KUALA LUMPUR -- Prime Minister Najib Abdul Razak was admitted to Hospital Kuala Lumpur here Thursday night for further check-ups after he had experienced abdominal discomfort, said the Director General of Health, Dr Mohd Ismail Merican.

He said in a statement issued late Thursday night that an endoscopy was done on Najib and it revealed superficial ulcers and mild gastritis, according to a Bernama report.

"He has been started on treatment and is recovering well," Dr Mohd Ismail said, adding that the prime minister was expected to remain in hospital for a few days.

Najib had cancelled meetings with Australia Prime Minister Julia Gillard and US Secretary of State Hillary Clinton over the past few days due to chicken pox.
