Three principles for students

KUANTAN, Thurs. - Students of Mara junior science colleges (MRSMs) have been urged to subscribe to three principles in order to compete with students of other races under a meritocracy system.

President of MRSM Former Students Association (Ansara) Mukhriz Mahathir said they must have a goal in life, work hard and must be sincere in the quest for education.

"I am confident that if they were to subscribe to these principles, they can excel in all fields, be it academic or co-curricular activities," he said when opening the excellent award presentation ceremony and Kuantan MRSM Parent-Teacher Association meeting.
