PREFACE

—oOo—

The National Film Library is a film distributing agency of the Films Division of the Ministry of Information and Broadcasting of Malaysia.

Although its main work is to arrange for the widest possible use of films made by the Malaysian Film Unit, it also has a considerable collection of 16 m.m. educational documentary and general interest films acquired from Australia, Britain, Canada, India, New Zealand, Netherland, United States and United Nations. (Catalogues of these films are available on request.)

This catalogue lists Malaysian Film Unit documentary films currently held by the National Film Library for loan and the list includes films made by the Unit since 1947.

For the convenience of borrowers these films are grouped under subject heads and in addition, an alphabetical index is given at the end with the languages in which these films are available. The running time and the footage are clearly indicated.

FILEM NEGARA MALAYSIA

(MALAYSIAN FILM UNIT)

Filem Negara Malaysia — F.N.M. (Malaysian Film Unit — M.F.U.) is a division of the Information Services within the Ministry of Information and Broadcasting and has its studios in Petaling Jaya, the satellite town of Kuala Lumpur, the Malaysian Capital.

Purpose — F.N.M. was set up in 1946 in order to help Malaysians of all races to understand the problems and ways of living of other Malaysians; to combat illiteracy; to promote public education and information among all groups of the community and to show Malaysia to Malaysians and Malaysians to people overseas.

F.N.M. has grown into the largest documentary film unit in Asia with some of the best modern motion picture equipment. The Unit can undertake every aspect of film production and laboratory work. Although F.N.M. is a Government Department, being financed by the Government of Malaysia, it operates on semi-commercial lines. It rents its equipment, does processing and printing work for non-official organisations and undertakes production work for outside sponsors.

Films from Malaysia made by F.N.M. are being shown in 79 different countries. In Australia, Canada, New Zealand, U.S.A. and the United Kingdom, the F.N.M. films are being shown in cinemas on a commercial basis. The widest use of F.N.M. films overseas is in Britain and Australia where 107 films have been sold to film distributing companies for public exhibition and T.V. shows. In Malaysia itself, 481 cinemas and 134 mobile film units use F.N.M. films regularly in addition to over 1,000 regular individual borrowers. Almost all the films are made in four languages : Malay, Chinese (Mandarin), Tamil and English. The high quality of F.N.M. films is demonstrated by their successes at International Film Festivals.

