Unity, faith can help Malaysia minimise the negative forces

THE unknown positive or negative forces are always powerful and scary. Many people believe and practise the forces of good and evil for their own benefits. When a person is in good fortune, the negative forces of the evil can be overcome. The good will always triumph over the evil eventually. It is a question of whether you can take remedial action to overcome the evils.

The cosmic forces of Feng Shui go round and round like a "wheel of fortune". Like I have said in my previous articles, a country's fortune will also go round and round.

As I ponder what is happening to the country and what will happen, I sincerely hope that the people remember the blessings brought about by the leadership of Datuk Seri Dr Mahathir Mohamad and his Cabinet that steered Malaysia into prosperity over the last decade.

As the country's economy is threatened by "external forces", we must continue to have faith in the leadership of the country. When I talk about faith, I mean "faith in action".

As our Prime Minister unveiled the formation of the National Economic Council (NEAC) to administer the economy, the undivided support of the people will create a powerful positive force that will help to overcome and reduce the negative effect of the problems that we are facing.

Like in Feng Shui, the effect of the positive Dragon's breath or cosmic forces (alive chi) will help to reduce and minimise the negative forces of an environment and enhance the positive forces to bring about prosperity, good luck, success, honour, fame, etc.

Hence, the forces of the Malaysians with their faith in action will help to channel the positive energy and reduce the problems of the country. We must bear in mind that all Malaysians are in the same ship regardless of race, creed or religion and must have a focused mind to help the "captain and his team" to sail through the rough sea.

Now that the "captain" is having difficulties manoeuvring through the rough sea, we must show our gratitude to the man with his vision, telling him we are behind him. Put your faith in action and help the country back into where we have come thus far. Remember the People's Power in the Philippines. Faith moves mountains and faith has created many miracles in all religions. Therefore, faith is important to maintain the continuous success of the people.

When fortunes take a drastic change for the worse, people will seek divine intervention while some will consult the Feng Shui aspect of a premise to help reduce and overcome problems. It is a question of whether "you see to believe" or "believe to see". You have seen the prosperity of the country, that is why you have believed in the leadership of the country. Now that we are facing problems, we must "believe to see" these problems overcome.

Since we "believe to see", we must continue to believe in the same leadership that has made us "see to believe".

Do not burn the bridges behind you. Do not forsake those who have helped you in anyway, for the wheel of fortune will take you round and round. Today you may be poor, tomorrow you may be rich. Some of those who are rich today may be poor tomorrow.

I sincerely hope that all Malaysians will continue to stand firm and have faith in the leadership of the country.

Let the "forces of Malaysians" create powerful "chi" to help minimise the external negative forces.
