Dr M backs move on Lynas

NST-18/12/12

KUALA LUMPUR: Former prime minister Tun Dr Mahathir Mohamed agreed with the government's decision to continue with the Lynas rare earth processing plant in Gebeng, Kuantan, and disagreed with protesters that the plant was dangerous.

Condemning the action of protesters over the heavily politicised rare earth plant in Kuantan, he said the nation needed to accept that it was not harmful and important for the country to reap the benefits from the existence of rare earth.
