MDC-LUCENT

MDC TEAMS UP WITH LUCENT TECHNOLOGIES TO ORGANISE TECHNOLOGY FORUM

KUALA LUMPUR, Sept 9 (Bernama) -- Multimedia Development Corporation (MDC) and Lucent Technologies will team up to organise the first "MSC-Lucent Bell Labs Technology Forum 2000" which will be held here on Nov 7 to discuss trends and issues facing the global information technology industry.

The one-day event, designed to be a showcase of key speakers and prominent personalities, was mooted during a meeting held in March this year between Prime Minister Datuk Seri Dr Mahathir Mohamad and Ben J.M. Verwaayen, vice chairman of Lucent Technologies Inc, a leading global telecommunication equipment supplier and solutions provider.

"This sharing of ideas meeting touched upon the future of the Multimedia Super Corridor (MSC) and the technological contributions that Lucent can continue to make to help realise the full potential of the MSC vision," said MDC in a statement here today.

MDC said the technology forum is part of Lucent's commitment to help develop the MSC as an international hub for the development of information technology.
