Time to stand up against predators in borderless world

Kassim Ahmad

IT is time for firm rationality, extreme courage and grim determination, not only in our beloved Malaysia but also in the present globalised borderless world of the predators.

In the early hours of yesterday, the American predators, egged on by the British and Zionist predators, have yet again launched air strikes on Iraq.

They have always wanted to finish off Iraq since their failure to do so during the first phase of the Gulf War (November, 1990 to February, 1991).

The United Nations Special Commission (Unscm) has proven to be a facade for their great power game. They have used it not to dismantle (even if illegally, why not Israel, a known nuclear power, and others?) Iraq's so-called weapons of mass destruction, but to spy on Iraq.

The American predators have also openly (and illegally and unashamedly) stated their intention of toppling the present Iraqi Government led by President Saddam Hussein.

In our country, for more than a year, the Anglo-American controlled world media has denigrated and condemned our Prime Minister for no other reason than that he would not toe their line or kowtow to them. Of course, of late, three influential members of the "Anglo-American oligarchy" (Madeleine Albright, Al Gore and George Soros) had outrightly called for the toppling of Datuk Seri Dr Mahathir Mohamad.

It is one and the same predatory family, acting desperately to save and prop up their fast-sinking world dominance.

Events of the previous 10 years have shown that these oppressors acted without regard for Almighty God, in whom they do not believe. Be sure that they are destined for severe punishment!

Many of us often forget that evil exists side by side with good and that it is our duty to fight determinedly against evil at all times.

Our failure to do so and our inclination to compromise with evil have brought us to this state of chaos in the world.

Malaysians should be grateful that we have a leader who doggedly pursues our national agenda, at least for a year now, in the face of near-total censure by the Anglo-American controlled so-called international community.

We should be thankful for brave leaders and personalities in the Third World and elsewhere, including in the United States and Europe (one who should be mentioned is famed American economist and political thinker Lydon LaRouche Jr) who have for more than two decades stood up against this world oligarchy and strove for a better world that surely is about to be born.

God be praised!
