It's like praising my naughty children

Suzie Yap

I AM an ordinary housewife and am totally incensed with the arrogant Americans.

What US Vice-President Al Gore had to say about our Government and our country was absolutely unacceptable and just very, very bad-mannered.

If we were just to take a superficial glance at American presence in Vietnam and Korea we can see that all the Americans left as a legacy of their presence was division - North and South Vietnam and North and South Korea. Maybe that is the way they wanted it. After all, divided they will fall!

What about the Philippines? The prostitution trade, the drugs, the fatherless children, the poverty, the lack of progress, the lack of religious morals ...! All brought about by American marines.

They talk about human rights in China, in India, in fact everywhere but in America. What happened to their Red Indians? What is happening to their black citizens? How come their Government has so many American whites?

Gore saluted the "brave Malaysians" - those who believed in riots and demonstrations? What do they want Malaysia to become?

Perhaps, they hope for another Indonesia where "the brave" raped, looted, pillaged, burnt and did everything else except work industriously to get whatever they want?

Perhaps Gore hopes Malaysia will be like Ireland, with anti-Government forces bombing children.

Well, I would like to salute our brave Prime Minister Datuk Seri Dr Mahathir Mohamad who is the only leader who dares to stand up against proud, arrogant and big America and tells it the way it is - right is right and wrong is wrong!

America likes war and anarchy, doesn't it? After all, who are the biggest manufacturers of war weapons and equipment?

Who manufacturers and sells more guns, bullets and other weapons that take away lives?

Of course, America believes so much in itself and has become so arrogant that the only way they will "talk" to any country "diplomatically" is to threaten them with war.

Bomb the little factory in Afghanistan to supposedly root out terrorists. Bomb Iraq because Saddam Hussein dares to ask sanctions against Iraq be eased.

After all, America believes it doesn't matter if children, women and innocent people die. America is protecting the world!

So how come they took so long to prevent all the deaths in Bosnia? Of course - there is no petroleum in Bosnia!

Gore is like a visitor who is invited to dinner and stays a few days at our home.

Our children are behaving badly. We as parents scold and punish them. Our visitor then tells us that we are wrong and tells our children that they are "brave" and to go against us! He then doesn't sit down for dinner but instead goes to his room.

Moreover, he continues to stay in our home for the next few days expecting us to be hospitable hosts and continue to provide him with a warm welcome! Not in my home, he won't!
