Pindaan2 juga selalu di-lakukan kapada angka2 yang telah di-terbitkan; kadang2 dengan tidak di-beri notis oleh sebab terlampau banyak angka yang di-pinda, dan tiap2 satu-nya tersangat kechil, walaupun nilai ka-semua-nya mungkin berharga. NOTES

The statistics published in this Bulletin relate only to West Malaysia (formerly known as the Federation of Malaya) unless stated to the contrary. West Malaysia consists of the States of Kedah, Perlis, Kelantan, Trengganu Perak, Selangor, Pahang, Negri Sembilan, Johore, Malacca, Penang and Province Wellesley, " Pan Malayan " figures would include Singapore.

Some tables have been compiled from statistics published or supplied by other Departments.

The latest statistics available are published each month including revision of provisional figures. Amendments are also frequently made to figures already published; sometimes no notice is given of these as they are too numerous and too small individually although their cumulative effect may be appreciable.. The current month's figures are not always received in time for inclusion. In most cases unchanged tables are repeated for convenience of reference.

Port tonnage figures for the port of Penang had been amended from September, 1961 onwards. Figures prior to September, 1961 were compiled from data received direct from individual Agents in freight tons. Whereas from September, 1961 the figures were supplied by Penang Port Commission in deadweight tons and coverted freight tons.

Exports, unless stated as net exports, include re-exports. The value of exports is the f.o.b. value, i.e. the value represents the cost of the goods to the purchaser abroad up to the point where the goods are deposited on board the exporting vessels or aircraft. The value of imports is defined in the Customs Ordinance, Section 2 as follows:- "The price which an importer would give for the goods on a purchase in the open market if the goods were delivered to him at the place of payment of duty and if freight, insurance, commission and all other costs, charges and expenses (except any customs duties) incidental to the purchase and delivery at such place had been paid."

Goods in transit from one foreign country to another, which remain, while in the States, in the custody of shipping agents or Port Authorities, are not included in the trade statistics of imports and exports.

Rubber imported from Thailand by road or rail for transhipment and re-export at Penang and covered by a Through Bill of Lading, is not recorded in West Malaysia trade statistics either as an import or re-export.

During 1954 the value of goods transhipped at Singapore was included under Direct Foreign Trade. Commencing January, 1955 transhipped goods are included under the Singapore trade. To make the figures for 1954 and 1955 comparable the value of rubber and tin transhipped during 1954 has been deducted from the Direct Foreign Trade and included under Singapore trade. Separate figures covering the transhipment of commodities other than rubber or tin were not compiled and cannot therefore be deducted from the Foreign trade. These figures are however negligible amounting to approximately $ 5 million for imports and $ 7 million for exports monthly.

The Consumer Price Index which is based on the Laspeyres Index formula measures the average changes in prices of a fixed basket of goods and services which represents the expenditure pattern of the average household in Peninsular Malaysia with 1967 as the base year. The set of weights used in the index is based on estimates of private consumption expenditure in the National Accounts for 1967. Prices of about 700 items are used in the computation. These are obtained monthly from approximately 3,400 retail outlets spread over 90 urban and rural towns.

Table 4.4 is compiled from figures reported in the Monthly Rubber Questionnaires submitted to this office by all rubber estates in West Malaysia every month. These figures differ form the Department of Labour rubber estates employment figures given in Tables 2.1, 3.1, and 4.1 in that the Department of Labour figures are based on a sample survey taken for July, 1962.

The Chief Statistician will be glad to receive suggestions for the improvement of this Bulletin and to have his attention drawn to any errors or omissions.

Catitan:- Perangkaan-perangkaan ini tidak meliputi semua pengisar-pengisar beras di Malaysia Barat. Mereka meliputi hanya pengisar-pengisar beras perdagangan iaitu kilang-kilang yang mengisar padi-padi yang di beli, termasuk pengisar-pengisar yang bekerja dengan Kerajaan. Pengisar-pengisar bekerja dengan cara "Upah" adalah di kecualikan.

Note:- The Statistics do not cover all rice mills in West Malaysia. They cover only commercial rice mills, i.e. mills which purchase the padi they mill. Including mills working on Government account. Mills working on the "Upah" system are excluded.

MANUFACTURES

Data presented in this section emanate from the Monthly Survey of Manufacturing Industries conducted by this Department. As from January 1971, the scope and coverage of the Monthly Survey have been changed to meet the increasing requirement of the users of data.

Prior to 1970, the monthly survey covered only 17 selected industries and all establishments engaged in them. The scope of the survey was extended to 59 industries in 1970 and 81 industries in 1971. This has been achieved by introducing an employment (full-time paid) cut-off size for the purpose of coverage in an industry. Very small establishments whose contribution is negligible have thus been eliminated. However, industries having fewer establishments have been covered fully.

