Selangor recorded 2,068 new infections today, making it the 10th consecutive day where fresh cases were above 2,000.

Approximately one in 12 new cases in the state were detected among those reporting symptoms. This was a welcome sign because it is considerably better than one in seven observed on May 27.

Kuala Lumpur saw a significant surge of 817 cases, near the record high of 830

set on May 28.

As of yesterday, the R-naught for the country was 1.09, down from a year-to-date high of 1.21 observed on May 23. As long as the R-naught stays higher than 1.00, it suggests that the spread of Covid-19 was accelerating.

Every state or territory in the country has a R-naught of more than 1.00.
