Staying united the best gift

Dr A. Mustaffa Babjee

WHAT would we give a man who has already been showered with numerous awards, received global recognition, continuous praises and numerous material gifts?

Ask the man. I dare take the gamble that the answer will be remain united and continue to work hard for the country. This is the best retirement gift we can give and promise the man, for his incalculable contributions to practically every sector of the country's economic, social and political advancement.

It is only human that when you love or admire someone you want to demonstrate it in one way or another. The most common manner would be by presenting some material gift. As a human being I am sure Dr Mahathir Mohamad appreciates and enjoys receiving gifts from sincere people or organisation but why not give him something that he has been working on for the last 27 years - to make Malaysia strong and stand tall.

Dr Mahathir's dream is to see Malaysia and Malaysians succeed in acquiring and applying knowledge in everything, particularly in science and technology. Part of his dream, has come true. Now let us work together and complete his dream (mission) as our permanent gift to him, which is in reality, a gift to all of us and our children.
