Soros just a capitalist who has sown sorrow

Kenny Y.K. Yow

GEORGE Soros, you have gained much prominence in the international media again of late, much of which was not in relation to your notoriety as a successful fund manager. This is by no means the first time that calls are made to overthrow a legitimately and democratically-elected leader.

But it is to my knowledge the first time that a renowned fund manager has chosen to behave in such a subversive manner. With such an insolent thought out of so many things that a successful fund manager can think of, one is tempted to assume that you are badly hurt financially by Datuk Seri Dr Mahathir Mohamad's policies. Well, the principle of "fair game" works both ways.

Due to your type of unscrupulous manipulation of the financial market which catalysed the present financial crisis and caused suffering to many, measured controls had to be brought against your kind; most prominently those brought by my brave Prime Minister Dr Mahathir and also, the Hong Kong authorities.

The coup de grace was when Russia defaulted on payment. Having lost billions and with your game-plan or hidden agenda put on hold out of fear that other countries might impose similar measures, you now have a lot of free time and your talks around the globe centre on the political and subversive.

My Prime Minister has effectively and directly contributed to the phenomenally rapid growth and advancement of his 22 million people in Malaysia and the people of the region, which is so culturally diverse. What have you done or produced with your billions for humankind except to cause them more suffering with your style of ultimate capitalism?

Please don't even equate yourself with Dr Mahathir, let alone try to talk him down. You should know that you are just a very manipulative fund manager who schemed to lay your hands on enormous amounts of public funds which were then used as collateral for unbridled leverages from similar-minded greedy bankers. It's just a story of the big fish eating the small - nothing phenomenal.

Having said this, I would like to state here that I'm just a private trader in the Kuala Lumpur Stock Exchange. But we are not out of action as some of you are. I'm taking the liberty here to call upon you and your associates to utilise your present free time to deeply reflect on the havoc that you have caused.

Please remember that you cannot take even a dollar or an iota of ego along with you when it is time to go. But before you do, a private apology to Dr Mahathir is called for at the least. I truly wish for such a moment and I wish you well.
