

# Book on Dr M's part in nation's progress

AN objective analysis of the Prime Minister's contributions to national economic development will be recorded in a publication entitled *Dr Mahathir's Era — His Contribution to National Economic Development*.

The book will be written in English and subsequently translated into Bahasa Malaysia. Both versions are expected to be ready before the year's end.

According to Mr Jimmy H.K. Low, co-ordinator of the project being undertaken by International Investment Consultants, the book will also focus on current and national issues.

The book, he said, will carry an exhaustive interview with the Prime Minister by a well-known journalist, to which Datuk Seri Dr Mahathir has already given his consent.

"A distinguished panel of writers and academicians will also be writing on various facets of the country's development and the fillip given to economic growth by Dr Mahathir's policies," he said. "It is our aim to make this publication a memorable one which people will be proud to add to their personal libraries."

Mr Low said the company's aim is to put on record the various initiatives and new directions taken by Dr Mahathir and his administration to accelerate economic development of the country.

Heading the team of researchers and writers to produce the book will be Dr V. Kanapathy, former economic adviser to the UMBC.
