MALAYSIA

A guide for businessmen and investors

Foreword

Malaysia is one of the fastest developing countries in East and Southeast Asia. A sound economy and political stability has rendered her one of the most attractive investment areas within the region.

This guide has been prepared for those who may be considering the establishment of businesses in Malaysia. It describes briefly the investment climate and business conditions in Malaysia. A publication of this nature, however, can only depict general conditions and professional advice should be sought by those with serious plans of diversifying or investing in the country. With a history of more than 60 years of service in Malaysia, Coopers & Lybrand is in a strong position to advise those who need professional expertise. Our range of services and the addresses of our offices in Malaysia are given at the end of this book.
