COVID-19 | The Health Ministry today reported 4,611 new Covid-19 cases amidst another 69 deaths reported today.

Malaysia has not seen new case numbers reach this low since mid-May. For details on testing numbers, read more here.

The number of active cases is currently on a 16-day downtrend, while the number of Covid-19 patients requiring intensive care has remain unchanged compared to yesterday.

Ventilator use has reduced marginally compared to yesterday but remains largely unchanged throughout the past two weeks.

- Active cases: 62,918
- Patients in ICU: 880

- Intubated: 452

States

Selangor (1,346)

Sarawak (682)

In Selangor (1,346) new Covid-19 cases were detected as a result of a victim -

who is not related to a cluster or is a close contact - getting tested only after experiencing symptoms.

While most regions are showing progress in reducing new case numbers, Sarawak (682) reported slightly more new cases today compared to the average over the past 14 days.

As of yesterday the R-naught for the country was 0.97, continuing on an upward trend since hitting a recent low of 0.90 on June 12.

As long as the the R-naught remains below 1.00, it would suggest that the spread of Covid-19 was decelerating, which is good.

The only region where the R-naught was more than 1.00 is Negeri Sembilan (1.05).

Deaths

The Health Ministry reported another 69 deaths that was attributed to Covid-19, bringing the national death toll to 4,477.
