

Special bonus for TM Net customers

STAR - 13 Oct 2004

PETALING JAYA: TM Net Sdn Bhd broadband customers are in for a bonus.

Come Nov 1, the Internet service provider will upgrade all Streamyx broadband users on its 512Kbps (kilobits per second) package to faster 1Mbps (megabit per second) connections, at no extra cost.

Streamyx 384Kbps users are also being upgraded to 512Kbps connections.

Upgrading works are currently in progress in high traffic areas, with the rollout to all areas scheduled for completion

by the end of the month, according to TM Net chief executive officer Datuk Baharum Salleh.

"We're committed to enhancing the affordability of our services so that more Malaysians would be able to enjoy high speed Internet access," he said.

Subscribers of TM Net's Streamyx 512Kbps package currently pay RM88 a month for the service, while the 384Kbps package costs RM66 a month.

Existing TM Net customers

who subscribe to faster, more expensive enterprise and corporate packages will also enjoy similar upgrades in the coming months, Baharum said at the launch of TM Net's special edition *prepaid ONE* CD featuring a tribute to former Prime Minister Tun Dr Mahathir Mohamad.

The CD contains multimedia content and applications on Dr Mahathir's achievements, life and times.

TM Net is the country's largest ISP, with nearly 1.8 million dial-up subscribers and over 170,000 broadband customers.
