PM: Get help if you have signs of dengue fever

PETALING JAYA: Datuk Seri Najib Tun Razak has reminded the people to seek medical help if they have dengue fever symptoms.

The Prime Minister said the Health Ministry's statistics had shown a rise in dengue cases.

"If you or the people you know have dengue fever symptoms, please go to the nearest health clinic or hospital immediately," he said on Facebook and Twitter yesterday.

He also uploaded an image showing symptoms of dengue fever, such as headache, fever, pain behind the eyes, bleeding (in the gums, nose and beneath the skin), body aches, rashes, diarrhoea and vomiting.

The Health Ministry had over the past few days cautioned the people that the spike in dengue cases was expected to last until the end of the year following a shift in the dengue serotype and cyclical pattern.
