Proton's success a bouquet for Dr M

K. Nagaratnam

BETWEEN 1948 and 1960 while I was working in the Chief Accountant's Office, Malayan Railway, Kuala Lumpur, I used to distribute application forms for car loans to railway staff who wanted to buy cars for their own use. In the application forms there was a special clause printed as follows:

"Loan is being granted to purchase a British car only."

Last week, I read in our newspapers that "Consumer surveys show Malaysian car is one of the most reliable. Proton rated highly in Britain".

This indicates the quality of Malaysian cars is being appreciated by the British who were supplying their cars to us in the good old days.

The credit should go to Datuk Seri Dr Mahathir Mohammad our Prime Minister. It was his vision of Proton, which has become a reality and a pride to Malaysia.
