

Rakyat will find vaccine for BN viruses

The attack launched by BN's Abdullah Ahmad Badawi, Najib Razak and Ong ka Ting on the opposition really saddens me. The BN has ruled Malaysia for 50 years and they have not learned the true spirit of democracy which is 'of the people, by the people for the people'.
MCPX

We are the rakyat and we will decide on the government we want. We can change the government every five years and it is not up to the BN leaders to decide who we must vote for. The BN leaders have stayed in the BN laboratory for a long time (imagine 50 years).

They have isolated themselves from the globalised and civilised world and their incompetence and arrogance have caused all kinds of viruses to be released by their irresponsible 'scientists'.

These worms have caused calamities to the once great country of Malaysia and her people. Let me name the ill-effects of these viruses. The first deadly virus, the crime rate rocketing. The second deadly virus, the prices of essential goods shooting up. The third deadly virus, rampant corruption. The fourth deadly virus, human rights deprived. The fifth virus, the judiciary destroyed.

The BN top guns couldn't fulfill their promises (to implement the IPCMC, better public transport, no price hikes, fight corruption etc), and now they control all the TV and media, showering the rakyat with all their promises (laden with all kinds of deadly viruses) and think that the rakyat will listen to their sweet words. We, the rakyat will find our way to look for a vaccine (the opposition leaders) and to punish those who release these deadly viruses.

This is the time, we the rakyat will send our top-ranked scientists (the opposition reps) into the lab, in order to replace the mediocre and incompetent bogus personnel (the BN leaders) and to find the cures for all these viruses. If the BN continues to rule, more and more deadly viruses will be released, and what will happen after the election, March 8?

The scenario will be this. First of all, the foreign investors will be frightened away and then there will be an exodus of our own Malaysian investors to other countries. Then the majority of the young graduates will be jobless and most of the families will be struggling hard to survive due to high inflation. The crime rate will further skyrocket and the quality of life will deteriorate and the future generations will suffer the most.

Do we want this to happen to us and also to our future generations? Do you want to see the frustration in the eyes of the young graduates? Do you want to hear the groans of the future generations who will suffer in the coming years? If yes, then vote BN.
