## Dr M responding well to medication

KUALA LUMPUR: Tun Dr Mahathir Mohamad is responding well to medication and physiotherapy administered at the National Heart Institute (UN), his special officer Sufi Yusoff said.

The former prime minister is also eating Well.

• "He will continue to receive intravenous antibiotic treatment and intensive chest physiotherapy and is expected to remain in UN for the next few days," he said in a statement. Mahathir was admitted for chest infection on Wednesday. – Bernama .
