Right on track for Commonwealth Games

STREAKING AWAY ... This Star-LRT train was spotted streaking past the Bukit Jalil Sports Complex yesterday during testing of the system's second phase. Star began testing the trains early this month in preparation for a July launch, about two months before the start of the 16th Commonwealth Games. During the event, the frequency of the trains will be controlled to match demand, operating a maximum frequency of three minutes during the Games' opening and closing ceremonies. Prime Minister Datuk Seri Dr Mahathir Mohamad is expected to officially launch the service and the complex on July 11.
