Smallholding:- *Area, contiguous or non-contiguous, aggregating less than 100 acres, planted with rubber or on which the planting of rubber is permitted and under a single legal ownership.*

Ownership:- *Estates have been classified by their legal status i.e. into Public Limited Company, Private Limited Company, Partnership, Individual Proprietorship, Government-owned and Co-operative.*

Citizenship:- *Citizenship refers to the citizens who hold the majority (51% and above) of the share capital in the establishment (estate).*

OIL-PALM ESTATES

Oil-Palm Estates are listed by industry, by State and individual reference numbers e.g. 1211 03 - 008.

The first set of digits is the Industry Code. This industry classification adopted is the Malaysian Industrial Classification, 1963 (Revised 1967), published by the Department of Statistics. This classification system generally follows the Revised International Standard Industrial Classification (I. S. I. C.) issued in 1958 by the United Nations under "Statistical Papers - Series M. No. 4 Rev. I" with modifications to suit local conditions. Each establishment is classified according to this classification. In the case of a multi-activity establishment it is classified according to its main activity. The industry code to be found for Oil-Palm Estates in Volume I is as follows:-

1211	*-*	*Oil-Palm Estates without an Oil Mill.*

The second set of digits is the 2 - digit State Code and they are as follows:-

01	*-*	*Johore*
02	*-*	*Kedah*
03	*-*	*Kelantan*
04	*-*	*Malacca*
05	*-*	*Negri Sembilan*
06	*-*	*Pahang*
07	*-*	*Penang and Province Wellesley*
08	*-*	*Perak*
09	*-*	*Perlis*
11	*-*	*Selangor*
12	*-*	*Trengganu*

As in the case of Rubber Estates, the final set of digits is the individual reference number.

Thus the reference 1211 - 03 - 008 would mean that the estate is an Oil-Palm Estate without an Oil Mill (1211) and is located in Kelantan (03) and its individual reference number is 008.

The employment code for Oil-Palm Estates is similar to that for the Rubber Estates.

RUBBER DEALERS

Rubber Dealers are classified by the one-digit State and one-digit District Code and by individual reference numbers. For example the reference 07 - 039 would indicate that the Dealer is located in Kuala Selangor (04) and its reference number is 039.

Section B – Mining Industries

Introduction

This section covers all Malay-owned Mining Establishments in West Malaysia.

SOURCE

Information regarding the names, addresses and employment sizes of establishments is obtained from the Census of Mining Industries 1970, West Malaysia, conducted by the Department of Statistics.

CODES

Similar to the Oil-Palm Estates found in Section A of this Volume, Mining Establishments are listed by industry, by State in which the mine is located and by individual reference numbers. For example 2222–05–082 would mean that the establishment is engaged in tin mining other than dredging (namely, 2222 which also includes Gravel Pumping, Sluicing, Hydraulicing, Open Casting and Underground Mining); the mine is located in Negri Sembilan (05) and its reference number is 082.

The 2 – digit State Code and the Employment Code follow that found in Section A.

DEFINITIONS

(i) Mining and Quarrying: The Malaysia Industrial Classification (1967), has defined Mining and Quarrying as "Extraction of minerals which occur in nature as either solids, liquids or gases. Underground and surface mines, quarries and oil-wells, with all supplemental operations for dressing and beneficiating area and other crude materials, such as breaking, milling, washing, cleaning and grading, are included; also prospecting for minerals, and preparing sites for extraction".

(ii) The Establishment: The United Nations Statistical Office defines the establishment as "ideally, an economic unit which engages, under a single ownership or control, i.e. under a single legal entity, in one or predominantly one kind of economic activity at a single physical location".

Section C – Manufacturing

Introduction

This section covers all Malay-owned Establishments engaged in the various manufacturing industries in West Malaysia. Information to be found includes the names and addresses of establishments by industry, State, individual reference numbers, employment size and main products manufactured by each of the establishments.

SOURCE

The names and addresses of the establishments refer to the position as at 31st December, 1970. They are compiled from information from several sources, namely from the Registrar of Businesses, Registrar of Companies, Registrar of Co-operatives and the various Government Departments. The main source of information is the Registrar of Businesses. Under the Registration of Businesses Ordinance 1957, all business establishments including those engaged in manufacturing are required to register with the Registrar of Businesses. The only exceptions are those owned by incorporated companies, Government and co-operative Societies or very small manufacturers like artisans, household craftsman or those operating from domestic premises who do not engage an employee or display their products for sale.

Lists of manufacturing establishments owned by Government, Co-operatives and Incorporated Companies are supplied by the appropriate government departments, the Registrar of Co-operatives and the Registrar of Companies respectively. This list of the names and addresses is checked against the list of establishments obtained from the Department of Machinery. Under the Factories and Machinery Act 1967, 'no person shall install or cause to be installed any machinery except with the written approval of the Inspector' (of Factories and Machinery). Information from this source is very comprehensive. This list thus built up is updated from further information obtained from these sources e.g. closure, change in address, change in name, etc. and from information obtained in the course of the annual surveys and quinquennial censuses conducted on the manufacturing sector by the Department of Statistics. Information regarding employment size and main products manufactured is the result of the latter.

DEFINITIONS

The definition of manufacturing used in this Directory follows that of the International Standard Industrial Classification of all Economic Activities published by the Statistical Office of the United Nations.

'Manufacturing is defined as the mechanical or chemical transformation of inorganic or organic substances into new products whether the work is performed by power-driven machines or by hand, whether it is done in the factory or in the workers' home and whether the products are sold at wholesale or retail. The assembly of the component parts of manufactured products is considered manufacturing except in cases where the activity is appropriately classified under construction. Establishments primarily engaged in repair work are included and classified according to the type of product repaired.'

An establishment as defined in Section B may differ from a company or an enterprise. A company in statistical usage is defined as a single legal economic unit but which may operate at more than one lcoation i.e. it may have more than one establishment. An enterprise on the other hand may cover several economic activities operated under a single ownership and control and may consist of more than one company.
