MIGHT-DIRECTORY

MALAYSIAN AEROSPACE DIRECTORY TO BE PUBLISHED IN MAY

KUALA LUMPUR, March 25 (Bernama) -- Malaysian Industry-Government group for High Technology (Might) will produce the first ever directory of aerospace related companies and organisations in Malaysia.

In a statement here, Might said that the directory covers information on core business, sector of involvement and production development in terms of design capabilities, process improvement, research and development (R&D) and facilities available.

The directory is set to be launched by Prime Minister Datuk Seri Dr Mahathir Mohamad this May.

The organisation added that the directory is a continuation and complements the National Aerospace Blueprints which provides the direction and targets to be achieved for the aerospace industry in Malaysia.

Apart from providing database and information on local companies involved in the aerospace industry, Might hopes the directory would provide linkages and networking among the local players as well as potential foreign investors.

In ensuring a comprehensive and detailed directory, Might is inviting all related companies and organisations to participate in this project. --
