High time for people to demand justice for Palestinians, Arabs

M. Tamin

THE massive anti-Tun Dr Mahathir Mohamad backlash arising from his now world famous speech at the Organisation of Islamic Conference Summit in Putrajaya recently is so telling of how the Western-European establishments have come under the suffocating influence of the international Jewish lobby puppeteering.

And Dr Mahathir is absolutely spot on in asserting that their furious outbursts stem from their attempt to camouflage their embarrassment of being completely subservient to the Jewish lobby.

I have great respect and admiration for good Jews some of whom I have had the good fortune to meet - fellow graduate students and professors at Stanford University and University of Minnesota and others at various economic conferences and seminars the world over. I remember fondly the Emanuel family (Jewish) who took me into their home while I was looking for a place to live in Stanford.

There is another group of Jews, though in the minority, who can be categorised as spinmeisters who have proclaimed themselves to be the guardians of the holocaust memory. Their presence is all-pervasive in every important institution in the West, particularly in the US.

In the context of good Jews, I would like to highlight the contribution of Norman J. Finkelstein, a writer and professor at the City University of New York. In his fairly recent book, *The Holocaust Industry*, he exposes the devious ways in which the self-proclaimed guardians of the holocaust memory have employed to position it in American culture.

These masters of spin have successfully placed Israel as a strategic asset of the US and indeed she has been appointed sheriff by the US to subjugate the Middle East Arab states, even though, according to Finkelstein and many others, Israel is a country with a horrendous human rights record.

Finkelstein and indeed others, with an exhaustive array of empirical evidence, co-gently argue that the exploiters of the holocaust have deviously propagated the ideology that all gentiles of European descent have sinned against Jews and indeed that the holocaust is a Jewish franchise. The European Americans, even though innocent of the holocaust, have somehow been duped to internalise this ideology.

The holocaust industry has in fact become an outright extortion racket in the name of world Jewry, dead and alive, laying claim to holocaust-era Jewish assets throughout Europe, fittingly called the last chapter of the holocaust.

Add to it the multitude of fiction glamorised by Hollywood, controlled by you know who, and there you have the most successful ethnic group the world has ever known cast forever as a persecuted lot.

Speaking of humanity's sufferings, it is time to consider the plight of the Palestinians and now the Iraqis, all of which have their roots in the Jewish master plan for the expansion of Israel, the subjugation of the Arabs, and the control of Arab oil wealth.

It is high time for responsible people to demand justice for the oppressed Palestinians and Arabs.
