Lecture on how to produce Nobel laureates

KUALA LUMPUR, Wed. - A lecture titled, "The Nobel Prize - Its Organisation and Strategies for Developing Countries to Produce Their Own Nobel Laureates in the Future" will be presented by president of Royal Swedish Academy of Science Professor Jan S. Nilsson at the Academy of Sciences Malaysia on Friday.

The president's visit, on the invitation of the Academy of Sciences Malaysia and the Embassy of Sweden, is to offer a closer insight of the organisation and management of the prestigious Nobel Laureates award.

Prime Minister Datuk Seri Dr Mahathir Mohamad had recently challenged the Malaysian scientific community to produce a Nobel Prize Laureate by the year 2020.

The lecture is to expose the scientific community on the selection process.

For more information, call Hazami Habib at 03-2949898.
