Lima showcased our capabilities, potential

Mohd Arshad Raji

THE recently concluded Langkawi International Maritime and Aerospace exhibition is a fitting farewell to its architect, Datuk Seri Dr Mahathir Mohamad.

The interesting point made by the Prime Minister is that the exhibition has realised the nation's potential as a manufacturer of technologically advanced military hardware. If it hadn't been for his vision, the nation would not have ventured into such high-tech industries.

I can now appreciate that the nation does not lack technical skills or knowledge to develop and manufacture sophisticated military hardware.

All that needs to be done is to harness this expertise and to decide the course to take in the development and the manufacture of all types of military hardware.
