EXPLANATORY NOTES

1. Registration Area

The Statistics in this publication relate to the import and export trade of West Malaysia by land, sea and air for the period stated. West Malaysia comprises the States of Perak, Selangor, Negri Sembilan, Pahang, Johore, Kedah, Perlis, Kelantan, Trengganu, Penang and Province Wellesley and Malacca.

2. Merchandise Covered

In these statistics "merchandise" includes goods imported and exported on public account, i.e. Government, Municipalities, etc., as well as on account of enterprises and persons, but excludes:

(a) gold and issued currency notes and coins;

(b) goods imported and exported on the account of the non-Malaysian Armed Forces;

(c) personal effects of passengers, other than migrants, for their own private use;

(d) exposed cinematograph films imported or exported on a rental basis;

(e) stores and fuel supplied to West Malaysia ships and aircraft;

(f) goods imported and exported on behalf of diplomatic services;

(g) ships, aircrafts and military weapons imported by Malaysian Government.

3. Definition of Import, Export and direct transit

For the purpose of these statistics:

(a) goods are regarded as imported when they are brought into the registration area whether direct or into bonded warehouses, by land, sea or air from places outside the registration area, except that

(i) goods in direct transit and

(ii) fish and other marine produce landed from fishing vessels direct from fishing grounds are not regarded as imported

(b) goods are regarded as exported when they are taken out of the registration area whether direct or from bonded warehouses, by land, sea or air to places outside the registration area except that goods in direct transit are not regarded as exported

(c) goods are regarded as in direct transit when they are brought into the registration area for the sole purpose of transport to another country and remain in the custody of shipping or aircraft agents or Port Authorities while in the registration area

(d) no distinction is made between imports for consumption and imports for re-exports.

4. Imports and Exports of ships and aircraft

Details of commercial and private ships and aircraft are included in the Statistics if:-

(a) they arrive as merchandise, under their own power or otherwise, from abroad to an owner in the registration are, or;

(b) they leave as merchandise, under their own power or otherwise, consigned to an owner outside the registration area.

5. Method of Collection

Importers and exporters are required to prepare an import or export declaration in respect of every consignment of merchandise imported or exported. Import and export declarations are verified by the Customs Department. In verification, use is made of suppliers' invoices and such other supporting documents as may be available.

Declarations in respect of consignments by road and rail are collected at the frontier of the registration area by the Customs Department.

Parcel post statistics are collected through the Postal Authorities.

Details of stores and bunkers loaded on board for non-Malaysian Ships' and aircrafts' own consumption are obtained from ships' and aircraft agents.

6. *Period Covered*

Import declarations for non-dutiable goods must be lodged within 10 days of the arrival of a ship or aircraft; in the case of dutiable goods the maximum period allowed is 1 month. In both cases, goods must remain in the custody of the Customs Department until declared. For exports, declarations must be made before goods are exported.

In consequence, the monthly import and export figures are compiled from documents received from ships' and aircraft agents during the month and not according to the month of arrival or departure of the ship or aircraft. Exceptions are made in the case of rubber and tin, where import and export figures relate to the actual quantities imported and exported during the month according to the date of arrival or departure of the vessels.

7. *Classification of Commodities*

The commodities included in these statistics are classified in accordance with the "Malaysia Trade Classification", which is based on the Standard International Trade Classification (Revised) and Brussels Tariff Nomenclature. Modifications have been made to meet local requirements.

8. *Description of Commodities*

In this publication the statistical tables have been reproduced by offset Lithographic process direct from Computer prints produced by punch card machines. This made it necessary to abbreviate the description of certain commodity groups, divisions and sections. While the abbreviated descriptions are intended to be self-explanatory, full descriptions are given in the "Malaysia Trade Classification". In addition full descriptions of groups division and sections are shown on (i), (ii), (iii) and (iv) herein.

9. *Index to Commodities*

In the alphabetical index to commodities, a code number is entered against each commodity listed. This index is applicable to the detailed tables where, for ease of reference, commodities are arranged in numerical order of their code numbers.

The index is by no means exhaustive and it lists out only the more important commodities entering the West Malaysian trade. The commodities are listed under their substantive names, for example, "parboiled rice" will appear under "rice" and not under "parboiled". Commodities for which individual trade figures are published are shown in bold prints in the index, and those which are grouped under general headings are shown in ordinary print.

In the import and export statistics showing details by commodity, the description of a commodity will only appear if there are, in fact, figures of trade in respect of that commodity. It follows, therefore, that some commodity headings listed in the Malaysian Trade Classification, 1969, or indicated in the alphabetical index herein may, through absence of trade, be omitted from this publication.

10. *Quantities and Values*

Quantities are not recorded in respect of all goods, but where goods are required to be entered by weight, the quantities given represent the net weight of the goods i.e. excluding packing and containers.

The Units of quantity are in English standard weights and measures, e.g. the ton is 2,240 lbs. Avordupois and the gallon is the Imperial gallon.

Exports are valued f.o.b. i.e. the value represents the cost of the goods to the purchasers abroad up to the point where the goods are deposited on board the exporting vessel or aircraft. Export duty is therefore included.

The value of imports is at the c.i.f. value, i.e. the value on arrival including the cost of the goods, f.o.b. the frontier of the exporting country plus any sums spend on their insurance and shipment to the Malaysian Port of discharge. Customs duty and other import charges payable in West Malaysia are not included in the value of imports.

Goods on consignment are valued at the latest import or export value of such goods depending on whether the goods are being imported or exported on consignment. The values are shown in Malaysian dollars. For purpose of conversion the Malaysian dollar was valued at 2s. 4d. sterling until 18th November 1967 and 2s. 8 3/5d. thereafter.

Unissued bank notes and coins are shown at their value as goods, e.g. c.i.f. value on import. Up to the year 1966, imports and exports of less than $100 in value (trade with Singapore only) are compiled by value and section only and not separately by individual items. The total of such imports and exports is included in the tables at the beginning of this publication. For the year 1967, however, these have been compiled in detail.

11. Country of Origin and Destination

Imports wherever possible are compiled by country of origin, which is defined as the country in which the goods were given the form in which they are finally imported into West Malaysia. If information regarding the country of origin of goods via Singapore is not available, such imports are included under the figures of imports from Singapore i.e. under the same category as goods manufactured in Singapore.

Exports wherever possible are compiled by country of destination which is taken as the country where it is intended that the goods be consumed so far as this can be determined at the time of export. If information regarding the country of destination of goods via Singapore is not available, such exports are included under the figures of exports to Singapore i.e. under the same category of goods consumed in Singapore.

For bunker fuel and stores supplied to ships and aircraft for their consumption, the country of registration of the ship or aircraft is taken as the country of destination.

For second-hand goods where the country of origin is not ascertainable, the country of shipment is recorded.

A complete list of the countries included under each country group can be found on Page V and VI.

12. Correction of Errors

Any inaccuracies which may be disclosed from time to time are corrected in the cumulative totals of subsequent issues. The Chief Statistician, Malaysia is dependent to a large extent on users of these statistics to bring apparent discrepancies to his notice and while all resonable steps are taken to present accurate figures in the first instance, he would appreciate any information or queries received from outside the Department in this connection.