CONDITIONS OF LOAN OF FILMS FROM THE NATIONAL FILM LIBRARY

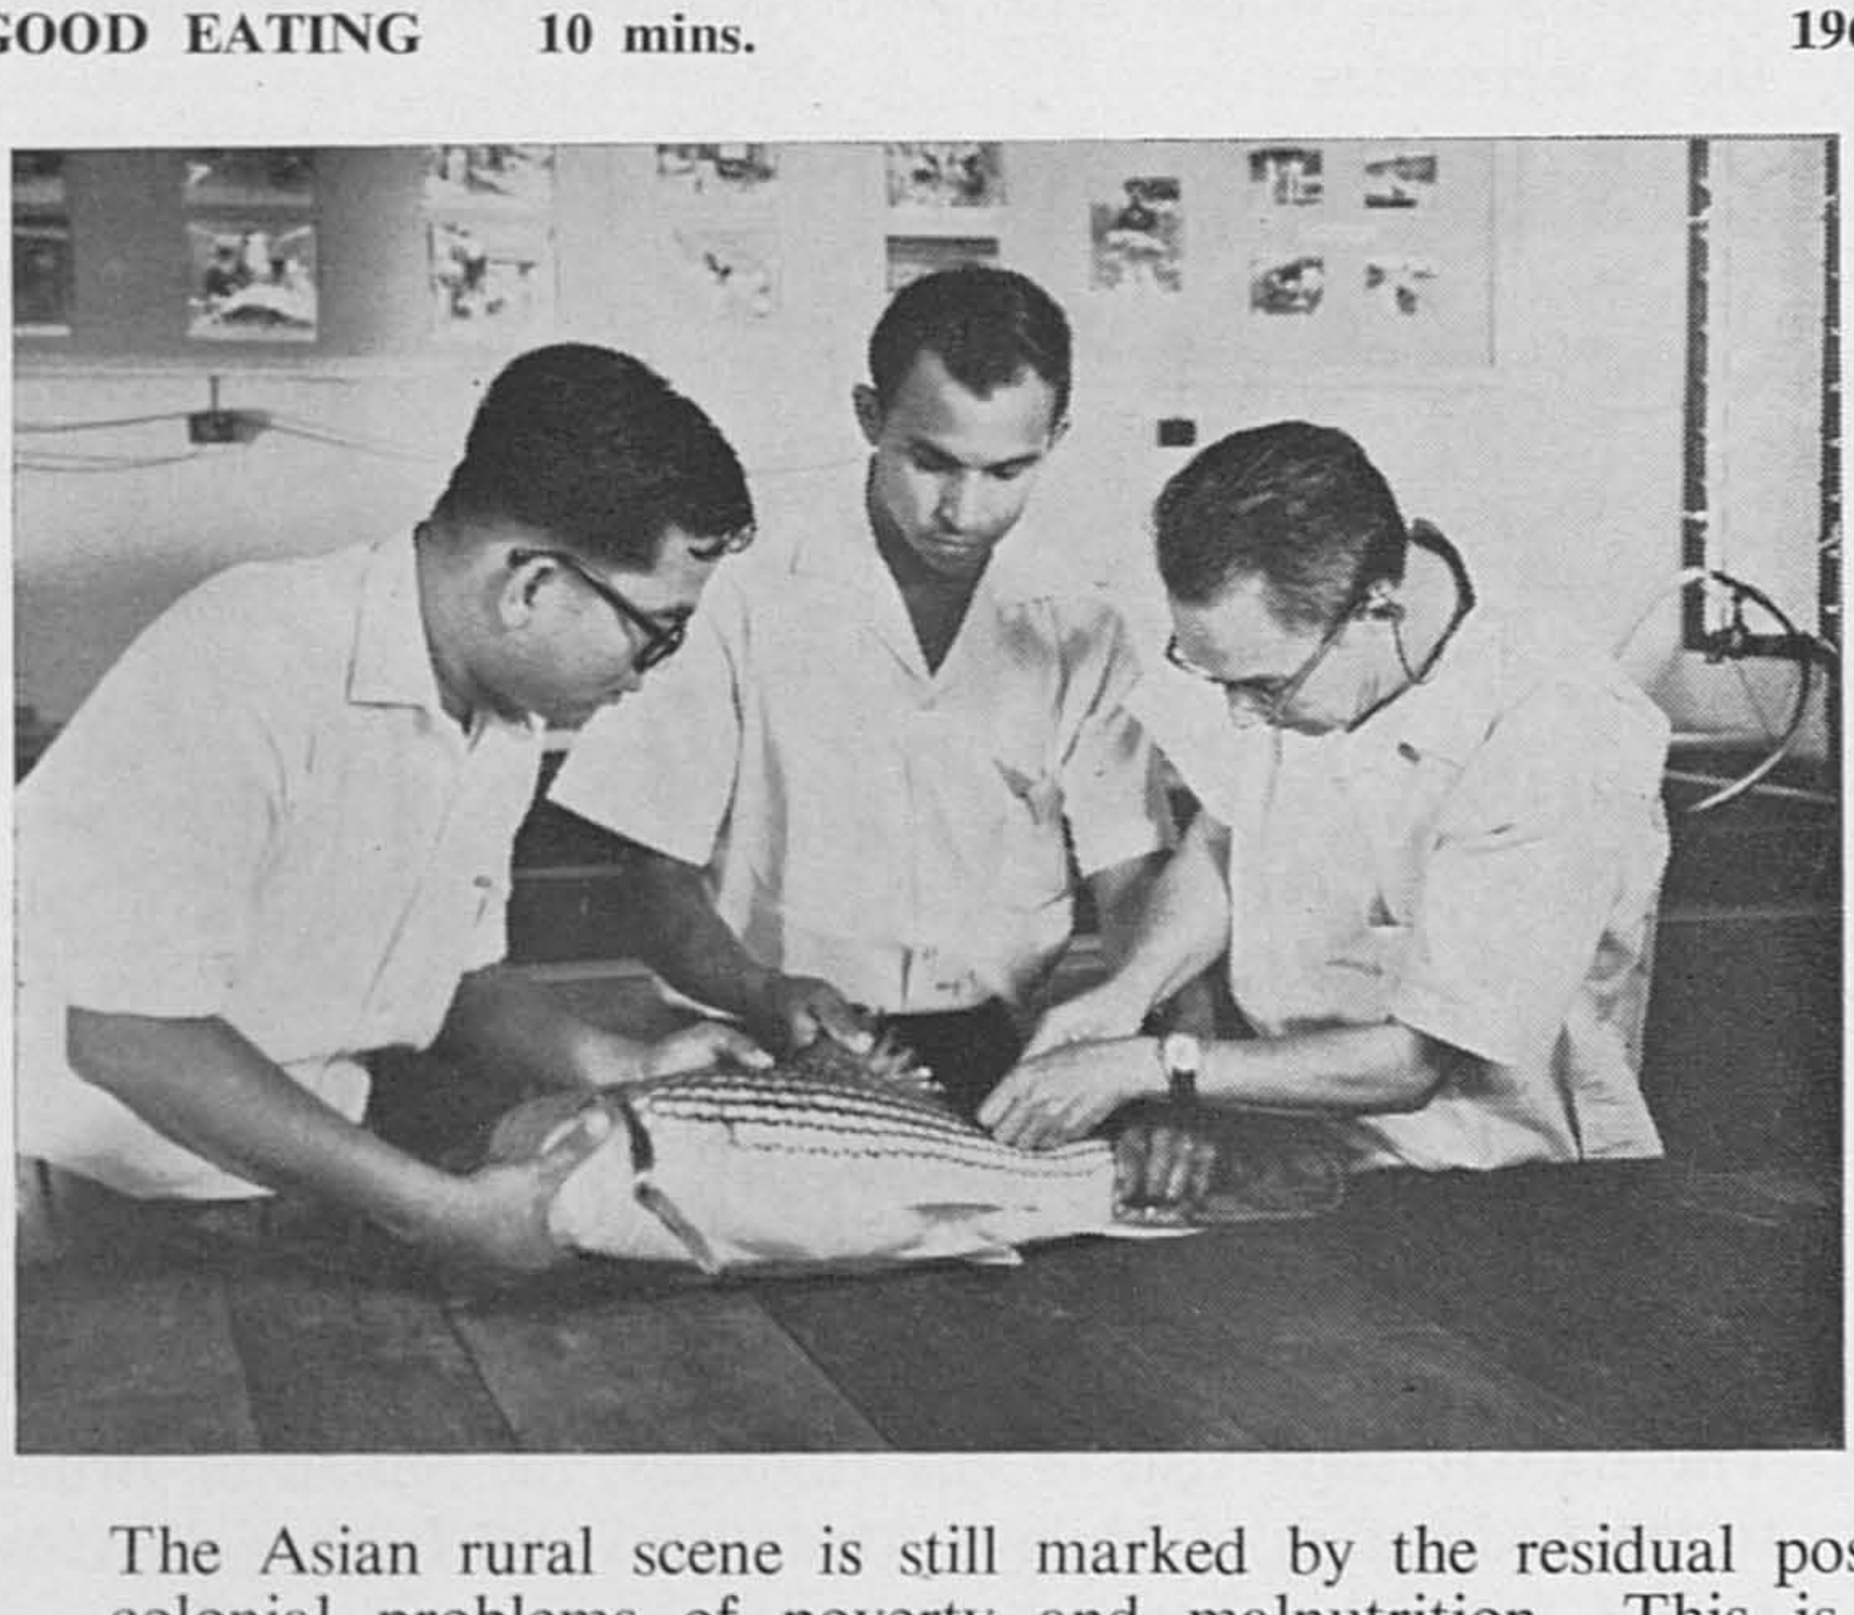
GOOD EATING **10 mins.** **1965**



The Asian rural scene is still marked by the residual post-colonial problems of poverty and malnutrition. This is a simple story of how a Malaysian farmer has found an answer to those two problems. His answer lies not in the discovery of a goose that lays the golden eggs, but in the rearing of fish in his own ponds. The results have been worthwhile. This first provides not only an additional source of income but also health — giving proteins for the family. By dint of initiative and industry, one can help not only one's self but one's nation as well, economically.