The item coverage has also been increased. In the past, only production figures were published. Under the present survey, besides production, data on quantity and value of sales as also employment are being published. A table giving selected characteristics of "Pioneer" establishments is also included as in past issues. In this issue data relating to 52 industries have been published.

Comparable figures – both yearly and monthly have been computed and published whenever possible in this bulletin.

The industry-wise coverage of those industries for which data is published is shown below:-

(1) Harga bagi tahun 1962 ialah harga dari Kementerian Makanan U.K. di-London. Dari tahun 1963 keatas harga-harga ini adalah harga-harga yang di-persetujui di-London untuk perkapalan oleh perkumpulan kelapa sawit Tanah Melayu. Perbezaan mungkin timbul di-antara harga-harga hitung panjang bulanan dan hitung panjang suku tahun, oleh sebab jualan-jualan adalah dibuat untuk penghantaran dalam tempuh bulanan dan pertukaran-pertukaran mestilah dibuat. Di-mana ada perbezaan-perbezaan sa-umpama itu, harga-harga suku tahun adalah harga-harga yang tepat. Dari bulan Disember, 1967 keatas harga-harga sa-lepas turun nilai mata wang adalah dicatitkan.

1962 prices is the U.K. Ministry of Food London Price. From 1963 onwards these prices are the prices release in London for shipments by the Malayan Oil Palm Pool. Differences may arise between the average monthly and average quarterly prices as sales are frequently made for delivery over the period of months and adjustments have to be made. Where there are such differences the average quarterly prices are the correct prices. From December, 1967 onwards, post devaluation prices are quoted.

(2) Ringgit Malaysia telah terapang bertentangan dengan sterling dalam bulan Julai 1972 dan bertentang dengan ringgit U.S. dalam bulan Julai 1973. Kadar pertukaran yang digunakan untuk pertukaran ialah purata bagi tiap-tiap bulan yang diperolehi dari Bank Negara.

The Malaysian ringgit floated via-a-vis sterling in July 1972 and vis-a-vis the U.S. dollar in July 1973. Exchange rates used for conversion are the average for each month obtained from Bank Negara.

(3) Harga-harga suku tahunan bagi minyak kelapa sawit adalah harga pukul rata untuk bulan-bulan yang berkenaan.

Quarterly prices for palm oil from 1975 are the average of the months pertaining to the quarter.

(4) Mulai dari Januari 1976 harga minyak kelapa sawit di kira dalam £ bagi semetrik tan.

From January 1976 onwards the price of palm oil is given in £ per metric ton.

In keeping with the employment situation in the rubber estates, a new series of employment data has been set up since January, 1965 owing to changes in the categories of directly employed staff.

(3) Perubahan dalam bayaran gaji bagi kakitangan pentadbiran di antara bulan adalah disebabkan kepada bayaran-bayaran bonos, komisyen, gaji cuti dll., oleh setengah estet-estet dalam bulan-bulan tertentu. Estet-estet selalunya tidak mengikut jadual tertentu untuk bayaran-bayaran seumpama itu.
Fluctuation in salary payments for administrative staff between months are mainly due to payments of bonuses, commissions, leave pay etc. by certain estates during certain months. Estates do not follow a strict schedule for such payments.

(4) Banyak estet-estet mempunyai kilang-kilang dan rumah asap yang sedang diusahakan tidak melapurkan pekerjaan secara berasingan untuk pekerja-pekerja kilang. Dalam keadaan-keadaan ini, adalah dianggap bahawa kilang atau rumah asap itu dijalankan oleh penoreh atau lain-lain pekerja atas asas sambilan, atau oleh buruh kontrek.
Many estates with factories and smokehouses in operation do not report separately for employment of factory workers in these cases, it is assumed that the factories or smokehouses are operated either by tappers or other workers on a part-time basis, or by contract labour.

(5) Beberapa estet telah menjeniskan semula kakitangan mentadbir sejak bulan Januari, 1975.
Some estates have reclassified the administrative staff since January, 1975.

(1) Banyak estet-estet yang mempunyai buruh kontrek tidak dapat menyatakan bilangan pekerja yang terlibat. Mungkin dapat dianggarkan bilangan-bilangan diasaskan atas hitung panjang bayaran tiap-tiap pekerja kepada pemburung-pemburung untuk pekerjaan yang dilapurkan. Adalah dirasai bahawa cara ini tidak betul disebabkan kemungkinan wangan.

Many estates using contract labour are unable to state the number of workers involved. While it would be possible to estimate the numbers based on the average payment per worker to contractors for reported employment, it is felt that this procedure might be misleading because of the possibility of duplication.
