INTELLECT TIES-UP WITH NCR TO DELIVER SMART CARD SOLUTION

KUALA LUMPUR, Aug 1 (Bernama) -- Intellect, a world leader in electronic commerce, has teamed up with NCR Malaysia to deliver smart card solution to the country.

In a statement today, NCR said the partnership agreement came after Prime Minister Datuk Seri Dr Mahathir Mohamad announced the release of a Request for Proposal to implement a national smart card - the MPC (Multi Purpose Card).

MPC is one of the flagship's applications of Malaysia's Multimedia Super Corridor (MSC) and calls for the implementation of an entire smart card infrastructure within the country.

The card and the associated systems would enable Malaysians to carry out a wide range of applications that would vary from traditional electronics purse applications to acting as a driver's license and national identification card.

The Intellect/NCR partnership is a natural fit as NCR is a widely acknowledged key player in the self-service terminal arena, commanding over 80 percent market share of Automated Teller Machines (ATMs) in the country.

Intellect products ranged from smart card readers, payment systems, electronic wallets and mobile terminals to cryptographic processors that secure facilities such as banking networks. -- BERNAMA
