

PM hopes info from Swiss can help in Perwaja probe

STAR 13.2.2001
KOTA KINABALU: Datuk Seri Dr Mahathir Mohamad is hopeful that information provided by Swiss authorities would help in the Anti-Corruption Agency's probe into the alleged mismanagement of Perwaja Steel.

"I hope there is a solution. The information we are getting from the Swiss can result in some action," he said when asked if he was hopeful of a solution to the investigations.

Dr Mahathir added the investigations were on the previous management of Perwaja.

"But as far as Perwaja is concerned, it is a different issue. We want to revive Perwaja. The Government has decided to find some way to privatise it," he said.

On whether there had been any takers for Perwaja, Dr Mahathir said there had been some interest.
