakyat meluat nak muntah bila tengok dan baca....  
contoh pertama...  
bila isteri pm pi melancung luar negara..  
boleh pulak jumpa harta kerabat raja...  
siap masuk paper kita...  
siap dapat reward bila pulangkan harta...  
ni dalam blog tun ni kalau ada ustaz tolong cerita kat saya..  
apa bezanya dengan saya jumpa duit RM1 dan pulang kat tuan dia...  
sama ka pahalanya.. atau ikut nilai harta ymag kita pulang balik tu nilai pahalanya????...

dan baru baru ni ada lagi cerita...  
satu phone call saja dah bebas rakyat malaysia...  
hebatnya...

saya nak cadangkan tutup ja wisma putra tu...  
dah takdak guna.. takkan nak bayar gaji buta....

melampau betoi media kita...  
kerajaan kena ingat ramai yang nak baca berita...  
bukan semua yang sokong anda...  
tapi bila ada berita sampah macam ni...  
sapa yang nak baca..

pendapat saya antara punca utama umno nak lingkup nanti selain sikap pemimpin ialah peranan media....  
memang media pembangkang tak sokong anda..  
tapi media kerajaan selalu bagi peluru hidup kat depa....  
jadi harap tok det boleh la tolong suruh depa jaga jaga...  
rasanya kalu dok macam ni jugak, umno memang tak lama...

jaga diri tun

Tun,  
Don't be fault-finding here!

You should know how the system of Cronyism works. By reporting 200 (700-500) truck loads less per day, the savings being obtained from the lesser payment of export duty (based on 500 truck loads instead of 700 truck loads) can be used to pay in terms of commission to the Umnoputra cronies.

You should know the tricks much better than any one else in Umno. But you just want to tease because the grapes which you can't pluck in lieu of the orchard owner's permission are all deemed to be sour!

...Chirpy Chirpy-Chip Chip' (possibly be Cheerpy-Cheerpy Cheap-Cheap for S'pore) : a popular song way back in mid 70's to cheer up for vietnam winning the war ! and some sad begining for a little

island in the south to live on its own after departing from malaya. We still remember the sad moment between both countries but it was opted that way and it happened as wanted. There has been a lot of saying that the island would 'sink' by time if they tend to live only by their own. Yes ! they cant live on their own somehow or rather. We care for them but they reacted in a different way as we expect them for a little goodwill. So what they do? they look for 'hunchback' ! they found a decent hunchback. Already pre-planned since oxford. To cut the story short - they did it with a quiet deal till our people didnt realise the consequences. Possible could, but deal is a deal. Damage has been done ! The hunchback now has rolled up to their expectation. Cheerpy Cheap ! cheap sand in one hand and cheap land on the other !...beautifully done hunchback ! So much silica to make chips ! Even Mr Maggoo would never belief !
