Prime Minister Najib Abdul Razak has revealed the secret recipe to making huge profits instead of drawing the same income on a monthly basis.

According to him, when a person becomes an entrepreneur who thinks out of the box and exploits online opportunities, then there is no limit to what can be achieved.

He also said those who are not their own bosses can expect the same wages.

“But if we manage to become entrepreneurs who use the internet, then like what the Whites say, ‘the sky is the limit’, there is no limit.

“The limit depends on our imagination to achieve the amount of income that is even hard for us to imagine,” he said.

The prime minister was speaking at the launch of the e-usahawan programme at the Putra World Trade Centre (PWTC) in Kuala Lumpur today.

Najib said the usage of the internet would ensure that products are marketed in a more interesting manner.

“We must change our mindset in that we must take the plunge into industries of the future,” he added.

Meanwhile, Najib said Malaysia’s e-commerce market will be RM88 billion in 2016, an increase from RM72 billion this year.

“You can see how wide the e-commerce market scope really is,” he added.

The country’s e-commerce is expected to be one of the largest contributors to the Malaysia Digital Economy.
